Compliance with RoHS Directive

FEATURES

1. Space-saving design (0.35 mm pitch)

The footprint when mated is down approx. 15% from our existing F4S model (40 contacts), contributing to the functionality enhancement and size reduction of target equipment.

2. Strong resistance to adverse environments **TOUGH CONTACT construction**

Ni barrier construction
(Tough against solder rise!)

Bellows contact construction
(Tough against dropping!)

V notch and Double contact constructions
(Tough against foreign particles and flux!)

3. The clips (soldering terminals) at the four corners enhance the mounting strength.

4. The simple lock structure ensures a superior mating/unmating operation feel.

5. The gull-wing-shaped terminals facilitate imaging inspections.

APPLICATIONS

Particularly suitable for board-to-FPC connections in ultra-compact mobile equipment that requires size and thickness reduction and functionality enhancement

NOTES

1. Regarding the design of PC board patterns

Conduct the recommended foot pattern design, in order to preserve the mechanical strength of terminal solder areas.

2. Recommended PC board and metal mask patterns

Appropriate control of solder amount is required to minimize solder bridges and other defects for connectors with 0.35-mm, 0.4-mm or 0.5-mm pitch terminals, which require high-density mounting. Refer to the right-hand drawing for recommended patterns.
