RESEARCH & DEVELOPMENT

The ever increasing sophistication of microwave communication systems is continually requiring components to meet a higher level of performance. **RADIALL's** research and development groups understand these needs and are committed to searching for product solutions that will be needed in the future. They also are providing continued improvements to our already extensive lines of high performance products. All our engineer teams are equipped with state of the art equipment and facilities, in an effort to provide the best solutions to our customers.

MANUFACTURING

RADIALL knows that the quality of the connector's components is directly related to the mechanical precision of the machining process, along with good quality procedures. In an effort to continually meet the highest quality standards, all our production plants are equipped with the latest state of the art production equipment. **RADIALL's** manufacturing process maintains strict control of all procedures and incorporates all tooling, machining, surface treatment and assembly operations into the manufacturing process of each production group.

INTRODUCTION

RADIALL MPX series connectors conform to both MIL-C-83527A American standard and EN 3682 European standard. RADIALL MPX high density rectangular rack and panel connectors give significant improvement over ARINC 404 connectors by offering a modular concept. Connector, shell, inserts and contacts can be supplied separately or pre-assembled. These connectors are used to form the mechanical and electrical interface between avionics equipment box and rack.

In response to the continuing development of electronic systems used in ever harsher environments, filtered connectors are offered to improve the EMC effectiveness against electromagnetic, radiofrequency interferences and electromagnetic pulses.

DESCRIPTION

A MPX series connector is made of three main parts.

- The contacts.
- The inserts.
- The shell.

The contacts are low insertion / extraction force. The following sizes are available:

- size 22 signal contacts.
- sizes 20, 16, and 12 power contacts.
- sizes 12, 16, 5 and 8 coaxial contacts.
- size 8 twinax contacts for shielded twisted pairs.
- the MPX series contacts are offered in crimp and pc tail termination.

Size 22 contacts in pc tail termination are offered in both rear release rear removable and front release front removable style. Other sizes are offered in the rear release rear removable style only.

Pin contacts are installed in the receptacle shell and socket contacts in the plug shell except size 22 contacts for which pin contacts are installed in the plug shell and socket contacts in the receptacle shell. Contacts are installed and removed using simple standard tooling.

Inserts are made of thermosetting resin or of aluminum alloy. They have metallic retention clips to retain the contacts. Each insert has one polarization slot which has its corresponding pin in each shell cavity. Environmental inserts have:

- a) a silicon rubber ring that ensures sealing between the insert and the shell.
- b) a rear grommet which ensures sealing around each wire crimped on a contact.
- c) an interfacial seal which ensures sealing around each protruding contact once the connector is mated.

Non environmental inserts do not have parts b) and c).

There are only two inserts for front release front removable contacts, they are contact arrangements 150 and 100 which are also available for rear release rear removable contacts.

Shells are machined from solid aluminum alloy and have a conductive plating (cadmium yellow chromate). There are 3 shell sizes (sizes 2, 3 and 4) which can respectively be fitted with 2, 4 and 6 inserts.

The plug shell is designed to be fitted with inserts for size 22 pin contacts and inserts for socket contacts for all other contact sizes. The plug shell has a field replaceable EMI spring and a coupling seal on each shell cavity and 3 polarization posts.

The receptacle shell is designed to be fitted with inserts for size 22 socket contacts and inserts for pin contacts for the other contact sizes. The receptacle shell has 3 polarization keys.

HOW TO ORDER SHELLS

MPX 3 R 00 01

Series

Shell size

2 : size 2

3 : size 3

4 : size 4

Shell type

R : Receptacle shell

A : Plug shell

Modification code

see page 30.

Polarization code

see pages 31 & 32.

