	(50 Hz only)				

- † On LC1D09 - LC1D65A, for spring terminals versions add '3' to the catalog number prior to adding the voltage code (ex. LC1D12G7 becomes LC1D123G7 and LC1D40AG7 becomes LC1D40A3G7 - Note that 40A to 65A spring terminals are only on the control terminations and not on power terminations). No price adder for this modification.
- On LC1D09 - LC1D65A and LC1DT20 through LC1DT80A, for ring tongue versions add '6' to the catalog number prior to adding the voltage code (ex. LC1D09G7 becomes LC1D096G7 and LC1D50AG7 becomes LC1D50A6G7). No price adder for this modification.

Note: To be used for interpretation of current catalog numbers only.

- ▲ Complete catalog number with coil voltage code from table on page 18-6; example, LC1D09G7.
- For DC version of these devices replace the 'C' with 'P' (ex. LC1D80004** becomes LP1D80004**). This applies only to 80A 4 pole devices.
- ◆ On LC1D09 - LC1D65A and LC1DT20 through LC1DT80A, for ring tongue versions add '6' to the catalog number prior to adding the voltage code (ex. LC1D09G7 becomes LC1D096G7 and LC1D50AG7 becomes LC1D50A6G7). No price adder for this modification.
- ★ On LC1D09 - LC1D65A, for spring terminals versions add '3' to the catalog number prior to adding the voltage code (ex. LC1D12G7 becomes LC1D123G7 and LC1D40AG7 becomes LC1D40A3G7 - Note that 40A to 65A spring terminals are only on the control terminations and not on power terminations). No price adder for this modification.
- ▼ On LC1D09 and LC1D12 only, for slip-on connector versions add '9' to the catalog number prior to adding the voltage code (ex. LC1D09G7 becomes LC1D099G7). No price adder for this modification.

■ When mounting overload relays LR9F5●57 to LR9F5●71 directly beneath the contactor, supporting the relays with a mounting plate is recommended. With overload relays LR9F7●75 to LR9F7●81, use of a support mounting plate is mandatory.

♦ IEC standard 60947-4 specifies the following trip times when the overload relay senses 7.2 times the setting current:
Class 10 — between 4 and 10 seconds
Class 20 — between 6 and 20 seconds

★ Interconnection kit LA7F407 is required to mount an LR9F●71 to an LC1F185.

- ▲ Use voltage codes from the "Voltage Codes" table below to complete the catalog number. For example: LC2D09G7
 ■ Includes mechanical interlock without electrical contacts. Installer to complete wiring for electronically interlocking contactor operating coils by utilizing a N.C. auxiliary contact integrated in the contactor or optional LADN or LAD8N auxiliary contact block.
 ♦ For LC2D09–LC2D32, electrical interlock can be included by adding a "V" to the end of the catalog number (ex: LC2D09B7V). List price adder: \$5.00.
 ★ For these items, order two non-reversing contactors and one mechanical interlock separately. See page 18-4 and 18-14 for selection.
 ▼ Includes mechanical interlock (Type LA9D11502) with pre-wired electrical contacts for interlocking contactor operating coils.

HOW TO ORDER:

Components are available for customer assembly of TeSys F reversing contactors. For example, the following components must be ordered to build a 75 hp @ 460 V reversing contactor with a 120 V/60 Hz coil:

LC1F265

Table 18.11:

Quantity	Catalog Number	Description
2	LC1F115G6	Contactors
6	DZ2FF1	Lugs (page 18-12)
2	LADN11	Auxiliary contacts
1	LA9FF976	Power connections
1	LA9FF970	Mechanical interlock

Table 18.12: 3-Pole Contactors

Maximum Horsepower Ratings				Maximum Current		Holding Circuit Contact Built Into Coil		Catalog Number [▲]	\$ Price

		24 (DC only)	LA4DB3S	56.00

■ Installing suppressor into the cavity makes the electrical connection. Overall width of contactor remains the same.

◆ For LC●D09 through LC●D65A with DC or low consumption DC coils, 3-pole contactors are fitted with built-in bidirectional diode suppression as standard.

★ Mounting at the top of the contactor on coil terminals A1 and A2.

Table 18.24: Cabling Accessories

Usage	Mounting on	Operating voltage 50/60 Hz	Catalog Number	\$ Price
For adapting existing wiring to a new product or for use with top mount accessory.	LC1D09 to D38 LC1DT20 to DT60 AC only	Without coil suppression	LAD4BB	23.00
		With coil suppression (varistor)	LAD4BBVE	23.00
		24–48 V	LAD4BBVG	23.00
		50–127 V	LAD4BBVU	23.00

LA4DA1U

LA4DA2U

LA4DC3U

LAD4BB..

