

DMM Test Lead Kits

Silicone test leads remain flexible in hot or cold environments. Insulation resists burning or melting in contact with soldering irons. Plugs and jacks are compatible with most digital multimeters made by Fluke, Hewlett-Packard, Tektronix and Wavetek.

Deluxe Maxi Kit. Contains 2 each (black/red) flexible test leads, modular electronic test probes with replaceable tip and five sets of replacement tips, test lead couplers, medium and extra large alligator clips, Minigrabber® test clip lead, Minipincer® test clip lead, electronic test probe set with extendable tip and 2 spade lug adapters. Standard brass tips. Supplied with a nylon pouch.
885-5677. 5677A.....EACH 95.00

Basic Test Lead Kit for Electronics. Contains 2 each — Test probe leads on silicone insulated 18 AWG wire, one black, one red; slide-on extended tips and alligator clips, one black and one red. Banana plugs on meter end have no sleeve. Comes in a reusable plastic case.
885-5682. 5672A.....EACH 20.00

Deluxe Kit for Electronics. Contains 2 Each — Modular probe, medium alligator clips, Minigrabber® test clip leads, Minipincer® test clip leads, slide-on IC tips, slide-on extended tips, flexible test leads, one black and one red. It also contains 2 spade lugs and a nylon pouch.
885-6370. 5674B.....EACH 85.00

Basic Electrical DMM Test Lead Kit with Maxigrabber® Jaw Clips. Contains 2 each (black/red) — Modular probes, right angle to straight plug silicone test leads and Maxigrabber® test clips with jaws. Supplied with a nylon pouch.
885-5900. 5900.....EACH 44.00

Standard Replacement Test Lead Kit. Contains 2 DMM test leads with silicone insulated, 18 AWG test lead wire and standard nickel-plated tips with comfort-grip over-molded probes.
885-5529. 5519A.....EACH 9.90

Replaceable Tip Probe Kits. 6275. Includes 2 each precision electronic probes with stainless-steel tips. **6341.** Includes precision electronic probes with a set of 5 replaceable tips, including 3 sets of gold-plated pogo pin tips and a set of standard and extra long stainless-steel tips.
885-1010. 6275.....EACH 14.00
885-1011. 6341.....EACH 38.00

SMD Microtip™ Test Probe. The SMD Microtip probe is specially designed to work on densely populated boards with SMD components. The offset tip is fine ground to a very sharp point to make it easy to accurately locate test points or work in extremely tight quarters. The bends in the tip make it flexible to help maintain contact while operating other equipment. The tips are stainless steel and can be replaced if damaged. The stacking banana plug fits nearly any banana jack. Four feet of 18 gauge PVC insulated test lead wire provide access for most lab situations.
885-5320. 5144-48-0. Black.....EACH 9.65
885-5325. 5144-48-2. Red.....EACH 9.65

Replaceable Tip Probe Kit. Contains 2 each — Replaceable tip test probe leads on silicone wire, one black and one red; dog leg micro tips, 2.0 (0.080) needle tips, shouldered micro tips; 4 each — Standard brass tips.
885-5676. 5676.....EACH 26.85

Retractable Tip Probe Sets. Set includes one each (black, red) test leads with 4' of silicone insulated, 18 AWG test lead wire. Multi-stacking banana plugs fit any banana jack equipped instruments. 5953 is the same as 5952 except with right-angled DMM shrouded plugs.
885-5952. 5952. Maxigrabber® Grip Clip set. Maxigrabber® has alligator clip jaws.....EACH 18.00
885-5953. With Right Angle DMM plugs.....EACH 18.00

Deluxe Electrical Kit. Contains 2 each (black/red) — Modular probes, right angle to straight plug leads, Maxigrabber® test clips with pincer tip, with hook tip and with jaws and extra large alligator clips. Supplied with a nylon pouch.
885-5904. 5904.....EACH 88.00

Multi-Use Test Lead Kit. Contains 2 each (black/red) — Modular probes, right angle to straight plug leads, Maxigrabber® test clips with pincer tip and medium alligator clips. Supplied with a nylon pouch.
885-5899. 5899.....EACH 49.00

Automotive DMM Kit. Contains 2 each (black/red) — Modular probes, right angle to straight plug leads, Maxigrabber® test clips with jaws, insulation piercing Maxigrabber® test clips and extra large alligator clips. Supplied with a nylon pouch.
885-5905. 5903.....EACH 76.00

Heavy Duty Kit for Electrical Work. This versatile kit provides the right test accessories for demanding electrical tests. Contains 2 each (black/red) — Modular probes, right angle to straight plug test leads, medium and extra large alligator clips and slide-on extended tips. Supplied with a nylon pouch.
885-5683. 5673B.....EACH 44.00

Maxigrabber® Test Clip Sets

Each clip has sheathed 4 mm (0.16") receptacle to accept Pomona flexible leads. One black and one red clip.

Maxigrabber® Set. Maxigrabber has hook tip.
885-5921. 5911A.....EACH 14.30

Maxigrabber® Grip Clip Set. Grabber has grip teeth.
885-5922. 5912A.....EACH 19.80

Insulation Piercing Maxigrabber® Set. Pierces insulation up to 3.5 mm (0.14") without cutting or stripping. Only a small hole is left in the insulation.
885-5913. 5913.....EACH 27.50

Maxigrabber® Set. Maxigrabber has pincer type contact.
885-5920. 5910A.....EACH 18.70

Alligator Clip Sets

Each clip has sheathed 4 mm receptacle to accept Pomona flexible leads. One black and one red clip.

Extra Large Alligator Clip Set. Fully insulated clip with 1.0" jaw opening.
885-0410. 6041A.....EACH 8.80

Medium Alligator Clip Set. Fully insulated clip with 0.30" jaw opening.
885-5917. 5916A.....EACH 7.15

Flexible Test Lead Sets

Right Angle to Straight Plug Set. For most hand held DMMs, right angle to straight sheathed banana plug on 48" long Silicone wire.
885-5927. 5907A.....EACH 10.00

Straight Sheathed Set. Straight sheath banana plug on each end of 48" long, silicone wire.
885-5928. 5908A.....EACH 10.00

Sets contain one black and one red lead. Plugs fit Fluke, Agilent (HP), Tektronix and Wavetek multimeters.

Probe Sets

Test Probe with Stainless Steel Tip. Probe has stainless-steel tip for heavy-duty or industrial use. Tip can be re-sharpened if damaged. Probe set has a 4' silicone insulated, 18 AWG test lead wire.
885-6116. 5898.....EACH 10.00

Modular Test Probe Handle Sets
Test probe with banana spring tip has point for probing and a combined banana plug for banana jack test points. Set includes one red and one black test probe for use with right to straight DMM lead set such as 5907A.
885-5535. 5906A.....EACH 8.00

Test probe with standard nickel-plated tip for electronic or electrical measurements. Set includes one red and one black test probe for use with right to straight DMM lead set such as 5907A.
885-5536. 6232.....EACH 7.00