HOW TO ORDER INSERTS

	MPX	E	2	P	11	T2	A	S
Series _____								
Class (see note 1) _____								
E : insert with interfacial seal, rear grommet and o-ring.								
N : insert with o-ring, without interfacial seal and rear grommet.								
T : insert with o-ring and interfacial seal without rear grommet.								
Insert size _____								
1 : insert for A, C and E shell cavities.								
2 : insert for B, D and F shell cavities.								
Insert type _____								
P : insert for plug shell.								
R : insert for receptacle shell.								
Contact arrangement _____ see pages 14 to 18.								
Triax contact grounding (see note2) _____								
Letter omitted : triax contacts are grounded								
A : triax contacts not grounded.								
Contact delivery _____								
Letter omitted : insert is delivered without contacts.								
S : insert is delivered with crimp signal and power contacts (no coax, triax or twinax contacts).								

notes:

- 1** : E, N and T classes apply to inserts for rear release rear removable contacts.
- 2** : When A is omitted triax contacts cavities are grounded to the shell.
- 3** : Inserts "2-100" and "1-150" for front release front removable contacts are available, see page 18 for part numbers.

remark:

Dummy inserts part numbers are the following:

MPXE10 = dummy insert p/n for A,C and E shell cavities.

MPXE20 = dummy insert p/n for B,D and F shell cavities.

HOW TO ORDER ASSEMBLED CONNECTORS

	MPX	E	2	R	202	A	S	00	01
Series _____									
Class (see note 1) _____									
E : insert with interfacial seal, rear grommet and o-ring.									
N : insert with o-ring, without interfacial seal and rear grommet.									
T : insert with o-ring and interfacial seal without rear grommet.									
Shell size _____									
2 : size 2									
3 : size 3									
4 : size 4									
Shell type _____									
R : Receptacle shell.									
A : Plug shell.									
Insert combination code (see pages 12 to 13) _____									
Triax contact grounding _____									
Letter omitted : triax contacts are grounded.									
A : triax contacts not grounded.									
Contact type _____									
X : without contacts.									
S : crimp contacts.									
Y : pc tail contacts .025 (0.635) dia, .250 (6.35) length.									
YA : pc tail contacts .025 (0.635) dia, .150 (3.80) length.									
YB : pc tail contacts .025 (0.635) dia, .374 (9.50) length.									
Z : same as Y but with pre-tinned pc tail.									
ZA : same as YA but with pre-tinned pc tail.									
ZB : same as YB but with pre-tinned pc tail.									
Modification code (see page 30) _____									
Polarization code (see pages 31 & 32) _____									

notes:

- 1** : E, N and T classes apply to inserts for rear release rear removable contacts.
- 2** : Coaxial, triaxial, twinax contacts must be ordered separately.

MATERIALS

Description	Material	Plating
shell and backshell	aluminum alloy	cadmium yellow chromate over electroless nickel
contacts	copper alloy	gold over electroless nickel
inserts	thermosetting resin	/
	aluminum	cadmium yellow chromate over electroless nickel
retention clip	copper alloy	/
seals and o-ring	fluorinated silicon rubber	/
insert retention plate	aluminum alloy	blue anodized
polarization key	zinc alloy	cadmium olive drab
polarization post	aluminum alloy	cadmium yellow chromate
screws	brass	cadmium yellow chromate
washers	copper alloy	cadmium yellow chromate
EMI spring	copper alloy & fluorinated silicon rubber	tin-lead alloy over electroless nickel

ELECTRICAL CHARACTERISTICS

Insulation resistance (MIL-STD-1344A method 3003) : $\geq 1000\text{M}\Omega - 500\text{Vdc}$.

Dielectric withstanding voltage (MIL-STD-1344A method 3001) : sea level : 1300Vac for size 22 contacts & 1500Vac for other sizes.
50000 feet : 800Vac

Shell to shell conductivity (MIL-STD-1344A method 3007) : $\leq 2,5\text{mV}$.

Size 8 cavity grounding (MIL-STD-1344A method 3007) : $\leq 10\text{mV}$.

Shielding effectiveness (MIL-C-83527A) : see table below

Frequency (Mhz)	Attenuation (dB)
100	65
200	65
300	63
400	62
800	60
1000	60

Contacts : see table below.

