

Series 51

Versatile. Attractive and compact.

<https://eao.com/>

51 Information about the Series

Key advantages

- Compact construction
- Various configuration options
- Reliable and proven
- Timeless and modern design
- Raised or flush mounting
- Low back panel depth (Stop Switch)

Typical application areas

- Food and beverages
- Special vehicles
- Buildings services and automation
- Public transportation
- Medical engineering

Functions

- Pushbutton
- Illuminated pushbutton
- Mushroom-head pushbutton
- Selector switch
- Keylock switch
- Indicator
- Stop switch

Design

- Flush
- Raised

IP front protection

- IP65

Raitings

- 42 VAC (100 mA)
- ≤250 VAC (5 A)

Mounting cut-outs

- Ø 16.2 mm
- Ø 22.3 mm
- 21.2 mm x 21.2 mm
- 21.2 mm x 27.2 mm

Terminal

- Soldering terminal
- Plug-in terminal
- Soldering/plug-in terminal
- PCB (with PCB plug-in base)

Lens Material

- Aluminium
- Plastic

Markings

- Engraving
- Laser marking
- Hot stamping
- Film insert/marketing plate
- Pad printing
- Screen print

Approvals

- CB (IEC 61058)
- CSA
- CQC
- ENEC (EN 61058)
- DNV GL (vormals Germanischer Lloyd)
- UL
- VDE
- EAC

Conformities

- CE
- UKCA
- 2014/30/EU (EMC)
- 2014/35/EU (LVD)
- 2011/65/EU (RoHS)
- 2006/42/EU (MD)

Flush design

Pushbutton round	574
Illuminated pushbutton square	577
Illuminated pushbutton rectangular	580
Illuminated pushbutton round	583
Selector switch 2 positions square	586
Selector switch 2 positions round	589
Keylock switch 2 positions square	592
Keylock switch 2 positions rectangular	595
Keylock switch 2 positions round	598
Keylock switch 3 positions square	601
Keylock switch 3 positions rectangular	603
Keylock switch 3 positions round	605
Indicator square	607
Indicator rectangular	609
Indicator round	611

Raised design

Illuminated pushbutton square	613
Illuminated pushbutton rectangular	616
Illuminated pushbutton round	619
Mushroom-head pushbutton	622
Selector switch 2 positions, round	624
Selector switch 3 positions, round	628
Keylock switch 2 positions square	630
Keylock switch 2 positions rectangular	633
Keylock switch 2 positions round	636
Keylock switch 3 positions square	639
Keylock switch 3 positions rectangular	641
Keylock switch 3 positions round	643
Indicator square	645
Indicator rectangular	647
Indicator round	649
Stop switch	651

Green Touch.
 Offering sustainability.
EAO creates possibilities. Since 1947.

As a successful company with production sites around the world, EAO is actively committed to the effective implementation of a sustainable environmental policy.

We act responsibly. In our environmental focus, we set benchmarks for ourselves, our products and our customers. Throughout our entire value chain, we think and work in a way that is resource-efficient and environmentally-friendly. When selecting our components and raw materials, we ensure that we have partnerships in place with certified manufacturers and that we adhere to EC guidelines on hazardous materials (RoHS).

Your Expert Partner for Human Machine Interfaces

51 Raised design

Mushroom-head pushbutton, IP65

Product can differ from the current configuration.

Dimensions [mm]
A = Solder terminal
B = Plug-in terminal 2.8 mm x 0.5 mm
C = Universal terminal 2.0 mm x 0.5 mm

Equipment consisting of (schematic overview)

Each Part Number listed below includes all the black components shown in the 3D-drawing.

General information

- If the anti-twist ring is not used the panel thickness increases to 4 mm

Mounting cut-outs [mm]

Actuator, Front dimension Ø 24,5 mm

Contacts	Terminal	Lens colour	Switching system	Part No.	Wiring diagram
2 NC	Universal terminal	Red	Low-level element	51-152.0262	243
	Universal terminal	Yellow	Low-level element	51-152.0264	243
1 NC / 1 NO	Plug-in terminal	Red	Snap-action switching element	51-153.0222	247
	Plug-in terminal	Yellow	Snap-action switching element	51-153.0224	247
	Universal terminal	Blue	Low-level element	51-153.0266	406
	Soldering terminal	Red	Snap-action switching element	51-156.0252	247
	Soldering terminal	Yellow	Snap-action switching element	51-156.0254	247
	Soldering terminal	Blue	Snap-action switching element	51-156.0256	247
1 NC	Universal terminal	Red	Low-level element	51-156.0262	247
2 NC / 2 NO	Soldering terminal	Red	Snap-action switching element	51-159.0252	251
	Soldering terminal	Yellow	Snap-action switching element	51-159.0254	251

Contacts: NC = Normally closed, NO = Normally open

Additional information

- Due to high surface temperatures, the series resistor must not be soldered directly to the terminals of the equipment (use a terminal plate)
- When using AC/DC types with AC operation, slight flickering can occur
- The luminous intensity stated is for when used with DC
- Electrical and optical data are measured at 25 °C
- The specified versions are built with a protection diode (half wave rectifier) in series and the LED
- Luminosity and wave length variations caused by LED manufacturing processes may cause slight differences regarding the illumination. The customer has to decide what resistor shall be used to the LED
- Where supply voltages are over 48 V, a voltage-reduction element (external protective series resistor) must be used.

