SYS-H264

NetVX SYS-H264

[OVERVIEW](#)
[FEATURES](#)
[SPECIFICATIONS](#)
[ORDERING
INFORMATION](#)

The addition of the SYS-H264 encoder to the NetVX portfolio further establishes Harris as the leading provider of broadcast quality compression products. This 1RU product supports H.264 4:2:2 profile HD (1080i/720p), as well as up to 16 channels of audio input capability, with both DVB-ASI and IP outputs. With its low latency of less than 350 ms, the SYS-H264 can be used in a variety of contribution applications, including sporting events and ENG/SNG. The intuitive front panel display makes it easy to set up and operate the system. Network maintenance is provided through the built-in SNMP functionality or the Web-based graphical user interface.
