Features and benefits

- An extremely compact and light weight filter design requiring minimum mounting space in installations and cabinets.
- Simple and time-saving installation with good accessibility for automatic and hand tools.
- Solid, touch-safe terminal blocks, for all filters from 10 to 100A, offering sufficient contacting cross section according to the EN 60204-1 installation standard.
- Optionally available transparent protective covers for all filters with busbars from 150 to 1000A, to protect the installer, operator or inspector from undeliberate touching of life conductors. They can easily be retrofitted even if the filter is already installed and connected.
- These EMC filters provide the attenuation performance needed to fulfill EN 61800-3/A11.
- Guaranteed filter performance under fullload operating conditions.
- 15 different filter models allow the specific choice and deployment for most industrial applications.

Typical applications

- Variable speed electrical power drive systems/motor drives for mainly industrial purpose
- Various industrial applications comprising frequency inverters, motor drives and servo drives
