Attachment kits

Change-over switches, as well as 6- and 8-pole switches can be built up by adding a compact snap-on kit on the top of two base and DIN-rail mounted switch-disconnectors. The kits do not require any additional foot print area, and the total width is twice the single unit width. The module needs only 12 mm extra space above the switch.

The fourth pole or auxiliary contacts can be mounted on the outer side of the combination.

Change-over switch kits

For switches	For shafts	Type	Order number
OT16...32E ²⁾	OXS5_, OXP5_	OWC5D1	1SCA022551R9220
