Features

- Metal hoods/housings for industrial applications
- Locking levers: Han-Easy Lock®
- **Field of application:** for excellent mechanical and electrical protection in demanding environments, for example, in the automobile and mechanical engineering industries also for process and regulation control applications
- **Distinguishing feature:** hoods/housings colour-coded grey (RAL 7037)

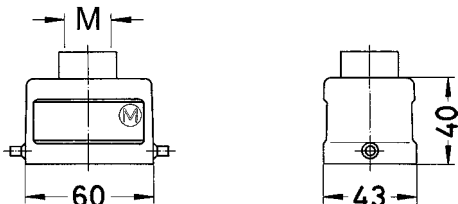

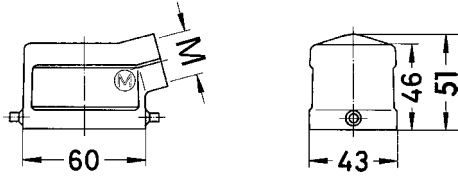

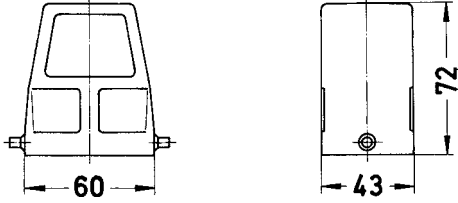

Technical characteristics

## Features

- Angled housing replaces the terminal box
- Compact design saves space
- The position of the terminal housing can be switched by 90°
- Compatible with standard hoods for single lever size 10 B
- Locking levers: Han-Easy Lock®
- Star and delta circuits can be realized in the female connector Han® ESS
- Suitable for standard inserts

## Features

- Hoods/Housings for higher environmental requirements

## Technical characteristics

|                                            |                                                                 |
|--------------------------------------------|-----------------------------------------------------------------|
| Limiting temperatures                      | -40 °C ... 125 °C                                               |
| Flammability (locking lever) acc. to UL 94 | V 0                                                             |
| Protection class acc. to UL 50             | NEMA type 4/4X/12                                               |
| Degree of protection acc. to IEC 60529     | IP65                                                            |
| Corrosion resistance                       | ASTM B117-09 (500 h)                                            |
| Material (hoods/housings)                  | aluminium                                                       |
| Surface (hoods/housings)                   | powder-coated                                                   |
| Colour (hoods/housings)                    | RAL 9005 (black)                                                |
| Material (locking lever)                   | stainless steel, polycarbonate, polycarbonate + stainless steel |
| Material (seal)                            | FPM                                                             |

## Features

- Hoods/Housings for higher EMC requirements
- Excellent shield transitions and a low transfer impedance
- **Field of application:** For sensitive interconnections that have to be shielded against electrical, magnetic or electro-magnetic interferences
- Distinguishing feature: Electrically conductive surface, internal seal

## Features

- Hoods/Housings for higher EMC requirements
- Excellent shield transitions and a low transfer impedance
- **Field of application:** For sensitive interconnections that have to be shielded against electrical, magnetic or electro-magnetic interferences
- Distinguishing feature: Electrically conductive surface, internal seal

## Features

- Hoods/Housings for harsh environmental requirements
- Highly EMC resistant
- Screw locking M4
- Field of application: For external electrical interconnections in vehicles, in highly demanding environments and wet areas, as well as for sensitive interconnections that have to be shielded
- Distinguishing feature: colour-coded black, internal seal (RAL 9005)

