The technical drawing shows two views of a rectangular PCB layout. The top view is a plan view with overall dimensions of 190 mm by 38 mm. It features a central horizontal track with a width of 157 mm and a distance of 22 mm from the right edge. There are three M3 mounting holes along the top edge, with a center-to-center distance of 18 mm and a distance of 9.5 mm from the left edge. A 3.5 mm wide feature is located at the top left. The bottom view is a side view with overall dimensions of 120 mm by 98 mm. It shows a vertical stack of components on the right side, numbered 1 through 7. The total height of this stack is 68.18 mm, with individual component heights of 8.025 mm and 9.525 mm. The distance from the bottom edge to the top of the stack is 80 mm. There are four M3 mounting holes along the bottom edge, with a center-to-center distance of 18 mm and a distance of 9.5 mm from the left edge. A 3.5 mm wide feature is located at the bottom left. The drawing includes various dimension lines, center lines, and component symbols.

Figure 10 consists of two graphs. The left graph shows Load (%) on the y-axis (0 to 100) versus Ambient Temperature (°C) on the x-axis (-25 to 70). The load is constant at 100% from -25°C to 40°C, then decreases linearly to approximately 45% at 70°C. A dashed vertical line at 40°C is labeled '3.3V, 5V'. The area under the curve is shaded light blue. The right graph shows Load (%) on the y-axis (40 to 100) versus Input Voltage (VAC) 60Hz on the x-axis (88 to 132). The load is constant at 100% from 88V to 132V, then drops sharply to approximately 40% at 132V. The ambient temperature is noted as T_a = 25°C.