Contact size	Wire				Max current (A)	Contact resistance (mΩ)
	AWG	Cross section (mm ²)	Min diameter inch (mm)	Max diameter inch (mm)		
22	22	0.38	.030 (0.76)	.052 (1.32)	5	17
	24	0.21			3	23
	26	0.14			2	38
20	20	0.6	.035 (0.89)	.060 (1.52)	7.5	11
	22	0.38			5	17
	24	0.21			3	23
16	16	1.34	.048 (1.21)	.080 (2.03)	13	6
	18	0.91			10	8
	20	0.6			7.5	10
12	12	3.18	.091 (4.85)	.216 (5.49)	23	3.35
	14	1.91			17	4.24

MECHANICAL AND ENVIRONMENTAL

Temperature range : -65°C / +150°C

Temperature life : 1000 hours at 100°C

Salt spray (MIL-STD-1344A method 1001) : 500 hours

Humidity (MIL-STD-1344A method 1002 type I test condition letter A) : 10 days.

Shock (MIL-STD-1344A method 2004 test condition letter H) : 30g / 11ms / half sine

Vibration : see MIL-C-83527A

Mating and separating forces : size 2 = 800 N max
size 3 = 1400 N max
size 4 = 1950 N max

8	618911 for pin 618913 for socket	red

Cavity reducers

The following cavity reducers are not removable from the insert once installed. They are made of copper alloy and are nickel plated to allow contact cavity grounding.

Cavity reducer type	Part number
From pin size 8 to size 12	Environmental: 618940001 Non environmental: 618940
From socket size 8 to size 12	Environmental: 618941001 Non environmental: 618941

BACKSHELLS

Backshells are made of aluminum alloy and are cadmium yellow chromate plated. To order for one complete backshell you must order separately for an EMI backshell plus a combination of backshell terminations (i.e one complete backshell for cavity A = 4 each 618802011 + 1 each 618802010 + 1 each 618801002).

Designation	Part number
EMI backshell for cavities A,C & E	618801002
EMI backshell for cavities B,D & F	618800002
Backshell termination	618802010
Backshell blank termination	618802011

DUST CAPS

Descriptions	Part number
Conductive dust cap for receptacle shell	618953001
Conductive dust cap for plug shell	618953002
Non conductive dust cap for plug shell	618953

O-RING FOR INSERTS

Descriptions	Part number
O-ring for inserts for A, C & E cavities	618953020
O-ring for inserts for B, D & F cavities	618953021

COUPLING SEALS

Descriptions	Part number
Coupling seals for A, C & E shell cavities	618953010
Coupling seals for B, D & F shell cavities	618953011

EMI SPRING

Descriptions	Part number
Kit made of one EMI spring for A, C & E shell cavities and of one EMI spring for B,D & F shell cavities	618810
EMI spring for A, C & E shell cavities	618810001
EMI spring for B, D & F shell cavities	618810002

POLARIZATION RETENTION SCREWS

A kit of two screws that are used to fix the polarization posts or keys retention plate is available

P/n: 618985

INSERTS INSTALLATION INSTRUCTIONS

- 1 - Place the sealing ring in the insert groove by hand, making sure that it is perfectly seated.
- 2 - Apply SICERON KF® “graisse silicone 500” grease on the sealing ring by using a brush.
- 3 - Place the insert from the back of the shell in the shell cavity, then push on the insert by hand ensuring inserts are correctly located, orientated and fully seated.
- 4 - Fix the insert retention plates on the shell with the screws and washers (torque = 1.9 in.lb).

The table below gives A and B dimension values (A and B = distance between the front flange of the connector and the rear face of the insert). See drawings pages 38 to 43 for A and B description.

PLUG

Insert description	A and/or B dimension for plug environmental inch (mm)	A and/or B dimension for plug non environmental inch (mm)

FOR POSITION
SEE PANEL CUT OUT

A.1 - Strip cable as shown

A.2 - Slide ferrule over sheath

- Fold back the first braid on cable jacket
- Cut high immunity rib on .118 strip off length
- Flare second braid
- Slide center conductor into center contact sub-assembly until it butts
- Crimp center contact
 - . Tool M22520/2-01 (RADIAL 282 281)
 - . Selector set 1 for ASNE0633WG & ASNE0639XY cables
 - set 2 for KX21, KX21DS, RG178, AXON P813859 & P822817, F1703/134, ASNE0690WL
 - . Positioner (DANIELS K 370) (RADIAL 282 555)

