MP 96x24 K

with Slide-In-Dial

Application

The edgewise moving-coil panel meters **MP 48x24**, **MP 72x24**, **MP 96x24 K** and **P 144x36** with a slim-line dial are used for measurement of **DC currents and voltages**.

The moving-coil movement is manufactured to newest findings and distinguishes in a small power consumption, a high accuracy and a very good damping.

The instruments are suitable to be mounted in switchboards, control panels, machine tool consoles and mosaic panels (except P 144x36).

With MP 96x24 K the **front panel**, the **front window** and the **dial** as well as the **dial illumination** (optional) can be exchanged easily. On the rear side a cable grip for the connecting leads is integrated.

Movements

Self-shielding moving-coil movements with swivel coil, pivot suspended. Spring loaded jewel bearings for vibration and shock resistance.
