

Ohmite's Little Demons are small, reliable carbon composition resistors with exceptional strength. They are made tough by a molding process that combines the terminals, insulation and resistive element into an integrated unit. Along with their small size, Little Demons perform with low noise, dissipate heat rapidly and offer high temperature stability.

Color codes are readable even after prolonged use thanks to a very durable coating that resists abrasions and chipping normally associated with automatic insertion equipment.

FEATURES

- Molded insulation for high dielectric strength.
- Rugged construction.
- High surge capabilities.
- Comparable to "Mil" RC07, RC20, and RC32 types.

SPECIFICATIONS

Material

Terminals: Solder-coated copper terminal.

Body: Molded Phenolic