A.3 - Push cable assembly into contact outerbody

- Fold braid over barrel
- Slide ferrule to .020 of shoulder barrel
- Crimp the ferrule a first time
- Turn the contact of about 45°
- Crimp the ferrule a second time
 - . Tool M22520/4-01 (RADIAL 282 292)
 - . Positioner (RADIAL 282 556)
 - . INS / EXT tool (RADIAL 282 546)

B.1 - Strip the cable at dimensions shown

B.2 - Slide ferrule over braid until it butts against sheath

- Comb and fold braid over ferrule
- Strip dielectric

B.3 - Insert inner conductor into center contact sub assembly

- Crimp center contact using:
 - . Crimping tool: M22520/2-01 selector set 4
 - . Positioner: RADIAL 282 580

B.4 - Push cable assembly into outer contact

- Crimp outer contact using:
 - . Crimping tool: M22520/31-01 (DANIELS GS200)
 - . Positioner: RADIAL 282 581

C

D

C.1 - For BUS 3910 cable

- . Strip the cable at dimensions shown
- . Fold back outer braid and cut high immunity ribbon
- . Fold braid forward

- For AXON P503031 cable

- . Strip the cable at dimensions shown
- . Cut outer braid and high immunity ribbon

C.2 - Slide ferrule over braids until it butts against sheath

- Comb and fold braids over ferrule
- Strip dielectric

C.3 - Insert inner conductor into center contact sub-assembly

- Crimp center contact using:
 - . Crimping tool: M22520/2-01 selector set 5
 - . Positioner: RADIAL 282 580

C.4 - Push cable assembly into outer contact

- Crimp outer contact using:
 - . Crimping tool: M22520/31-01 (DANIELS GS200)
 - . Positioner: RADIAL 282 581

D.1 - Strip the cable at dimensions shown

D.2 - Slide ferrule over braid until it butts against sheath

- Comb and fold braid over ferrule
- Strip dielectric

D.3 - Insert inner conductor into center contact sub-assembly

- Crimp center contact using:
 - . Crimping tool: M22520/2-01 selector set 4
 - . Positioner: RADIAL 285 580

D.4 - Push cable assembly into outer contact

- Crimp outer contact using:
 - . Crimping tool: M22520/31-01 (DANIELS GS200)
 - . Positioner: RADIAL 282 581

E

F

E.1 - Slide sealing booth over cable

E.2 - Slide ferrule over outer jacket, next trim outer jacket, braid and dielectric to dimensions shown

E.3 - Slide center contact over inner conductor and crimp using:

- . Crimping tool: M22520/2-01 (RADIAL 282 281), selector on:
6 for RG400, RG58 & KX15
8 for RG141, RG142, RG223, ASNE0293XF & ASNE0691WM
- . Positioner: DANIELS K345 (RADIAL 282 550)

E.4 - Flare braid and slide outer contact underneath

E.5 - Slide ferrule over braid and crimp ferrule over outer contact using:

- . Crimping tool: M22520/5-01 (RADIAL 282 293)
- . Die: M22520/5-05 (RADIAL 282 246)
Hex B except Hex A for RG58 & KX15 cables

F.1 - Strip the cable as shown

F.2 - Slide ferrule over braid until it butts against sheath

- Comb and fold braid over ferrule
- Cut to dimension
- Then, strip dielectric to dimension shown
- Slide insulator over the center conductor
- Insert center conductor into center contact sub-assembly
- Crimp center contact, using:
 - . Tool M22520/2-01 (RADIAL 282 281) selector no. 7
 - . Positioner: DANIELS K345 (RADIAL 282 550)

F.3 - Push cable assembly into body contact

- . Crimp using: M22520/5-01 (RADIAL 282 293)
- . Die: M22520/5-05 (RADIAL 282 246)
Hex. B

G

H

G.1 - Strip cable at dimensions shown

G.2 - Slide ferrule over braid until it butts against the cable jacket

- Comb and fold back braid over ferrule
- Strip dielectric to dimension shown

G.3 - Slide center conductor into center contact until dielectric butts against center contact insulator. Then crimp.

