Single Travel Adapter AUSTRALIA & EUROPE

Whether travelling on business or on a private trip, we are all familiar with the problem: it's not possible to use the electrical device you brought along in the country you are visiting because the plug doesn't fit the socket.

With the "Single Travel Adapter Australia", you can connect the devices you have brought with you from Europe safely and easily to the mains supply in Australia.

The "Single Travel Adapter Australia" can be combined with the "Single Travel Adapter Europe". With this combination, the input side will also accept 2-pole and 3-pole plugs from the USA, Australia, UK, Switzerland and Italy, thereby enabling travellers from over 150 countries to connect to the mains supply in Australia. The output side of the "Single Travel Adapter Europe" is fitted with the earth-protected plug used widely throughout Europe (Schuko). The "Single Travel Adapter Europe" can also be used as an attachment with the appropriate individual country-specific adapters – thus ensuring that you always have the right connections when travelling...

It can be used with a range of devices, including: MP3 players, digital cameras, mobile phones, hair dryer, PDAs, GPSs etc.

Specifications:

SINGLE TRAVEL ADAPTER AUSTRALIA:

- Designed & engineered in Switzerland
- Compact Design
- Maximum Safety
- Lifetime Warranty
- Voltage: Max. 10A / 250 V ~
