

# TM-265 Metal Finger Gasket

## Characteristic

1. It is an effective countermeasure for EMI, electromagnetic interference, which may cause a malfunction of device.
2. High shielding efficiency with lower contact pressure due to its material and shape, beryllium copper made finger type gasket.
3. Made of metal material, it absorbs little water that makes fungus to grow.
4. Having flexibility and stability, it keeps stable shielding effect for a long time.
5. It fits to limited room having double faced adhesive tape on it.

## Application

Racks, boxes, and panels for office automation appliances, measuring instruments, controller devices, and telecommunication devices that require EMI countermeasures.

## Remark

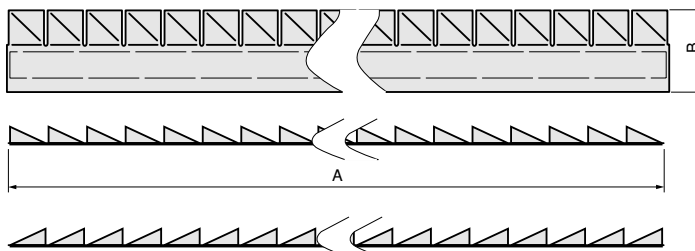

Ask about other types of metal finger gaskets.

## Note

1. Specification shall be considered as a reference, since it is a dealing product.
2. Product with different bending directions from right side to left side may be included. The shape shall not be specified.

## Size List

Model No.	A	B	C	D	Net Weight(g)	Code No.	
TM-265-1	609.6	5.84	0.762	10.09	3	5505	
TM-265-2		8.64	1.77		4	5506