The following accessories require use of cabling accessories (LAD4BB●●) for proper mounting. See page 18-9 for illustration.

Electronic Serial Timer Modules

These solid state modules delay the energizing and de-energizing of the contactor coil.

Table 18.25:

Type	Operational Voltage ▲		Time Delay	Catalog Number	\$ Price
	24–250 Vac	100–250 Vac			
On-delay	LC1D09–D65A	LC1D80–D150	0.1–2 s	LA4DT0U	82.
			1.5–30 s	LA4DT2U	82.
			25–500 s	LA4DT4U	82.

▲ For 24 V operation, the contactor must be fitted with a 21 V coil: coil voltage code Z5 for 50 Hz; Z6 for 60 Hz; ZD for DC.

Interface Modules ■

These modules allow the contactor coils to be energized from low voltage and low current level signals. They come in mechanical relay and solid state versions. The relay plus manual operation versions include a lever for manually turning the contactor on and off. When a module receives a low level signal, it allows the separate sourced control voltage to flow to the contactor coil. It saves space and wiring time compared to conventional interposing relays.

Table 18.26:

Interface Type	Operational Voltage		Input Voltage	Catalog Number	\$ Price
	24–250 Vac	100–250 Vac			
Relay	LC1D09–D150		24 Vdc	LA4DFB	55.
	LC1D09–D150		48 Vdc	LA4DFE	55.
Relay Plus	LC1D09–D150		24 Vdc	LA4DLB	71.
Manual Operation	LC1D09–D150		48 Vdc	LA4DLE	71.
Solid State	LC1D09–D65	LC1D80–D115	24 Vdc	LA4DWB	71.

■ Adapter required for D09 - D65A, see table 18.24.

Automatic-Manual-Stop Control Modules

These modules allow for local and/or remote operation of the contactor coil. Each module includes a lever to switch from automatic to manual operation and a dial to turn the contactor on and off.

Table 18.27:

Operational Voltage		Catalog Number	\$ Price
24–100 Vac	100–250 Vac		
LC1D09–D150	—	LA4DMK	35.

Low Voltage Ride Through Module (meets SEMI F47 requirements)

By ensuring SEMI F47 compliance of AC powered IEC contactors and relays, the low voltage ride through modules can be used to increase the voltage sag immunity of semiconductor processing equipment. These modules make it possible for AC powered Telemecanique contactors and relays to exceed the requirements of SEMI F47, both in the magnitude and duration of a voltage sag event—even with accessories such as auxiliary contact blocks and pneumatic timers.

The low voltage ride through modules can be used with Telemecanique contactors from 9 A through 80 A, as well as the CAD series of control relays.

Table 18.28:

For use on:		Catalog Number	\$ Price
Contactor	Relay

▲ Lug kits ending in the number "6" include 6 identical lugs. In some cases the LR9F overload relay mounted directly on the load side of an LC1F contactor will require a different size lug for your choice of contactor and overload. If the two sizes are different, order 3 of each size lug. Mounting hardware (screws, washers, and nuts) are provided with the contactors and overload relays, not with the lugs. See Table 18.37 for pricing.

Table 18.36: Lugs—2 and 4-Pole ♦

Contactor Type LC1	Lug Kit Catalog Number	Qty. Required		AL/CU Cable Size
		2-Pole	4-Pole	
F115	DZ2FF1	4	8	14 to 2/0
F150, F185	DZ2FG1	4	8	6 to 3/0
F225, F265, F330	DZ2FH1	4	8	6 to 300 MCM
F400	DZ2FJ1	4	8	4 to 500 MCM
F500	DZ2FK1	4	8	2 X 2 to 600 MCM
F630	DZ2FL1	■	■	3 X 2 to 600 MCM
F780	DZ2FX1	4	8	4 X 1/0 to 750 MCM

■ For 2-pole F630 contactors, order 2 DZ2FL1 (L1 and T2), and 2 DZ2FL3 (L2 and T1).
For 4-pole F630, order 2 DZ2FL1 (L1 and T4), 4 DZ2FL2 (L2, T2, L3, T3) and 2 DZ2FL3 (L4 and T1).
♦ Lugs for LC1F contactors and overload relays must be ordered separately. Each kit consists of one (1) lug. Mounting hardware (screws, washers, nuts) are provided with the contactors, not the lugs. See Table 18.37 for pricing.

Table 18.37: Lugs Pricing

These clear plastic protective shrouds are an effective means to meet international touch-safe requirements for power terminals. They are designed to be used with power cables that have been bolted to the terminal.

NOTE: The protection shrouds do not attach to contactors or overloads utilizing **DZ2F** lug kits.