. Crimping tool: M22520/2-01 (RADIAL 282 281)

selector on:

6 for KX15 and RG58 cables

7 for RG316DU cable

8 for RG141 cable

. Positioner: RADIAL 282 572

G.4 - Push cable assembly into outer body and crimp, using:

. Crimping tool: M22520/5-01 (RADIAL 282 293)

. Die: M22520/5-45 (RADIAL 282 236)

. Hex A: .232 (5.9) on flats

G.5 - Extraction tool: M81969/28-03 (RADIAL 282 549 001)

H.1 - Strip cable at dimensions shown

H.2 - Slide ferrule over braid until it butts against the cable jacket

- Comb and fold back braid over ferrule
- Cut the high immunity ribbon and strip dielectric to dimension shown

H.3 - Slide center conductor into center contact until dielectric butts against center contact insulator.

- Then, solder or crimp

. Crimping tool: M22520/2-01 (RADIAL 282 281)
selector on 8

. Positioner: RADIAL 282 572

H.4 - Push cable assembly into outer body and crimp, using:

. Crimping tool: M22520/5-01 (RADIAL 282 293)

. Die: M22520/5-45 (RADIAL 282 236)

. Hex A: .232 (5.9) on flats

H.5 - Extraction tool: M81969/28-03 (RADIAL 282 549 001)

- For environmental application, before stripping, slide sealing booth over cable
- For non environmental pin contacts (670150, 670151, 618160 and 618161), slide centering boot over cable before stripping

J.1 - Trim cable jacket to length indicated

J.2 - Slide the ferrule over the cable

- Cut the high immunity ribbon if any
- Fold back braid or braids over the ferrule as indicated
- Cut braid or braids as shown
- Cut rod fillers
- Strip the two inner conductors

J.3 - Introduce the no. 2 conductor into the intermediate contact crimp pot

- Crimp the intermediate contact crimp pot:
 - . Crimping tool: M22520/2-01 (RADIAL 282 281)
 - . Selector: position 5
 - . Positioner: RADIAL 282 574

J.4 - Put the no. 1 cable in the slot of the intermediate contact crimp pot

- Slide the center contact over the conductor
- Crimp the center contact:
 - . Crimping tool: M22520/2-01 (RADIAL 282 281)
 - . Selector: position 5
 - . Positioner: RADIAL 282 576

J.5 - Install the rear insulator

- Introduce this cable assembly into the contact body sub-assembly

J.6 - Crimp the outer contact body barrel in the indicated crimping area

- . Crimping tool: M22520/5-01 (RADIAL 282 293)
- . Die: M22520/5-45 (RADIAL 282 236) hexagonal die closure B (.216 on flats)
- . During the operation push on the cable

K

INSPECTION DIMENSIONS AFTER ASSEMBLY BEFORE CRIMPING

Before stripping, slide alignment boot or sealing boot over cable

- K.1** - Slide the inner ferrule over cable
 - Trim cable jacket to length indicated
- K.2** - Push the shield braid back and over the cable jacket
 - Cut rod filler
 - Strip the two inner wires to length indicated
- K.3** - Put the two wires in the insulator bushing until it's but against the shield braid
 - Introduce the wire 1 (blue) into the center contact
 - Introduce the wire 2 (white) into the intermediate ferrule
 - Crimp the center contact and the intermediate ferrule using:
 - . Crimping tool: M22520/5-01
 - . Die: DANIELS Y793 or Y793A
- K.4** - Be sure the wire 2 (white) is facing the anvil
- K.5** - Push the shield termination ferrule forward and under the braid until it is against the insulator bushing
- K.6** - Put the cable/center contact assembly in the rear of the outer contact
- K.7** - Crimp the outer contact in the indicated crimping area using:
 - . Crimping tool: M22520/5-01
 - . Die: DANIELS Y793 or Y793A
 - During the crimping operation, push on the ferrule
- K.8** - Cut around the braid so that the braid is flush with the surface of the outer contact
