General Information:

- Compact branch-circuit units with high interrupting rating and current-limitation.
- With 600V rating, they can be used in 120/208, 120/240 and 277/480V circuits.
- Length variations relative to case size make the “rejection” type fuses.
- In general, SC fuses are about ⅓ the size of the 600V NEC fuse type.
- SC fuses with ampere ratings above 6A have a degree of overload time-delay which permits them to pass temporary overloads. At 200% load, they have a minimum opening time of 12 seconds.
