

PERFORMANCE CONNECTORS

FOR LIQUID TIGHT STRAIN-RELIEF
OF CORD, CABLE &
FLEXIBLE CONDUIT

by **PYLE-NATIONAL**

Bulletin LT-300

PYLE-NATIONAL CONNECTORS

Pyle-National connectors make sure your cord or cable stays in and everything else stays out. Use them as part of a sealed environment, where moving parts, or handling can abuse connections.

FEATURES & BENEFITS

Tapered rubber grommet and seat

Secure cord the *entire length* of grommet making a liquid-tight seal.

Variety of styles: straight, 45°, 90°, and flexible

Assures ease of installation and permits custom cable routing.

Various strain relief options:

Standard compression nut, mechanical clamp nut or basket weave styles.

Tapered conduit threads

Provide strong water and oil-tight joint.

Machined components

Strong, lightweight, and have long service life.

Male and female threads

Provides versatility in panelboard or threaded hub applications.

APPLICATIONS

FOR POWER/CONTROL:

- Switchboards
- Machine Tools
- Heating and Cooling
- Lighting and Ballasts
- Portable Equipment
- Motors and Generators
- Production Machinery
- Processing Equipment
- Robotics and Welding
- Standby Power
- Medical/Dental Equipment.

FOR COMMUNICATION:

- Radio and Radar
- Television
- Transformers
- Data Processing
- Instruments.

FOR TRANSPORTATION:

- Shipyards
- Refrigerated Containers
- Railroad and Trucking.

MATERIALS & FINISHES (NATURAL UNLESS OTHERWISE NOTED)

Straight Bodies
45° & 90° Bodies
Grommets
Washers
Compression Nuts
Mechanical Nuts
Woven Grip
Flared Nipple

Copper-free aluminum bar stock
Cadmium plated ferrous alloy
Oil-resistant synthetic rubber
Cadmium plated cold rolled steel
Copper-free aluminum bar stock
Cast aluminum
Woven stainless steel
Copper-free aluminum bar stock

HELPFUL INFORMATION

ALLOWABLE AMPACITIES OF INSULATED CONDUCTORS

as taken from 1987 Edition of National Electric Code.

Rated 0-2000 Volts, 60° to 90° C - Not More Than Three Conductors in Raceway or Cable or Earth (Directly Buried). Based on Ambient Temperature of 30° C (86° F).

Size	Temperature Rating of Conductors (Copper)			
	60° C (140° F)	75° C (167° F)	85° C (185° F)	90° C (194° F)

NOTE: These are approximate currents to be used for selecting cord wire sizes.

This catalog will introduce you to a line of cord and cable connectors that is as flexible as the cord and cable you install.

Specifying complete assemblies or component parts is made easy by showing almost every possible combination you may need. If you need assistance, do not hesitate to call on your Pyle-National distributor, or factory representative.

STRAIN-RELIEF CONNECTORS FOR FLEXIBLE CORD & CABLE

SMALL STRAIGHT BODY, MALE THREAD

ALUMINUM BODY AND COMPRESSION NUT WITH WASHER AND SINGLE HOLE OIL-RESISTANT GROMMET

This small body connector is ideal for internal uses, as well as conduit hub and panel-board mounting into threaded bodies or with locknuts. Complete units listed require no other parts except cable. Component parts allow expansion or updating of present equipment.

Suitable for use in hazardous locations per National Electric Code Class I, Div. 2; Class II, Div. 1 & 2; Class III, Div. 1 & 2.

INSULATED THROAT OPTION:

Add suffix "T" to all complete assembly part numbers on this page. E.g.: DB-9916T.

STRAIN-RELIEF CONNECTORS FOR FLEXIBLE CORD & CABLE

LARGE STRAIGHT BODY, MALE THREAD

ALUMINUM BODY AND COMPRESSION NUT WITH WASHER AND SINGLE HOLE OIL-RESISTANT GROMMET

Large body DBZ connectors can be employed in retrofit or new installations. Versatility allows use in panelboards and in threaded hubs. Component parts are available separately.

