

#### Features

- ◆ Chassis mount with screw terminal block
- ◆ Including EMI filter to meet EN 55022, class A
- ◆ Ultra wide 4:1 input voltage ranges 8.5–36, 16.5–75, 43–160 VDC
- ◆ EN 50155 approval for railway applications
- ◆ Very high efficiency up to 91%
- ◆ No minimum load
- ◆ Soft start
- ◆ Under voltage lock-out circuit
- ◆ Adjustable output voltage +10/-20%
- ◆ Sense line
- ◆ Remote On/Off input
- ◆ Reverse input voltage protection
- ◆ Over temperature protection
- ◆ 3-year product warranty

The TEP 200WIR Series is a family of isolated high performance dc-dc converter modules with ultra-wide 4:1 input voltage ranges. They come in chassis mount version with screw terminal block and with integrated EMI input filter to meet EN 55022 class A. A very high efficiency allows full power operation at 25°C with only 100 LFM air flow cooling and operation at 60°C with only 40% power derating.

The very wide input voltage range and reverse input voltage protection make these converters interesting solution for battery operated systems. Typical applications are in telecom/datacom, industry control and railway systems for on board power distribution.

#### Standard Models

| Order code         | Input voltage                            | Output voltage | Output current max. | Efficiency typ. |
|--------------------|------------------------------------------|----------------|---------------------|-----------------|
| TEP 200-2412WIRCMF | <b>8.5 – 36 VDC</b><br>(24 VDC nominal)  | 12 VDC         | 15 A                | 89 %            |
| TEP 200-2413WIRCMF |                                          | 15 VDC         | 12 A                | 90 %            |
| TEP 200-2415WIRCMF |                                          | 24 VDC         | 7.5 A               | 90 %            |
| TEP 200-2416WIRCMF |                                          | 28 VDC         | 6.5 A               | 90 %            |
| TEP 200-2418WIRCMF |                                          | 48 VDC         | 3.7 A               | 89 %            |
| TEP 200-4812WIRCMF | <b>16.5 – 75 VDC</b><br>(48 VDC nominal) | 12 VDC         | 18 A                | 90 %            |
| TEP 200-4813WIRCMF |                                          | 15 VDC         | 14 A                | 91 %            |
| TEP 200-4815WIRCMF |                                          | 24 VDC         | 9 A                 | 90 %            |
| TEP 200-4816WIRCMF |                                          | 28 VDC         | 7.5 A               | 91 %            |
| TEP 200-4818WIRCMF |                                          | 48 VDC         | 4.5 A               | 90 %            |
| TEP 200-7212WIRCMF | <b>43 – 160 VDC</b><br>(110 VDC nominal) | 12 VDC         | 20 A                | 89 %            |
| TEP 200-7213WIRCMF |                                          | 15 VDC         | 16 A                | 90 %            |
| TEP 200-7215WIRCMF |                                          | 24 VDC         | 10 A                | 89 %            |
| TEP 200-7216WIRCMF |                                          | 28 VDC         | 8.5 A               | 90 %            |
| TEP 200-7218WIRCMF |                                          | 48 VDC         | 5 A                 | 89 %            |

#### Options

|                  |                                                                                                          |
|------------------|----------------------------------------------------------------------------------------------------------|
| <b>TEP-MK1</b>   | Din-rail mounting kit (incl. mounting screws)                                                            |
| <b>on demand</b> | Models with 3.3 VDC or 5.0 VDC output                                                                    |
|                  | Models with 53 VDC output (input voltage range 33 - 75 VDC)                                              |
|                  | Models with 2:1 input voltage ranges: 8.5-22, 16.5-36, 33-75 VDC (only to optimize cost at high volumes) |
|                  | Models for PCB mount (EMI Filter not included), optional heatsink and chokes for external filter         |
|                  | Negative (passive = Off) Remote On/Off function (standard is passive = On)                               |

## Input Specifications

|                                                  |                                                                                                                                                                                                                                                                                                                                                                                       |
