

## Features

### Regulated Converters

- 2:1 and 3:1 Wide Input Voltage Ranges
- 1kVDC, 2kVDC and 3kVDC Isolation
- UL94V-0 Package Material
- Continuous Short Circuit Protection
- Low Ripple and Noise
- Remote On/Off Control
- Efficiency to 83 %

#### Description

Very high power density, 2:1 or 3:1 input voltage range and a wide operating temperature range -40°C to +71°C and extra features such as On/Off control are just some of the characteristics of this converter which is ideal for highly sophisticated industrial designs. The RS3 is available with 2kV or 3kV isolation options (1kVDC is standard)

#### Selection Guide

| Part Number |         | Input Voltage Range (VDC)   | Rated Output Voltage (VDC) | Output Current Full Load (mA) | Efficiency typ. (%) | Max Capacitive Load <sup>(1)</sup> |

No suffix is standard isolation (1kVDC) e.g., RS3-0505S

\*add suffix /H2 or /H3 for 2kVDC or 3kVDC isolation, e.g., RS3-0505S/H2, R3S-0505DZ/H3

Note: To protect the converter under all fault conditions, an input fuse is required. Quick-blow fuses should be rated at 2x-3x the normal input current, time-delay fuses at 1.5x the normal input current.

**Typical Application**

\*\*Any data referred to in this datasheet are of indicative nature and based on our practical experience only. For further details, please refer to our Application Notes.

**Notes**

|         |                                                                                                                                                                                                                       |
|---------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Note 1: | Maximum capacitive load is defined as the capacitive load that will allow start up in under 1 second without damage to the converter                                                                                  |
| Note 2: | The RS3 series requires a minimum of 10% load on the output to maintain specified regulation. Operating under no-load conditions will not damage these devices; however, they may not meet all listed specifications. |

## Typical Characteristics

### RS3-0505S

### RS3-4805D

## Package Style and Pinning (mm)

### Recommended Footprint Details

### Pin Connections

| Pin # | Single | Dual  |
|-------|--------|-------|
| 1     | -Vin   | -Vin  |
| 2     | +Vin   | +Vin  |
| 3     | CTRL   | CTRL  |
| 5     | NC     | NC    |
| 6     | +Vout  | +Vout |
| 7     | -Vout  | Com   |
| 8     | NC     | -Vout |

NC = No Connection

**Pin 8 (NC\*)** This pin is used internally and must have no external connection.

**Pin 5 (NC)** Not connected internally.

### Pin 3 (CTRL)

This pin provides an Off function which puts the converter into a low power mode. When the pin is 'high' the converter is OFF and when the pin is high 'Z' the converter is ON. There is no allowed low state for this pin.

## Application Examples

### ON/OFF CONTROL

**I** = 3V  
**0** = 0.5V or GND

Remote ON/OFF

ON: open or high impedance  
OFF: external 5~12 Vdc and 1N4148+ 68Ω resistor