Suitable for use in hazardous locations per National Electric Code Class I, Div. 2; Class II, Div. 1 & 2; Class III, Div. 1 & 2.

DBL/DBZL GROUP

STRAIN-RELIEF CONNECTORS FOR FLEXIBLE CORD & CABLE

90° ELBOW BODY, MALE THREAD

FERROUS ALLOY BODY, ALUMINUM COMPRESSION NUT WITH WASHER AND SINGLE HOLE OIL-RESISTANT GROMMET

These 90° connectors allow the installation of cord and cable even in tight quarters. Rugged ferrous alloy body and aluminum compression nut assure long life in abusive situations.

Suitable for use in hazardous locations per National Electric Code Class I, Div. 2; Class II, Div. 1 & 2; Class III, Div. 1 & 2.

INSULATED THROAT OPTION:

Add suffix "T" to complete assembly part numbers for 1/2"-1" only. E.g.: DBL-3514-MT.

CORD GRIP HANDLES

FOR USE WITH
QUELARC®, STAR-LINE®,
NEPLOC® AND OTHER
ELECTRICAL DEVICES
THAT ARE TAPPED FOR
CONDUIT AND USE
FLEXIBLE CORD OR
CABLE.

These handles not only
fit electrical connectors, but
will also work well on heavy
duty portable equipment.

Both D and T Handles
are made of cast aluminum
and come complete with a
locknut on male thread "A."
Hub "B" accepts type DB
cord grips with male thread
(not included).

Serves also as a conven-
ient means for hanging your
plugs, receptacles or portable
equipment.

*FLARED NIPPLE

Used for mounting type DBF connectors on sheet metal boxes and cabinets, and for drop cords/cables from overhead power distribution ducts.

*Flared Nipple not included unless specially ordered. To include flared nipple with assembly change catalog numbers as follows:

- with compression nut, change DBF to DHF.
- with mechanical nut, change DBF to DBH.
- with weave grip, change DBKF to DBKH.

GROMMETS

FOR DB/DBZ SERIES CONNECTORS

MOLDED OIL-RESISTANT SYNTHETIC RUBBER

These tapered grommets fit in the tapered bodies of all appropriate DB Series metallic connectors. They provide strain-relief by gripping the cord jacket inside the grommet, and efficiently seal out water and oil from internal connections.

Pyle-National rubber grommets are specially compounded and molded to resist age-hardening, adding many more years to the life of installations.

HK SERIES

LIQUID-TIGHT MECHANICAL CONNECTOR FOR FLEXIBLE NON-METALLIC CONDUIT

HK fittings have been engineered to provide a superior mechanical connection and an oil and water-tight seal for flexible non-metallic conduit. They incorporate a gripping principle that, over the years, has proven itself in railway intercar connection—an application which experiences continuous motion, extreme vibration and severe environmental conditions.

Use the HK where mechanical strength and proven reliability in a liquid-tight installation is needed.

FEATURES & BENEFITS

Rugged construction and simple design

Allows ease of quick and permanent field assembly

Inbedded O-Ring

Assures complete protection from oil, grease, water and dust.

Extremely strong gripping action

Holds secure against severe strain.

Insulated throat

Prevents damage to conductors.

APPLICATIONS

- Moveable Head Machine Tools
- Transfer Lines
- Processing Machinery
- Bottling Machinery
- Packaging Machinery
- Railroad Equipment
- Construction and Maintenance Equipment

All units shipped assembled complete with locknut, insulated throat and imbedded O-ring.

MATERIALS & FINISHES

STRAIGHT BODY	Cadmium plated steel
90° ELBOW	Cadmium plated cast ferrous alloy
GLAND NUT	Cadmium plated steel
SEALING GLAND	Polyethylene
O-RING	BUNA-N, 70 durometer
INSULATING THROAT	Polypropylene
LOCKNUT	Cadmium plated steel
