

## SCC ADVANTAGES

### SUMMARY

- MULTIPLE CLOCK SPEEDS
- MULTIPLE PACKAGES
- MULTIPLE PROTOCOLS

### TARGET APPLICATIONS

- COMPUTER PERIPHERALS
- INTER-NETWORKING EQUIPMENT
- CENTRAL OFFICE EQUIPMENT
- ROUTERS
- DATA ACQUISITION
- INDUSTRIAL COMMUNICATIONS CONTROL

## Zilog Serial Communication Controller Product Family

Dual channel, multiprotocol data communication peripheral solutions

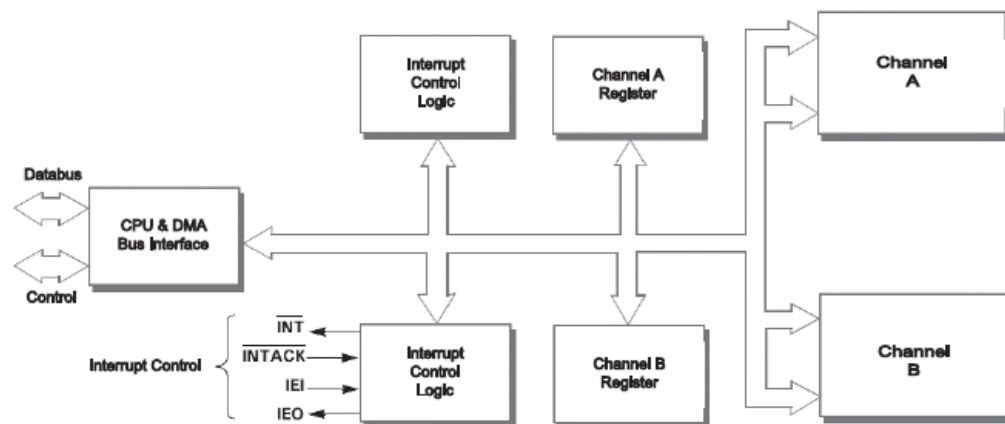

### Overview

The Zilog Serial Communication Controllers (SCC) can support dual channel and multiple protocols that easily interface to 8/16-bit addressable non-multiplexed address/data buses. The SCC can be configured to satisfy a wide variety of serial communications applications. On-chip features include baud rate generators, digital PLLs, and crystal oscillators to reduce external logic. Additional features may include optimized FIFOs to support high speed SDLC transfers using DMS controllers.

The SCC handles asynchronous formats, synchronous byte-oriented protocols and synchronous bit-oriented protocols. The SCC can generate and check CRC codes in any synchronous mode and can be programmed to check data integrity in various modes. The SCC also has facilities for modern controls in both channels. In applications where these controls are not needed, the modern controls can be used for general-purpose I/O.

Zilog SCCs are designed for use in multiple applications for your serial communication needs.

### Basic SCC Block Diagram

## KEY FEATURES

- FULL FEATURE CHANNELS
- ENCODING SUPPORTED
- PROTOCOLS SUPPORTED

## SCC Detailed Feature Set

- Full Duplex Channels
  - Up to 4.1 Mbit/sec
  - Separate Crystal Oscillator
  - Baud Rate Generator
  - Digital Phase-Locked Loop for Clock Recovery
- Encoding Supported
  - NRZ
  - NRZI
  - Manchester
  - FM Data Encoding
- Protocols Supported
  - SDLC/HDLC
  - T1 Digital Trunk
- Clock Speeds: 8, 10, 16 and 20 MHz available
- Synchronous Mode CRC Generation and Checking (CRC-16 or CRC-CCITT)
- Local Loopback and Auto Echo Modes
- Enhanced DMA Support
- Some original NMOS SCC products are still offered; please refer to our website at [www.Zilog.com](http://www.Zilog.com) for further product details.

## Enhanced Serial Communications Controller (ESCC)

- All of the SCC features as above, plus:
- Improvements that reduce CPU overhead
- Deeper FIFO's: 4-byte transmit, and 8-byte receive FIFO
- SDLC packet handling improvements
- Low voltage version (3.0 to 3.6V) available

## Universal Serial Controller (USC) Z16C30

- Two independent, 0 to 10Mbps, full-duplex channels
- 2 BRGs and 1 DPLL per channel
- 32-byte data FIFO's for each receiver and transmitter
- DMA interface with separate request and acknowledge
- Same protocols supported as noted in the SCC feature set

## Integrated Universal Serial Controller (IUSC) Z16C32

- Single full-duplex, 0 to 20 Mbps channel
- 2 BRG and 1 DPLL
- 2 full-capacity 20MHz DMA channels, each with 32-bit addressing and 16-bit data transfers
- 32-byte data FIFO's for each receiver and transmitter
- Same protocols supported as noted in the SCC feature set

## Ordering Information

Order the SCCs from your local Zilog sales representative by using the part numbers below. For more information, or to download product collateral, please visit us at [www.zilog.com](http://www.zilog.com).

### ORDERING NOTES

- **FOR TEMPERATURE RANGES:**
  - STANDARD (STD) = 0 °C TO 70 °C
  - EXTENDED (EXT) = 40 °C TO 100 °C

Part Number	Speed (MHz)	Addressable Bus Size	Full Duplex Channels	Tx FIFO (Bytes)	Rx FIFO (Bytes)	Temperature Range	Pin & Package
Z16C3010AEG	10	16-Bit	2	32	32	Std/Ext	100-Pin LQFP

**Warning: DO NOT USE IN LIFE SUPPORT**

### LIFE SUPPORT POLICY

ZILOG'S PRODUCTS ARE NOT AUTHORIZED FOR USE AS CRITICAL COMPONENTS IN LIFE SUPPORT DEVICES OR SYSTEMS WITHOUT THE EXPRESS PRIOR WRITTEN APPROVAL OF THE PRESIDENT AND GENERAL COUNSEL OF ZILOG CORPORATION.

### As used herein

Life support devices or systems are devices which (a) are intended for surgical implant into the body, or (b) support or sustain life and whose failure to perform when properly used in accordance with instructions for use provided in the labeling can be reasonably expected to result in a significant injury to the user. A critical component is any component in a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system or to affect its safety or effectiveness.
