Amphenol® GT Series Reversed Bayonet Coupling Connectors	
General Description	1
GT Series insert availability charts	2-4
GT Series insert alternate positioning	5
GT Series contact arrangements	6-28
GT Connector Classes	29
GT00A wall mount receptacle for front panel mounting	30
GT00AF/00F wall mount receptacle for front panel mounting	31
GT00CF/00CFZ wall mount receptacle for front panel mounting	32
GT00G wall mount receptacle for front panel mounting	33
GT00LCF/00LCFZ wall mount receptacle for front panel mounting	34
GT00R wall mount receptacle for front panel mounting	35
GT00RV wall mount receptacle for front panel mounting	36
GT01A inline receptacle	37
GT01AF/01F inline receptacle	38
GT01G inline receptacle	39
GT01LCF/01LCFZ inline receptacle	40
GT01R inline receptacle	41
GT01RV inline receptacle	42
GT02R/02RFS box mount receptacle for front panel mounting	43
GT020R/020RFSM box mount receptacle for front panel mounting	44
GT030 square flange receptacle for rear panel mounting	45
GT030A square flange receptacle for rear panel mounting	46
GT030AF/030F square flange receptacle for rear panel mounting	47
GT030G square flange receptacle for rear panel mounting	48
GT030LCF/030LCFZ square flange receptacle for rear panel mounting	49
GT030R square flange receptacle for rear panel mounting	50
GT030RV square flange receptacle for rear panel mounting	51
GT06A straight plug	52
GT06AF/06F straight plug	53
GT06CF straight plug	54
GT06CFGG straight plug	55
GT06G straight plug	56
GT06G2 straight plug	57
GT06LC straight plug	58
GT06LCF/06LCFZ straight plug	59
GT06LT straight plug	60
GT06PFC straight plug	61
GT06PG straight plug	62
GT06PP/064PP panel plug	63
GT06R straight plug	64
GT06RV straight plug	65
GT06SB straight plug	66
GT06SBT straight plug	67
GT065SL straight plug	68
GT07R jam nut receptacle	69
GT070 jam nut receptacle	70
GT08A 90° angle plug	71
GT08AF/08F 90° angle plug	72
GT08CFGG 90° angle plug	73
GT08LT 90° angle plug	74
GT08PFC 90° angle plug	75
GT08R 90° angle plug	76
GT05 dummy receptacle	77
GTTB thru-bulkhead receptacles	78
Sealing gaskets	79
Receptacle protection caps	80
Plug protection caps	81
MS3057-A cable clamp	82
MS3420 bushing	83
MS3057-C style (10-350349) cable clamp	84
Rear mounting data - receptacles, sealing plugs, sealing ranges	85
Crimp and solder contact information	86, 87
HOW TO ORDER, connector intermateability	88
GT Amphe-Power Connectors with RADSOK® Technology,	
Amphe-Power™ Amphe-GTR, Power GT	89
Special Application GT Connectors:	
GTC-M Series with metal clips, GT-PC Connectors for high voltage power applications,	
GT Connectors for the HMI Lighting industry	90
Additional Amphenol Industrial Products for the Rail Industry	91, 92
Sales office listing	

Amphenol Aerospace operates quality systems that are certified to ISO9001: 2000 by third party registrars.

Amphenol® GT Connectors

with reverse bayonet coupling

the preferred connector for mass transit

Designed originally for use by the military, the heavy duty GT connector has become widely used in commercial, geophysical, aerospace, ground support and shipboard applications. It is the preferred connector for mass transit.

Variety of Shell Styles are Available

Wall Mount Receptacle

Inline Receptacle

Straight Plug

Plug With Rubber Covered Coupling Nut

Jam Nut Receptacle

NOTE:

The connector products in this brochure were formerly known as Bendix® products. These products are now manufactured and sold under the Amphenol® brand name. The name "Amphenol" will replace the name "Bendix" on products and literature in the future.

