HOW TO USE CAPACITORS FOR MULTI-SPEED BLOWERS
It is possible to make any ebm blower with a PSC motor a multi-speed blower by adding a second or third capacitor on the load line (blue) at or near the value of the motor run capacitor. Actual capacitor value and RPM achieved are dependent on the nature of each application.

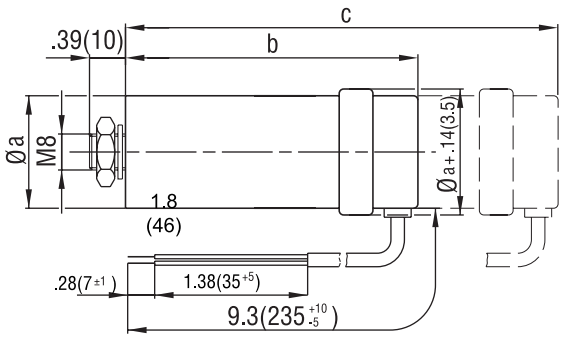
Note: These capacitors may be supplied per the listing under "METAL CAPACITORS with METAL LID".



- Overpressure disconnector: The protector responds to overload by the generated overpressure expanding the housing and snapping off the internal lead at a predetermined breaking point

- Installation: "c" is the overall dimension after operation of overpressure disconnector which has to be taken into account when mounting the part
