### Description

Poly Rivets are one-piece nylon blind rivets that offer a fast, economical, permanent, hand installed fastener that can be used in a wide variety of materials including sheet metal, plastic sheets, fiberglass, P.C. boards, and composition materials. Fast, easy installation can be made without tools from one side of the work piece. The rivet is inserted in a pre-punched hole and the drive pin is forced into the specially designed legs which expand and securely locks the assembled components in place. The versatile Poly Rivet provides a secure joint even under extreme vibration conditions while it electrically insulates and resists corrosion and cathodic transfer. Molded in natural nylon 6/6.
