

Guarantee Letter Of RoHS Compliance

Dear Customers,

Thank you for your continuous support to Hongfa! Through the mutual efforts made by Hongfa customers, Hongfa suppliers and Hongfa in meeting the requirements of EU RoHS Directive (2011/65/EU) while maintaining the products functionalities, we are glad to announce that all Hongfa relays are RoHS compliant.

We guarantee that all Hongfa relays and the packing materials supplied to our customers do NOT CONTAIN the chemical materials as stated in below Table 1 and 2. The judgment of CONTAIN or NOT CONTAIN is decided by the Maximum Value (PPM) according to the standards of TAC (Technical Advisory Committee).

Table 1 for Relays

Types of Hazardous Substance	Maximum Value (PPM)
Pb (Lead)	1000ppm
Hg (Mercury)	1000ppm
Cr6 ⁺ (Chromium VI)	1000ppm
PBBs	1000ppm
PBDEs	1000ppm(Please refer to Note 1)
Cd (Cadmium)	100ppm (Cadmium contact is excluded; Please refer to Note 2)

Table 2 for Packing Materials

Types of Hazardous Substance	Maximum Value (PPM)
Pb+Hg+Cd+Cr6 ⁺	100ppm

Note:

- 1. According to EU 2005/717/EC, Article 9a under Item 2, DecaBDE will not be exempted from July 1, 2008. Sum of PBDEs (Mono to Deca) in all our relays will be under strict control according to EU RoHS Directive.
- 2. According to the EU Decision on Oct. 21 2005 (2005/747/EC), the relay contact containing Cadmium is exempted from the prohibition of RoHS Directive. During the period of such exemption, the contact material containing Cadmium is not restricted by RoHS. In other words, AgCdO contact is also RoHS compliant.

Hongfa mark the “RoHS” on the package label of product to export , and according to Chinese RoHS requirement add the mark (see pic. 1 and pic.2) on the package label of product for domestic market.
