

No.200 Series (Synthetic Rubber Wheel) Revolving Caster

Characteristic

It is a caster with which installation is as easy as inserting it into the pipe and rotating the washer.

Application

Showcases / Wagons, etc.

Installation Instruction

Expand the rubber about the size of inner diameter of a pipe to be inserted.

Then insert it into the pipe until the end of pipe reaches to hexagon washer, and tighten the washer makes the rubber expand to fit the caster with the pipe.

Loosening the washer makes the caster release from the pipe.

How To Order

Without stopper : No.203 (16)

With stopper : No.203 S (16)

Shaft diameter
(d size)

Specification Caster with stopper is recognized as letter S at the end of the model No.