Amphenol® GT reverse bayonet coupling connectors with MIL-C-5015 insert patterns features:

- Quick positive coupling
- Audible, tactile and visual indication of full coupling
- Waterproof – IP67 rated
- No lockwiring required
- High shock and vibration capabilities
- Inserts available in Neoprene and Viton* materials
- Low smoke/flame retardant inserts also available
- Operating temperature range:
 - With Neoprene inserts: –55°C to +125°C
 - With Viton** inserts: –50°C to +200°C
 - With low smoke/flame retardant inserts: –55°C to +125°C
- Available in both crimp and solder terminations
- Contacts available in gold and silver plating
- Numerous military and commercial finishes available
- Zinc alloy plating (cadmium free) available
- Rugged construction; aluminum or stainless steel components
- Available with resilient cover coupling for added damage protection and increased gripping surface
- Intermateable with existing VG95234 connectors
- 2000 couplings minimum
- UL recognized
- Up to 50% more ampacity with the use of RADSOK® technology (see page 89)

Amphenol's special offerings of GT Series connectors (see end of catalog) include: GT Amphe-Power® Connectors with RADSOK® technology, the GTC-M Series with metal clip inserts and GT-PC Series for high voltage power applications. There is also information on other Amphenol Industrial Products for the Rail Industry at the end of this catalog.

For further information on your individual application requirements, contact:

Amphenol Corporation

GT Series

insert alternate positioning

To avoid cross-plugging problems in applications requiring the use of more than one connector of the same size and arrangement, alternate rotations are available as indicated in the accompanying charts.

As shown in the diagram below, the front face of the pin insert is rotated within the shell in a clockwise direction from the normal shell key. The socket insert would be rotated counter-clockwise the same number of degrees in respect to the normal shell key.

The following insert arrangements have the same alternate insert rotations for W, X, Y and Z, which are:

Degrees			
W	X	Y	Z
80	110	250	280

GT00LCF/00LCFZ

wall mount receptacle for front panel mounting

GT00LCF

- Includes a backshell with extended length to provide more working room for stripped jacketed cable
- Environment proof
- Four through mounting holes or optional threaded holes
- Includes clamp to grip and seal jacketed cable

GT00LCFZ

- Same as GT00LCF except: individual wire sealing grommet included for added moisture protection
- Environment proof
- Four through mounting holes or optional threaded holes
- Includes clamp to grip and seal jacketed cable

10-40450, 10-36675, 10-580649 sealing gaskets

PLAIN FLAT GASKET

The Amphenol® plain flat gasket of synthetic rubber material is provided to take complete advantage of waterproof and pressure sealing features. It is for use with the flange mounted receptacle.

SHIELDING GASKET

This flat gasket is provided to give the maximum in connector performance. Its special feature is in providing the maximum radio shielding under difficult conditions of high receiver sensitivity and low signal strength while retaining the sealing characteristics of the plain gasket. This gasket is for use with the flange mounting receptacle.

LOW TEMPERATURE GASKET

This gasket is provided for applications where the major requirement is resistance to the injurious effects of extremely low temperature. Even at temperatures as low as -67°F this gasket retains its resiliency and will seal a pressure differential of 30 psi.

Additional versions of gaskets are available including low smoke zero halogen, and also high temperature and conductive types. Consult Amphenol Industrial Operations, Sidney NY, for further information.

GT Connectors

crimp contacts and application tools

Machined from copper alloys and silver or gold plated for maximum corrosion resistance, with a minimum millivolt drop and a maximum current carrying capacity, the size 16 and 12 socket contacts are of the closed entry design. Crimp contacts are available for all MS insert arrangements and are identified with an Amphenol® proprietary number.

See page 87 for further contact information applicable to both crimp and solder contacts.
Additional contact variations including thermocouple and RADSOK power contacts are available; consult Amphenol, Sidney, NY for information.

GT Connectors

solder contacts

Machined copper alloy contacts in a full range of sizes, with closed entry socket design in the size 12 and 16 contacts. A heavy silver-plated finish is deposited on all MS style solder contacts for maximum corrosion resistance, maximum current carrying capacity and low millivolt drop. Gold plated contacts are also available. (See how to order, pg. 88).

			2	100

** Contact ratings as stated are test ratings only. The connector may not withstand full rated current through all contacts continuously. Please note that the electrical data given is not an establishment of electrical safety factors. This is left entirely in the designer's hands as he can best determine which peak voltage, switching surges, transients, etc. can be expected in a particular circuit.

† The 10SL, 14S and 16S connectors require short contacts.

Table I
MIL-SPEC CONTACT ARRANGEMENT
SERVICE RATING

MS Service Rating	Recommended Operating Voltage* at Sea Level		Effective Creepage Distance Nom.	Mechanical Spacing Nom.
	DC	AC (RMS)		
Inst.	250	200	1/16	
A	700	500	1/8	1/16
D	1250	900	3/16	1/8
E	1750	1250	1/4	3/16
B	2450	1750	5/16	1/4
C	4200	3000	1	5/16

* The values listed in Table I represent operating values which include a generous safety factor. It may be necessary for some applications to exceed the operating voltages listed here. If this is necessary, designers will find Table II useful for determining the degree to which the recommended values of Table I can be exceeded.

