

TOSHIBA CMOS Digital Integrated Circuit Silicon Monolithic

TC7WB66FK

Dual Bus Switch

The TC7WB66FK is a low on-resistance, high-speed CMOS 2-bit bus switch. This bus switch allows the connections or disconnections to be made with minimal propagation delay while maintaining Low power dissipation which is the feature of CMOS.

When output enable (OE) is at High level, the switch is on; when at Low level, the switch is off.

P-MOS and N-MOS channel block means the device is suitable for analog signal transmission.

All inputs are equipped with protector circuits to protect the device from static discharge.

Features

- Operating voltage: $V_{CC} = 2 \sim 5.5 \text{ V}$
- High speed operation: $t_{pd} = 0.25 \text{ ns (max)}$
- Ultra-low on resistance: $R_{ON} = 5 \Omega \text{ (typ.)}$
- Electro-static discharge (ESD) performance: $\pm 200 \text{ V}$ or more (JEITA)
 $\pm 2000 \text{ V}$ or more (MIL)
- High noise margin: $V_{NIL} = V_{NIH} = 28\% V_{CC} \text{ (min)}$
- Power-down protection for inputs (control inputs only)
- Package: US8

- TOSHIBA is continually working to improve the quality and reliability of its products. Nevertheless, semiconductor devices in general can malfunction or fail due to their inherent electrical sensitivity and vulnerability to physical stress. It is the responsibility of the buyer, when utilizing TOSHIBA products, to comply with the standards of safety in making a safe design for the entire system, and to avoid situations in which a malfunction or failure of such TOSHIBA products could cause loss of human life, bodily injury or damage to property.
In developing your designs, please ensure that TOSHIBA products are used within specified operating ranges as set forth in the most recent TOSHIBA products specifications. Also, please keep in mind the precautions and conditions set forth in the "Handling Guide for Semiconductor Devices," or "TOSHIBA Semiconductor Reliability Handbook" etc..
- The TOSHIBA products listed in this document are intended for usage in general electronics applications (computer, personal equipment, office equipment, measuring equipment, industrial robotics, domestic appliances, etc.). These TOSHIBA products are neither intended nor warranted for usage in equipment that requires extraordinarily high quality and/or reliability or a malfunction or failure of which may cause loss of human life or bodily injury ("Unintended Usage"). Unintended Usage include atomic energy control instruments, airplane or spaceship instruments, transportation instruments, traffic signal instruments, combustion control instruments, medical instruments, all types of safety devices, etc.. Unintended Usage of TOSHIBA products listed in this document shall be made at the customer's own risk.
- The products described in this document are subject to the foreign exchange and foreign trade laws.