51 Technical data

Actuator with low-level switching element

Switching system

This low-level switching element was designed for switching low powers in electronic circuits. The mechanism assures reliable switching of loads ranging from a few $\mu\text{A}/\mu\text{V}$ up to 100 mA/ 42 VAC/ DC.

Single-break momentary contact, as normally open or normally closed with 4 independent points of contact. 2 momentary contacts per switching element; combination of normally open and normally closed is possible.

Special features are the long life, extremely short rebound time and stable contact resistance.

Material

Material of contact
Gold plated

Switch housing
Plastic, heat-resistant and self-extinguishing

Actuator housing
Plastic, self-extinguishing

Mechanical characteristics

Terminals
The universal terminals permit these units to be mounted on printed circuit boards (PCB). These terminals can also be used as soldering or plug-in terminals.

For these terminals we can also supply a plug-in base which, when soldered on to the board, enables the switch to be plugged in.

Soldering terminal
Max. wire diameter 2 wires à 1 mm
Max. wire cross-section of stranded cable 2 x 0.75 mm²

Plug-in terminal 2.0 mm x 0.5 mm

Tightening torque
For fixing nut max. 0.5 Nm

Actuating torque
2.5 Ncm ... 5.5 Ncm, measured at the key or lever of the keylock- or selector switch

Actuating force
1.8 N ... 3.5 N

Actuating travel

Illuminated pushbutton 3 mm
Keylock-/selector switch actuator 2 positions
1 x ca. 42° deflection momentary action
1 x ca. 90° deflection maintained action

Mechanical lifetime

Momentary action	5 million cycles of operation
Maintained action	1 million cycles of operation
Keylock switch	50 000 cycles of operation

Electrical characteristics

Electrostatic breakdown value
≤ 15 KV (Keylock switch)

Switching voltage and switching current
100 mA at 42 VAC/VDC

Electric strength
2500 VAC, 50 Hz, 1 minute between all terminals and earth, as per IEC 61058-1, part 15

Ambient conditions

Storage temperature
-40 °C ... +85 °C

Operating temperature
-25 °C ... +55 °C
For indicators and illuminated pushbuttons mounted as a block, make sure the heat can escape freely.

Protection degree
IP65 front side, as per DIN/EN 60529

Shock resistance
(Single impacts, semi-sinusoidal)
15 g for 11 ms, as per DIN/EN 60512-4-3, DIN/EN 60068-2-27

Actuator with snap-action switching element

Switching system

Self-cleaning, double-break snap action switching system (with contact gap 2 x 0.5 mm).

1 normally closed and 1 normally open contact per element.

Snap-action switching elements with soldering terminals at the sides: up to 4 switching element can be on a pushbutton (max. 4 normally closed and 4 normally open contacts).

Snap-action switching element with axial plug-in terminals 2.8 mm is not stackable, only 1 switching element can be on a pushbutton.

Material

Material of contact

Gold plated silver

Switch housing

Axial soldering-/plug-in terminal 2.8 mm
Plastic, heat-resistant and self-extinguishing.

Soldering terminal: Plastic

Actuator housing

Plastic, self-extinguishing

Mechanical characteristics

Terminals

General notes

1. Engraving

In addition to the most commonly used world languages, in DIN1451-3 close spacing, other typefaces are available as Scandinavian, Slavic, Greek, Russian and Polish. Red, blue and black lenses are filled with white colour. Other colour lenses are filled in black. Standard height of letters is 2 mm. If the height is not specified, we will supply 2 mm engraved letters.

2. Hot stamping

For larger series it is worth considering markings by means of hot stamping. We will pleased to advise you. For letters and figures, typefaces with 2.5 mm, 3 mm and 4 mm are available.

3. Film inserts

Instead of using engraving the lenses can be fitted with transparent film inserts, as an alternative. For this purpose, though, it is advisable to use transparent lenses. In the case of use of a smoke-black lens the fitted film becomes readable only if the lamp is on. The film thickness is 0.2 mm.

Important: Consider pushbutton mounting orientation before specifying engraving characters!

Suppressor circuits

When switching inductive loads such as relays, DC motors, and DC solenoids, it is always important to absorb surges (e.g. with a diode) to protect the contacts. When these inductive loads are switched off, a counter emf can severely damage switch contacts and greatly shorten lifetime.

Fig. 1 shows an inductive load with a free-wheeling diode connected in parallel. This free-wheeling diode provides a path for the inductor current to flow when the current is interrupted by the switch. Without this free-wheeling diode, the voltage across the coil will be limited only by dielectric breakdown voltages of the circuit or parasitic elements of the coil. This voltage can be kilo-

volts in amplitude even when nominal circuit voltages are low (e.g. 12VDC) see Fig. 2.

The free-wheeling diode should be chosen so that the reverse breakdown voltage is greater than the voltage driving the inductive load. The DC blocking voltage (VR) of the free-wheeling diode can be found in the datasheet of a diode. The forward current should be equal or greater than the maximum current flowing through the load.

To get an efficient protection, the free-wheeling diode must be connected as close as possible to the inductive load!