Table II
ALTITUDE VOLTAGE
DERATING** CHART

MS Service Rating	Nominal Distance		Standard Sea Level Conditions		Pressure Altitude † 50,000 Feet		Pressure Altitude † 70,000 Feet	
	Airspace	Creepage	Minimum Flashover Voltage AC (RMS)	Test Voltage AC (RMS)	Minimum Flashover Voltage AC (RMS)	Test Voltage AC (RMS)	Minimum Flashover Voltage AC (RMS)	Test Voltage AC (RMS)
Inst.	1/32	1/16	1400	1000	550	400	325	260
A	1/16	1/8	2800	2000	800	600	450	360
D	1/8	3/16	3600	2800	900	675	500	400
E	3/16	1/4	4500	3500	1000	750	550	440
B	1/4	5/16	5700	4500	1100	825	600	480
C	5/16	1	8500	7000	1300	975	700	560

† Not corrected for changes in density due to variations in temperature

** No attempt has been made to recommend operating voltages. The designer must determine his own operating voltage by the application of a safety factor to the above derating chart to compensate for circuit transients, surges, etc.

Amphenol® GT Connectors

how to order, connector intermateability

Part Number System								
GT	C	00	A	FF	36-5	P	W	(014)
1	2	3	4	5	6	7	8	

1. Contact Style and Insert Material

C = Crimp
 CN = Crimp with stainless steel
 S = Solder
 SN = Solder with stainless steel
 CY = Crimp with Viton
 SY = Solder with Viton
 CL = Crimp with low smoke/flamm retardant inserts
 SL = Solder with low smoke/flamm retardant inserts
 No designation required for Neoprene components

2. Shell Style

00 - Wall mount receptacle
 01 - Inline receptacle
 02 - Box mount receptacle
 020 - Box mount receptacle with accessory threads
 030 - Square flange receptacle - rear panel mount
 05 - Dummy receptacle
 06 - Straight plug
 062 - Straight plug with deep serrated coupling nut*
 064 - Panel mounted plug with heavy duty coupling nut
 065 - Straight plug with long heavy duty coupling nut
 07 - Jam nut receptacle - rear panel mount
 070 - Jam nut receptacle with accessory threads
 08 - 90° angle plug
 TB - Thru-bulkhead

3. Connector Class - For details, see pages 29-78

A - Adapter for accessory attachment, non-environmental
 AF - Adapter, clamp for individual wires, non-environmental
 CF - Adapter, jacketed cable clamp, environmental
 CFGG - Adapter, jacketed cable clamp, over molded coupling nut, environmental
 CFZ - Adapter, jacketed cable clamp, individual wire sealing grommet, environmental
 F - Adapter, clamp for individual wires, individual wire sealing grommet, environmental.
 G - Adapter for heat shrink tubing, individual wire sealing grommet, environmental
 G2 - Free turning adapter for heat shrink tubing, individual wire sealing grommet, environmental
 GTTB - Thru bulkhead receptacle, accepts mating plug on both sides
 LC - Long adapter, backshell with jacketed cable basket weave grip, with individual wire sealing grommet, environmental
 LCF - Long adapter, jacketed cable clamp, environmental
 LCFZ - Long adapter, jacketed cable clamp, individual wire sealing grommet, environmental
 LT - Adapter, backshell for terminating metallic core conduit
 PFC - Adapter, backshell for plastic corrugated conduit, individual wire sealing grommet, environmental
 PG - Long adapter with PG threads, individual wire sealing grommet, environmental
 PP - Panel mounted plug
 R - Adapter for accessory attachment, individual wire sealing grommet, environmental

R - (02/03) No thread, no accessories, environmental with panel sealing gasket
 R - (020) No accessories, environmental with panel sealing gasket
 RFS - (02) No accessories, countersunk mounting holes for use with over molded coupling nut, environmental with panel sealing gasket
 RFSM - (020) No accessories, countersunk mounting holes for use with over molded coupling nut, environmental with panel sealing gasket
 RV - Adapter, individual wire sealing grommet, environmental
 SB - Adapter for termination of EMI/RFI shielded braid with heat shrink tubing or boot, individual wire sealing grommet, environmental
 SBT - Adapter for termination of EMI/RFI shielded braid with heat shrink tubing or boot, individual wire sealing grommet, environmental
 SL - Long adapter, jacketed cable liquid tight strain relief, environmental

4. Designation for Mounting Hole - Receptacle Only

FF - UN Threads
 FM - Metric Threads
 No designation for standard through hole mounting holes.

