

## Quick Reference Guide

### RJ *point five* Connector System

The RJ *point five* connector system is the next generation Ethernet link, offering a higher density cabling solution for Original Equipment Manufacturers (OEMs) who desire a lower cost per port while maintaining the convenience of a single connector per channel. The port spacing is on a 7mm centerline, occupying half the space than that of traditional RJ45 Ethernet link. In addition to the high density receptacle, TE Connectivity offers the mating cable assembly, as well as cable management solutions for single box and rack configurations. The receptacle and cable assembly were redesigned to eliminate the undesirable RJ45 split pair configuration, resulting in heightened electrical performance. Additionally, the latching feature incorporates an easy-to-use lanyard that will facilitate up to 96 ports on a single line card. Due to the density on the receptacle face, the light from the LEDs is transferred out through the cable boot, bringing the port indicator light closer to the end user.

#### FEATURES AND BENEFITS

- Approximately double the density offered over the standard RJ45 Ethernet link
- Same footprint to support both integrated magnetic and non-integrated solutions
- Cable assemblies capable of field termination
- Cable management features available from TE for higher density configurations
- Product family will support Gigabit speeds of Cat5e UTP cable, and roadmap supports PoE+ and 10Gig over Cat6a
- Receptacle is a modular design to allow for easy and rapid deployment of product extensions

## Product Applications

- High density Ethernet switching/routing products
- Data center switching applications:
  - Top of rack
  - End of row
  - Mid-row
- Server I/O applications
- Wiring closet switching products

## Mechanical

- Port center-on-center spacing at 7mm for Cat5e cabling
- Overall height is 25.25mm
- High density cabling consists of ergonomically friendly lanyard for easy extraction
- Port indicator LEDs conveniently located on the cable boot to facilitate easy viewing

## Electrical/Optical

### Product meets category 5e performance for 10/100/1000BASE-T applications

- Insertion loss 0.4 dB maximum at 100 MHz
- Return loss 20 dB minimum at 100 MHz
- NEXT loss 43 dB minimum at 100 MHz
- FEXT loss 35.1 dB minimum at 100 MHz

### Magnetic product performs for 10/100/1000BASE-T applications

- Insertion loss 1.5 dB maximum at 100 MHz
- Return loss 10 dB minimum at 100 MHz
- Crosstalk 31 dB minimum at 100 MHz
- Common Mode Rejection Ratio 17 dB minimum at 100 MHz
- Isolation voltage complies with IEEE 802.3

## RJ point five Connector Comparison to RJ45\*

RJ point five Connector Demo Rack

- Demo Rack Includes:**
- 96 Port RJ point five cards
  - Port RJ45 patch panels
  - AMPTRAC intelligent infrastructure management system
  - AMP NETCONNECT Hi-D cable management
  - RJ point five connector to RJ45 jumper cables
  - Cable assembly showing LEDs through cable plug
