

MP1013 Series

Hall-effect position sensor with convenient snap-fit mounting.

Features

- Solid state reliability
- Excellent output stability over operating temperature range
- Open Collector (NPN) output can be used with bipolar switch or cmos logic circuits with suitable pull up resistor
- MP101301 – unipolar switch
 - Output switches low (off) when the magnetic field at the sensor exceeds the operate point threshold.
 - Output switches high (on) when the magnetic field is reduced to below the release point threshold
- RoHS Compliant
- Latching version available on special order basis

Applications

- Speed sensing
- Door interlock sensing
- Water flow sensing