Table 18.38: Power Terminal Protection Shrouds

For Use With 2-, 3-, And 4-pole Contactors	Number of Shrouds Per Set	Catalog Number	\$ Price

Table 18.60: For LC1F115, F150, F185, F265, F330, F400, F500, F630, F780, F800 —

LX1 coils are the standard coils that are included when a voltage code is added to the contactor part number. The LX9 coils may be ordered separately for special applications. LX9 coils do not include a built-in normally open holding circuit contact; a separate auxiliary contact block with a N.O. contact should be added to the contactor. Both the LX1 and LX9 coils can be used on the previous F-line contactors.

- ◆ LC1F780 contactors operate on 2 coils as a set. The LX1FX part number includes both coils.
- ★ The 600 V coils for the F400, F500 and F630 do not include an auxiliary contact for holding circuits. If required, select appropriate contacts from page 18-8.
- ▼ Also requires rectifier DR5TE4U for 110 V–240 V coils, DR5TE4S for 380 V–440 V coils. See table below for pricing.
- △ Coil circuit requires a separately mounted rectifier. Order from Rectifier Table.
- Complete catalog number by adding suffix. For example: LX1FF024.

Table 18.61: Rectifier Table

Coil	Rectifier Catalog Number	\$ Price
LX9F*910	DR5TF4V	75.00
LX9F*917	DR5TF4V	75.00
LX9F*925	DR5TE4U	75.00
LX9F*926	DR5TE4U	75.00
LX9F*931	DR5TE4U	75.00
LX9F*936	DR5TE4S	75.00
LX9F*937	DR5TE4S	75.00
LX9F*938	DR5TE4S	75.00

Application Note on Contactor Drop-out Times:

Contactors using LX1, FH, FJ, FK, FL, and FX coils have longer drop-out times. For critical applications such as emergency stop functions:

- Select a fast drop-out coil (LX9), or
- Use a maintained contact Stop button, or
- Use an interposing relay.

TeSys F DC Coils

LX4 coils are the standard coils when a voltage code is added to the part number. The LX9 coils may be ordered separately for special applications. LX9 coils do not include a built-in normally open holding circuit contact; a separate auxiliary contact block with a N.O. contact should be added to the contactor. Both the LX4 and LX9 coils can be used on previous F-line devices.

TeSys D enclosed full voltage starters are available in Type 1 and Type 12/3R enclosures through 50 hp at 460 V. The enclosed D-line accepts standard D-Line accessories and all Insta-Kits™ control units and control power transformer kits. Standard capacity control power transformers with built-in fuse block can be installed in the standard enclosure. For extra capacity, please refer to your local distributor or nearest Square D/Schneider Electric sales office.

Table 18.71: Catalog Number Nomenclature

Catalog Number Example: LE1D093A62 O G 7 1 07

△Control Power Transformer

Add price from page 18-23. Select letter for primary voltage of CPT:

Voltage	No Transformer used	208	240	480	600
Code	O ▲	L	M	T	X

▲ Letter O, not zero.

Note: If control transformer is used, the only options available are 24 or 120 volts as the secondary of the transformer. Also, DC voltages are not available when control power transformer is used.

□Contactor/Starter Coil Voltage

Select coil voltage from table:

Voltage	24	120	208	240	480	600
AC	B	G	L	U	T	X
DC	B	—	—	—	—	—

◇Coil Frequency

Select:
7 = dual frequency coils (50/60 Hz.)
6 = 60 Hz.
D=DC

Note: For 9 to 65 A contactors, only dual frequency coils are available; 80 A contactors, the 24 V to 240 V coils are dual frequency only (50/60 Hz.). The 480 V to 600 V coils are 60 Hz. only. See catalog for other restrictions.

▽Overload relay type

Select:
0 = No overload relay
1 = Class 10 Trip
2 = Class 20 Trip

★Overload Relay Range

Select code from the below:

Code	Range	For use on Contactors	\$ Price Adder
01	0.1–0.16	D09–D32■	60.

63	63–80	D65–D80	107.
65	48–65	D40, D50, D65	107.

■ Available for Class 10 only.

◆ Available for Class 20 only.

Note: If no overload relay is required, leave this portion of the catalog blank. Add appropriate Price Adder to the base price of the starter.

Dimensionspage 18-48

IEC combination starters combine the requirements of motor overload and short circuit protection in one convenient compact package. All devices provide Type 2 Coordination through 30 hp at 460 V. Devices are available in Type 1 and Type 12/3R enclosures. The IEC combination starter line accepts standard TeSys D accessories and all Insta-Kits™ pilot devices and control power transformer kits. Standard capacity control power transformers with built-in fuse block can be installed in the standard enclosure. For extra capacity, please refer to your local distributor or nearest Square D/Schneider Electric sales office.

