✓ to enlarge

The eSATA or external cables are designed to bring standard internal SATA drive performance out of the PC. Using a shielded cable with a maximum length of 2m, these high specification cables comfortably outperform both the more traditional USB and IEEE 1394 technologies.

Features:

- New eSATA shielded cables designed for external, out of the box solutions
- Designed to connect external SATA drives to PCs fitted PCI SATA cards
- eSATA to SATA link cables also listed - eSATA male to SATA male eSATA male to SATA female assemblies
- Custom versions not available, listed lengths only

3116-1

Stock No	Description						
<i>External Cables</i>							
3116-0.5	eSATA Male to Male External Cable (0.5m)						
3116-1	eSATA Male to Male External Cable (1m)						
3116-1.5	eSATA Male to Male External Cable (1.5m)						
3116-2	eSATA Male to Male External Cable (2m)						
3115-0.5	eSATA Male to SATA Male External Cable (0.5m)						
3115-1	eSATA Male to SATA Male External Cable (1m)						
3115-2	eSATA Male to SATA Male External Cable (2m)						
<i>Internal Cables</i>							
3115I-0.5	eSATA Male to SATA Male (Internal) Cable (0.5m)						
3115I-1	eSATA Male to SATA Male (Internal) Cable (1m)						
3115MF-0.5	eSATA Male to SATA Female (Internal) Cable (0.5m)						
3115MF-1	eSATA Male to SATA Female (Internal) Cable (1m)
