N-Channel MOSFET

FEATURES

- Surface mount
- · Available in tape and reel
- Dynamic dV/dt rating
- · Logic-level gate drive
- R_{DS(on)} specified at V_{GS} = 4 V and 5 V
- Fast switching
- Ease of paralleling
- Material categorization: for definitions of compliance please see <u>www.vishay.com/doc?99912</u>

DESCRIPTION

Third generation power MOSFETs from Vishay provide the designer with the best combination of fast switching, ruggedized device design, low on-resistance and cost-effectiveness.

The SOT-223 package is designed for surface-mounting using vapor phase, infrared, or wave soldering techniques. Its unique package design allows for easy automatic pick-and-place as with other SOT or SOIC packages but has the added advantage of improved thermal performance due to an enlarged tab for heatsinking. Power dissipation of greater than 1.25 W is possible in a typical surface mount application.
