

Assembly of CNMB Enclosure

- The Module Box is designed to hold a number of PCB's which snap fit into place

- Each Module Box can hold up to 3 PCB's horizontally and 2/4 vertically

- PCB in top position

- PCB second position

- PCB vertical mount

- PCB vertical mount second option

- PCB base position

- Once the required circuitry is in place the base and top can be put on. These also snap fit into place.

- Base is now connected

- The Module box kit comes with clips, allowing steady fastening of its base and snap fit connection to Din Rails.

- Each clip slides and clicks into place

- Push in from the inside toward the outside

- Clips are now connected

- Module Box with top cover. (These are available in grey transparent and red)

- Top cover connected

- Various Terminal Guards are available allowing for different capabilities

- Terminal Guards also snap fit into place and are inter-changeable

- Finished Module Box

- Also available for the CNMB series are the Extended Height Module range

- The Height Module snap clicks into place and can house an additional PCB

- The curved and hinged lids also are available in grey and transparent

- The moveable lid allowing easy access to the housed PCB board
