

SynJet[®] Spotlight Cooler 38W

SynJet cooling technology provides the most reliable thermal management solution available. This LED cooler has been developed by Nuventix, for cooling tracklight, spotlight, and recessed downlight modules.

- Only 100mm diameter for small designs
- Cools up to 38W
- 100K Hours Lifetime
- Energy Efficient

Specifications¹

Thermal & Acoustic

SynJet Setting ²	Θs-a ³	TDP ⁴ (W)	SPL (dBA) ⁵
High Performance	0.80	38	28
Mid Performance	0.91	33	25
Standard Performance	0.97	31	22
PWM at 100% duty cycle	0.80	38	28

Electrical

SynJet Setting ²	Voltage (VDC) +/- 10%	Current (mA) ⁶			Pavg (mW)	Voltage (VDC) +/- 10%	Current (mA) ⁶			Pavg (mW)
		Imin	Iavg	Ipeak			Imin	Iavg	Ipeak	
High Performance	5	20	126	252	630	12	10	70	140	840
Mid Performance			87	174	435			48	97	580
Standard Performance			72	144	360			40	80	480
PWM at 100% duty cycle			126	252	630			70	140	840

Environmental

All Settings	Min	Max	Units	Conditions
Operating Temperature	-40	60	°C	Air temperature surrounding cooler
Storage Temperature	-40	85	°C	Air temperature surrounding cooler
Storage Altitude		15K	m	Above sea level
Operating Relative Humidity	5	95	%	Non-condensing
Weight		??	g	SynJet only
Reliability		100K	hrs	L10 @ 60°C
Regulatory Compliance				CE, UL, FCC Part 15 Class B, RoHS

¹ All specifications are typical at 25°C unless otherwise stated.

² The Digital Select model should be used for discrete performance settings. Follow the instructions in the Product Design Guide for adjusting settings.

³ Thermal resistance values are given as reference only and are measured in free air without airflow obstructions. Thermal resistance is measured from the bottom middle of the heat sink to ambient air measured at the inlet to the SynJet, with a heat source at least 19cm² using 31W Sport Cooler reference heat sink. Actual thermal performance may vary by application and final product design should be tested to assure proper thermal performance.

⁴ Thermal Design Power is based on a 30°C temperature rise of heat sink mounting surface above ambient temperature around cooler.

⁵ Sound Pressure Level is measured at 1 meter distance per ISO 7779.

⁶ The SynJet has a time varying current. The current waveform is sinusoidal and the average current (Iavg) is used to calculate the average power consumption (Pavg) at nominal input voltage (VDC). See the Electrical section in the Product Design Guide for a detailed explanation.

Mechanical

All dimensions are nominal and in mm unless otherwise stated. See product drawings for more detail.

SynJet Wire Harness

Connector Pinout

Pin	Symbol	Description
1	+VDC	Input voltage; 5V or 12V depending on model
2	GND	Ground
3	CTRL2	Performance input for Digital Select model Status Signal for PWM model
4	CTRL1	Performance input for Digital Select model PWM Input for PWM model

Part Numbers

Part Number	Description	Notes
SSLCS-CM005-001-D	SynJet, ZFlow 75, PWM, 5V, ILD	Use with PWM input to control performance setting
SSLCS-CM005-002-D	SynJet, ZFlow 75, Level Select, 5V, ILD	Configurable to discrete performance settings
SSLCS-CM012-001-D	SynJet, ZFlow 75, PWM, 12V, ILD	Use with PWM input to control performance setting
SSLCS-CM012-002-D	SynJet, ZFlow 75, Level Select, 12V, ILD	Configurable to discrete performance settings
HSLCS-CALBL-012	Heatsink, 38 W, Spotlight Cooler, Philips SLM	Has hole pattern for SLM
HSLCS-CALBL-015	Heatsink, 38 W, Spotlight Cooler, Osram PrevaLED	Has hole pattern for PrevaLED
HSLCS-CALBL-011	Heatsink, 38 W, Spotlight Cooler, Configurable	LED mounting surface is free of holes
WALLS-C4150-001	SynJet Wire Harness, 4 wire, 150 mm length	
WALLS-C4600-001	SynJet Wire Harness, 4 wire, 600 mm length
