

E 9F PV cylindrical fuses for photovoltaic plants

The new cylindrical fuses range E 9F PV is meant to protect against overcurrents in photovoltaic plants up to 1000 V in direct current.

Thanks to the wide sizes range, (from 1A up to 30A), and to the high nominal voltage: 1000V D.C. E 9F PV it's the best way to protect strings, inverters and OVR surge protections.
