

TX6A-SD™ 10Gig™ U/UTP Copper Cable with MaTriX Technology

specifications

Category 6A/Class E_A cable is constructed of 26 AWG copper conductors with FEP Plenum (CMP), PVC Riser (CMR), HDPE Low Smoke Zero Halogen (LSZH), or PVC (CM) insulation. The copper conductors are twisted in pairs and separated by a cross-divider. All four pairs are surrounded by MaTriX tape and a flame retardant jacket. The patented MaTriX tape suppresses the effect of alien crosstalk allowing 10 Gb/s transmission. The innovative cable design provides installation flexibility as cables can be routed in tight bundles through pathways and spaces.

technical information

Category 6A/Class E_A channel performance:	Exceeds electrical and alien crosstalk performance requirements of ANSI/TIA-568-C.2 Category 6A and ISO 11801 Class E _A standards for supporting 10GBASE-T transmission over twisted-pair cabling systems in a 4-conductor configuration <i>*Note: The cable utilizes 26 AWG conductors which does not meet the 24 to 22 AWG conductor size of horizontal cable in ANSI/TIA-568-C.2, resulting in increased attenuation which de-rates the maximum channel distance to 70 meters (229 feet)</i>
Cable diameter:	0.240 in. (6.1mm) nominal
Conductors/insulators:	26 AWG solid copper insulated with FEP (CMP), flame retardant PVC (CMR), HDPE (LSZH), or PVC (CM)

key features and benefits

Interoperable	Compatible with components of the TX6A™ 10Gig™ U/UTP Copper Cabling System with MaTriX Technology (100 meter solution) for increased design flexibility
MaTriX Technology PATENTED	Provides superior suppression of alien crosstalk (PSANEXT and PSAACRF); improves the installation flexibility by allowing cable combing in existing pathways without compromising performance
Superior headroom warranty	Provides the highest margins above the industry standard for both electrical and alien crosstalk performance
Smaller cable diameter than most Category 6 cable and round, flexible design	Allows efficient use of pathways and spaces by improving fill capacity and reducing required bend radius resulting in easier cable routing and management
Extended temperature range	Allows operation in 75°C (167°F) ambient environment providing error-free performance in high density cabinets and large cable bundles for running PoE Plus applications
Cross-divider	Separates pairs for exceptional cable performance
Descending length cable markings	Easy identification of remaining cable to reduce installation time and cable scrap
