

TTL-Compatible, CMOS Analog Switches

The DG300A through DG303A family of monolithic CMOS switches are truly compatible second source of the original manufacturer. The switches are latch-proof and are designed to block signals up to 30V_{P-P} when OFF. Featuring low leakage and low power consumption, these switches are ideally suited for precision application in instrumentation, communication, data acquisition and battery powered applications. Other key features include Break-Before-Make switching, TTL and CMOS compatibility, and low ON resistance. Single supply operation (for positive switch voltages) is possible by connecting V- to 0V.

Features

- Low Power Consumption
- Break-Before-Make Switching
 - t_{ON}150ns
 - t_{OFF}130ns
- TTL, CMOS Compatible
- Low r_{DS(ON)} (Max) 50Ω
- Single Supply Operation
- True Second Source

Ordering Information

PART NUMBER	TEMP. RANGE (°C)	PACKAGE	PKG. NO.
DG300ABK	-25 to 85	14 Ld Cerdip	F14.3
DG301ACJ	0 to 70	14 Ld PDIP	E14.3
DG303AAK	-55 to 125	14 Ld Cerdip	F14.3
DG303ABK	-25 to 85	14 Ld Cerdip	F14.3
DG303ACJ	0 to 70	14 Ld PDIP	E14.3
DG303ACY	0 to 70	16 Ld SOIC	M16.3

Functional Diagrams and Pinouts (Switches shown for a logic "1" input)

DG300A TRUTH TABLE

LOGIC	SWITCH
0	OFF
1	ON

Logic "0" ≤ 0.8V, Logic "1" ≥ 4.0V.

DG301A TRUTH TABLE

LOGIC	SWITCH 1	SWITCH 2
0	OFF	ON
1	ON	OFF

Logic "0" ≤ 0.8V, Logic "1" ≥ 4.0V.

Functional Diagrams and Pinouts (Switches shown for a logic "1" input) (Continued)

DG303A TRUTH TABLE

LOGIC	SWITCH 1 AND 2	SWITCH 3 AND 4
0	OFF	ON
1	ON	OFF

Logic "0" $\leq 0.8V$, Logic "1" $\geq 4.0V$.

Pin Descriptions

11	D ₂	Drain (Output) Terminal for Switch 2
12	D ₄	Drain (Output) Terminal for Switch 4
13	S ₄	Source (Input) Terminal for Switch 4
14	V+	Positive Power Supply Terminal

Absolute Maximum Ratings

V+ to V-	44.0V
V- to GND	25V
Digital Inputs, V _S , V _D (Note 1)	(V-) - 2V to (V+) + 2V or 30mA, Whichever Occurs First
Continuous Current, (Any Terminal)	30mA
Peak Current, S or D (Pulsed 1ms, 10% Duty Cycle Max)	100mA

Operating Conditions

Voltage Range	±15V
Temperature Range	
“A” Suffix	-55°C to 125°C
“B” Suffix	-25°C to 85°C
“C” Suffix	0°C to 70°C
Input Low Voltage	0.8V (Max)
Input High Voltage	4.0V (Min)
Input Rise and Fall Time	≤20ns

Thermal Information

Thermal Resistance (Typical, Note 2)	θ_{JA} (°C/W)	θ_{JC} (°C/W)
SOIC Package	100	N/A
PDIP Package	100	N/A
CERDIP Package	75	20
Maximum Junction Temperature		
Hermetic Packages		175°C
Plastic Packages		150°C
Maximum Storage Temperature Range		-65°C to 150°C
Maximum Lead Temperature (Soldering, 10s)		300°C (SOIC - Lead Tips Only)

CAUTION: Stresses above those listed in “Absolute Maximum Ratings” may cause permanent damage to the device. This is a stress only rating and operation of the device at these or any other conditions above those indicated in the operational sections of this specification is not implied.

NOTES:

1. Signals on S_X, D_X or IN_X exceeding V+ or V- will be clamped by internal diodes. Limit diode forward current to maximum current ratings.
2. θ_{JA} is measured with the component mounted on an evaluation PC board in free air.

Electrical Specifications V+ = +15V, V- = -15V, GND = 0V, T_A = 25°C
