

AMERICAN ZETTLER

Part Number: ST9721-U2
Sealed Automotive Relay Socket

This automotive relay socket is designed to fit the AZ973 shrouded relay, which includes the relay gasket and uses push to seat terminations. Wire seals are also available and sold separately. One socket and 2 sizes of wire seals will meet all your needs. All components are U.L. recognized materials with excellent chemical and flame resistance. This design is not only cost effective but also labor saving to make it the best value on the market.

Socket Description: Push to seat sealed socket assembly

Features/Benefits: 5- way socket easily converts to 4-way
U.L recognized materials
Universal fit for most sealed terminals