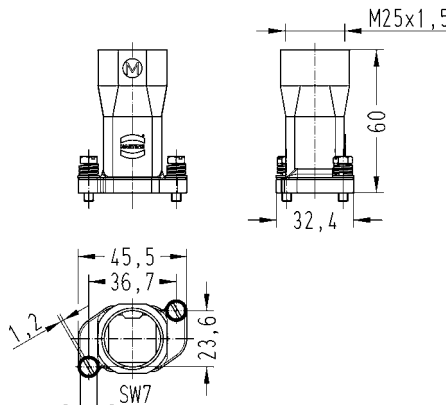

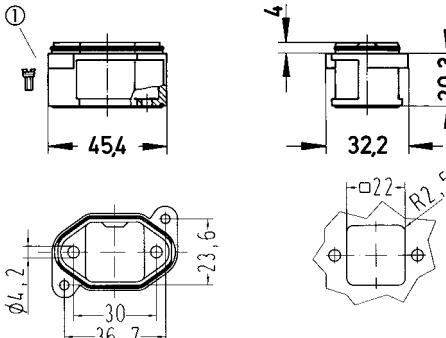

## Technical characteristics

## Features

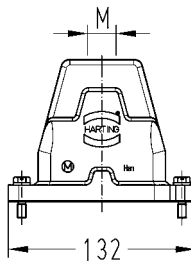

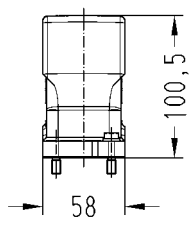

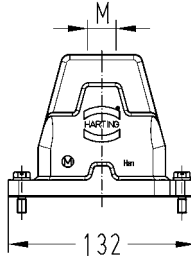

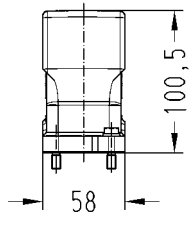

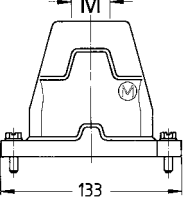

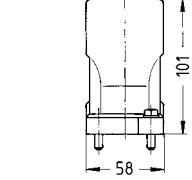

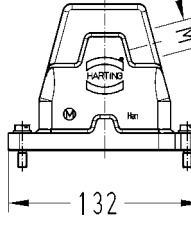

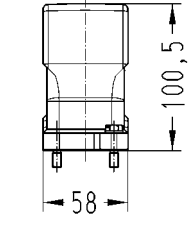

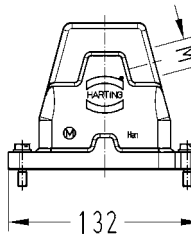

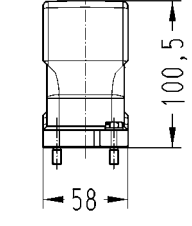

- Hoods/Housings, pressure tight
- Highly EMC resistant
- Screw locking M6
- Field of application: For external electrical interconnections in vehicles, in highly demanding environments and wet areas, as well as for sensitive interconnections that have to be shielded
- Distinguishing feature: colour-coded black, internal seal (RAL 9005)

## Technical characteristics

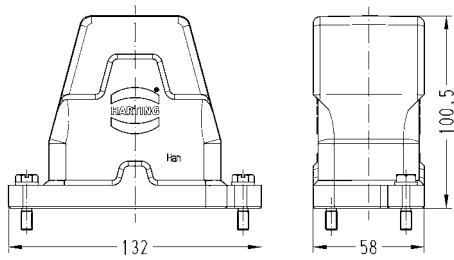

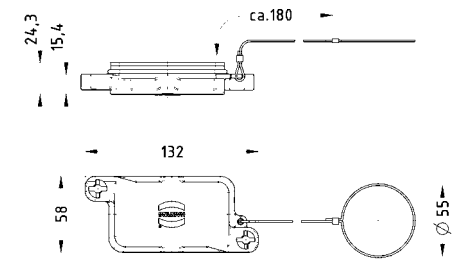

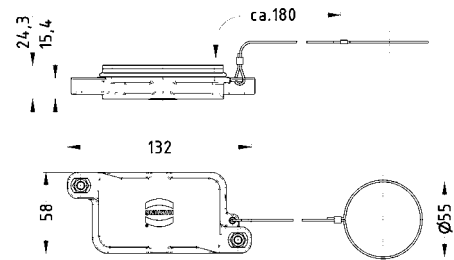

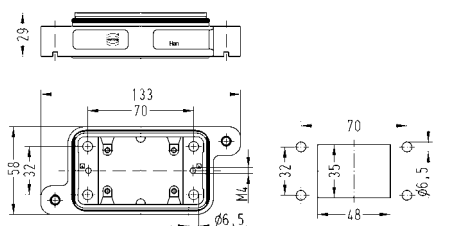

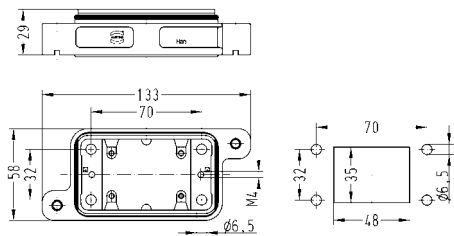

|                                        |                                         |
|----------------------------------------|-----------------------------------------|
| Limiting temperatures                  | -40 °C ... 125 °C                       |
| Protection class acc. to UL 50         | NEMA 4/12                               |
| Degree of protection acc. to IEC 60529 | IP69K                                   |
| Degree of protection acc. to IEC 60529 | IP65 / IP68                             |
| Tightening torque (locking)            | 4 Nm                                    |
| Corrosion resistance                   | ASTM B117-09 (500 h)                    |
| Material (hoods/housings)              | aluminium die-cast, corrosion resistant |
| Surface (hoods/housings)               | powder-coated                           |
| Colour (hoods/housings)                | RAL 9005 (black)                        |
| Material (locking lever)               | stainless steel                         |
| Material (seal)                        | NBR                                     |
| Material (screwing)                    | stainless steel                         |