NOTE: Use tables and notes from page 18-21 to complete the catalog numbers.

Factory Modifications and INSTA-KITS™ selection

Add the Factory Modification Code to the end of the catalog number created from page 18-21. With the use of INSTA-KITS™, only one operator scheme is allowed. Only the combinations of operators and pilot lights shown below can be ordered.

Pilot lights will be at the coil voltage indicated in the catalog number for the starter.

Table 18.78:

Description	Factory Modification Code▲	\$ Price	Insta-Kits (for field installation)	\$ Price
Control Units Only

50 VA extra, 2 fuses in Primary, 1 Fuse in secondary	A207P	456.	♦	—
100 VA extra, 2 fuses in Primary, 1 Fuse in secondary	A208P	634.	♦	—

- ▲ Add these forms to the catalog number selected on page 18-21. The numbers as shown are for use in NEMA 1 Enclosures. For uses in NEMA 12/3R change the 6 to a 7 (ex A06U becomes A07U). Price remains the same. The change DOES NOT apply to control power transformer forms.
- Pilot lights are wired such that the light is on when the contactor is energized. For non-LED type pilot lights, a green lens is installed on the unit when shipped. A red lens is included for use as applicable.
- ♦ Select Insta-Kits™ from table below.

Table 18.79:

Total VA	Insta-Kits™ Catalog Number	\$ Price
50	LA9TFD32★	140.00
100	LA9TFD80★	246.00
150	LA9TFD15★	343.00

★ Complete the part number for the Insta-Kits™ by selecting the voltage code from the appropriate tables below.

Class 3211 06

GV2ME

GV2P21 with
GV2GH7 installed

GV3P

GV7RE20

The GV family of products are 3-pole, horsepower rated, UL 508 listed, manual starters. They include a manual disconnect, class 10 ambient-compensated thermal overload relay, and an instantaneous magnetic trip mechanism in one compact unit.

Any GV manual starter can be used alone for local manual control of a motor with individual full-load currents up to 220 amps. The GV family of products may also be used in group motor installations in accordance with National Electric Code article 430-53. Group motor installations give you greater panel density for smaller size and require fewer parts and less wiring necessary for installation when compared to conventional panel designs.

The GV2P and GV3P products also have an additional UL 508 type E rating as a stand alone self-protected manual combination starter. The UL 508 type E rating requires the addition of line side insulating barrier GV2GH7 for the GV2P or part number GV3G66 for the GV3P. The GV2P and the GV3P self-protected manual combination starter may also be combined with specific size contactors from the LC1D product family for a UL 508 Type F combination starter construction. These products have UL-listed short circuit current rating from 10–100 KA depending on application size and voltage. See www.us.telemecanique.com for more information.

How to Order

To order the basic motor starter, select the model number (GV2ME**, GV2P**, or GV3P**) with the appropriate thermal setting from the table below. The thermal trip range and setting should be determined from the motor nameplate full-load current.

Table 18.126:

Dimensions pages 18-52 to 18-55

- 45 mm wide (same dimensions as GV2ME)
- Available with screw clamp and spring type terminals
- Mounts directly to LC1D09–D32 contactors (with use of GV2AF3 or GV2AF4)
- Meets application needs for fusible starter
- Uses GV2AE instantaneous contact blocks to open control circuits
- DIN rail mounted

Replacement electromechanical relay (for control connection module)		—	1	10	APP2ER	7.50	

▼ Connection to an APP1C*** module via APP2CX adaptor (LAD35).

The AK5 pre-fabricated bus bar system provides a quick and easy method of mounting control devices. All components are finger safe, UL Listed, CSA approved and CE marked. Although the AK5 system can be screw mounted onto any type of support, it **must be mounted** on the AM1DL201 DIN rail when component mounting plates incorporating a tap-off are used. When using tap-offs, the nominal operating current of the bus bar (160 Amperes @ 35°) must not be exceeded.

Table 18.149: 160 Ampere Three Phase Busbar System

Dimensions		Mounting on rail AM1 DE200 or AM1 ED201	
X1 = Electrical clearance (ISC max) 40 mm for Ue < 500 V, 50 mm for Ue < 690 V		Blocks GV AN, GV AD, GV AM11 Block GV3 AU and GV3 AS	
Mounting on panel, using M4 screws		Mounting on pre-slotted mounting plate AM1 PA	

Note: Leave a space of 9 mm between 2 manual motor protectors: either an empty space or side-mounting add-on contact blocks. Horizontal mounting is possible: please consult your regional sales office.
