Amphenol MIL-C-5015 connectors

Solution to

Amphenol MIL-C-5015 Connectors

Basic Construction

Amphenol MIL-C-5015 connectors meet the latest performance requirements of MIL-C-5015. These connectors represent well-proven electrical capability at an acceptable cost for most equipment where durability is important. MIL-C-5015 features threaded coupling & single key & keyway polarization representing maximum simplicity in design. Applications include industrial machines, military ground support equipment, ordnance & shipboard installation. Amphenol MIL-C-5015 connectors are available in classes A, B, E/F, R, and also offers a range of pre-earth connectors. Therefore, you will always find the right connector in Amphenol, with us, for conditions & performance requirements you may have.

Specification

Materials & Finish

	Materials	Finish
Shell	Aluminum alloy	Olive drab chromate coating over Zinc plating
Contact	Brass or copper alloy	Silver plate
Insulator	Plastic or Resilient Synthetic Rubber	–

Characteristics

Insulation resistance	5,000Mega ohms minimum (at 25° C)
Temperature range	–55° C to 125° C

Durability

500 Cycle connection/disconnection

Amphenol MIL-C-5015 connectors

MS/DS Series

'A' class

Wall Mounting Receptacle

Cable Connecting Receptacle

MS-A class connectors perform many of the virtual functions in powering, testing and ground support system. Class A applications include communications equipment, computers and shipboard installation where mechanical forces and physical parameters are not subject to extreme or rapid environmental changes.

Shells:

Shell components are fabricated from high grade aluminum alloy. Electrically conductive Zinc plate finish with an olive drab chromate after treatment offers corrosion resistance.

Contacts:

Pins and sockets are machined from copper alloy with silver plated finish.

Size 16 and 12 socket contacts incorporate a closed entry design.

Inserts:

Inserts are resilient synthetic rubber, offering high dielectric strength, high arc resistance arc resistance to vibration.

Proprietary design permits pressurization of either pin or socket insert.

Amphenol MIL-C-5015 connectors

MS/DS Series

'B' class

Cable Connecting Receptacle

Straight Plug

MS-B class connector is a general duty standard cylindrical connector. It is a widely used for the automotive, machine tool & welding industries, as well as numerous other commercial applications, where mechanical forces and physical parameters are not subject to extreme or rapid environmental changes. UL, approved

Shells:

Shell components are split endbell and fabricated from high grade aluminum alloy. Electrically conductive Zinc plate finish with an olive drab chromate after-treat offers corrosion resistance.

Contacts:

Pins and sockets are machined from copper alloy with silver plated finish. Size 16 and 12 socket contacts incorporate a closed entry design.

Inserts:

Inserts are plastic, offering high dielectric strength, high arc resistance arc resistance to vibration. Proprietary design permits pressurization of either pin or socket.

Amphenol MIL-C-5015 connectors

MS/DS Series

'E/F' class

Wall Mounting Receptacle

These MS connectors satisfy all the performance requirements of MIL-C-5015 and are recommended for conditions where vibration, moisture, pressure and/or temperature and extreme. Strain relief is supplied on most shell sizes.

Shells:

Shell components are fabricated from high grade aluminum alloy. The standard hardware plating is electrically conductive Zinc plated finish with an olive drab chromate after treatment for corrosion resistance. Consult Amphenol Daeshin for other plating options.

Contacts:

Cable Connecting Receptacle

Contacts are silver plated copper alloy for maximum corrosion resistance, maximum current carrying capacity and low millivolt drop. Size 16 and 12 socket contacts incorporate a closed entry design.

Inserts:

Inserts are resilient synthetic rubber, offering high dielectric strength, high arc resistance arc resistance to vibration. Proprietary design permits pressurization of either pin or socket insert.

Strain Relief Clamp:

Strain relief clamp minimizes tension at the solder well connection and provides a positive mechanical moisture seal. Complete field serviceability is possible with the strain relief clamp.

Amphenol MIL-C-5015 connectors

MS/DS Series

'R' class

Wall Mounting Receptacle

Specification requirements for greater reliability in a shorter, lighter weight environmental resistant connector led to the design of the MS-R.

This low profile assembly was attained by moving the axial compression nut and grommet assembly forward and flash with the rear of the insert. The silicon rubber grommet, with its low coefficient of friction, assures easier threading of wire bundles and quicker assembly and serviceability of the unit. Molded webs in each wire hole insure a moisture barrier around each wire.

The addition 'O'ring at the main joint of all MS3106R plugs provide a main joint seal supplementary to the interfacial seal, thus insuring of higher degree of reliability when connector halves from different sources are employed. MS-R types are recommended for new design applications.

Shells:

Shell component are fabricated from high grade aluminum alloy. All components have the standard electrically conductive zinc plated finish with an olive drab chromate after treatment for corrosion resistance. Consult Amphenol Daeshin for other plating options.

Contacts:

Contacts are machined from copper alloy for maximum current carrying capacity and low

Cable Connecting Receptacle

Box Mounting Receptacle

millivolt drop.

Inserts:

Resilient synthetic rubber insert provide an outstanding moisture barrier, maximum vibration resistance and high dielectric strength. Either pin or socket insert can be pressurized.

Amphenol MIL-C-5015 connectors

DL Series, Pre-earth type

DL Series are highly reliable circular connectors (wire soldering type) approved by TUV satisfying European safety standards and UL standards. They feature IP67 class water and dust proof, when mated and a protective earth circuit with first mate last break grounding contacts. They are ideal for use in machine tools, servomotors, robots, and other industrial machines. Intermatable with MS connector.

Shells:

Shell components are fabricated from high grade aluminum alloy. Electrically conductive Zinc

Box Mounting Receptacle

plate finish with an black chromate after treatment offers corrosion resistance. Consult Amphenol Daeshin for other plating options.

Contacts:

Pins and sockets are machined from copper alloy with silver plated finish. Size 16 and 12 socket contacts incorporate a closed entry design.

Amphenol MIL-C-5015 Connectors

Customized Products

AJ Series

AJ series connectors meet the performance criteria of most factory automation applications. They withstand exposure to moisture, oil and vibration. Bayonet lock coupling.

Material/Finish

Shell

ZnDC/O.D Zinc Chromate

Hood	Aluminum alloy/O.D Zinc Chromate
Insulator	PBT
Contact	Copper alloy/Silver
Bushing	Synthetic rubber

Characteristics

Insulation resistance	1000Mega ohms minimum (at DC500V)
Temperature range	-25℃ to 85℃
Durability	500 Cycle connection/disconnection
Voltage rating (max.)	AC 250V , DC 350V
Contact resistance	5mΩ max.

Amphenol MIL-C-5015 Connectors
Customized Products
ADG Series

ADG Bayonet coupling connectors in accordance with VG95234, well known as Amphenol ADG Bayonet connectors, are basically MIL-C-5015 type connectors. They withstand exposure to moisture, oil and vibration. Bayonet lock coupling. ADG series connectors meet the performance most subway coupler applications.

Material/Finish

Shell	Aluminum alloy/Black Anodize
Hood	Aluminum alloy/Black Anodize
Insulator	Synthetic rubber
Contact	Copper alloy/Gold
Grommet	Silicon Rubber
Bushing	Synthetic rubber

Characteristics

Insulation resistance	5000Mega ohms minimum (at DC500V)
Temperature range	-55℃ to 125℃
Durability	500 Cycle connection/disconnection
Voltage rating (max.)	AC 500V , DC 700V
Contact resistance	1.8mΩ max.