5. Shell Size and Arrangement

See pages 2-4

6. Contact Style

P designates pin contacts
 S designates socket contacts

7. Alternate Position

W, X, Y and Z - See page 5.
 No suffix required for normal position.

8. Connector Modification*

Omit for standard olive drab with silver plated contacts
 i.e.: (014) Olive drab cadmium plate, nickel base
 (B30) gold/nickel plated contacts
 (025) Black zinc cobalt
 (027) Conductive black zinc cobalt
 (024) Green zinc cobalt
 (LC) Less contacts

* Consult Amphenol, Sidney, NY

Amphenol® GT Connectors with RADSOK technology

Amphenol offers Amphe-Power Connectors, high amperage capability connectors designed for the most demanding industrial and transportation applications. The GT connectors, in most shell styles, can be enhanced with RADSOK contacts that handle up to 150% higher amperages than standard contacts.

The RADSOK contact is a hyperbolic, stamped grid configuration within the socket. As male pin is inserted, axial members in the female half deflect, imparting high current flow across the connection with minimal voltage loss. This design ensures a large, coaxial, face-to-face surface area engagement and provides higher current capacity with minimized temperature rise. The RADSOK's strongest benefit is its very low mill-volt drop because of the intimate contact provided by the spring force of the grid. RADSOK contacts are available in size 8 (69 amps), size 4 (120 amps), and size 0 (250 amps). Current Amphe-Power lines support from 50A to 500A continuous duty. Hybrid arrangements with RADSOK and power contacts can be tailored to meet customer needs.

For more information on GT Amphe-Power Connectors, request Brochure SL-391.

The RADSOK Contact Advantage:

- Low contact Resistance
- Low milli-volt drop performance
- Higher current capacity with minimized temperature rise.
- Reliability under vibration and shock.
- High quality, consistency and lower cost

Amphe-Power™ Amphe-GTR

The Amphe-Power™ GT series provides the benefit of a GT connector in a high performance composite material. The GT-R is listed to UL/CUL 2238 Standard, Control Number 19VP. It also meets all of the specifications for high power process control and server applications. Performance level is the same as that of the GT series. RADSOK contacts enable an increased current rating of 120A on individual contacts, and a standard PG thread achieves an IP67 seal rating.

Compression (setscrew) wire termination to the 4/6AWG or 8/10AWG conductors allows for easy field replacement of pin or socket contacts. It also provides for easy complete plug or receptacle assemblies, all without a need for specialized tooling.

Power GT

The Power GT is a modification to the GT series incorporating three 8.0mm RADSOK contacts mounted in a common termination to busbar or cable, enhanced to an ultra-high current density in a compact shell size 28 layout. This design created the first TUV "finger-proof" 500A connector in the marketplace with the "dead-front" pin design to prevent contact with live circuits. In environmental versions, this connector achieves IP67 performance.

The ninety-degree wire orientation on the plug provides low-profile mounting for tight packaging requirements. This plug is designed to be over-molded, and can also be fitted with mechanical hardware for individual requirements.

Power GT, Finger-Proof 500A Connector

Amphenol® GT Connectors

special applications

GTC-M Series - The GT with Metal Clip Inserts

Amphenol's GTC-M series combines the GT reverse bayonet connector and the rear release metal clip retention system which is used in the Amphenol®/Matrix® MIL-C-5015 connector line. Another benefit is the captivated coupling nut assembly which allows unmating without the rear accessories attached.

Improved environmental sealing is achieved with this series. The crimp joint is covered by a three-webbed fluorinated silicone grommet that seals on the wires without the necessity of an additional sealing clamp. An interfacial seal with conical towers on the pin insert matches with recesses on the socket; a match that provides the popular "cork and bottle" seal during mating. The grommet and the interfacial seal provides adequate sealing during environmental extremes. The GTC-M series is intermateable and intermountable with the standard GT series, and it uses standard M85049 style rear accessories. For more information on the GTC-M Series, request Product Data Sheet #181.

GT-PC Connectors for High Voltage Power Applications

The Amphenol® GT-PC connectors were developed for use in the High Voltage Power Distribution industry. Incorporating all the standard features of the popular GT series, these connectors will prevent accidental electrical shocks to the technicians. "Dead Front" pin contacts in size 0 are recessed into a socket insert, preventing inadvertent contact with a live circuit. Higher amperage levels are provided - up to 100 amps per contact. The GT-PC series has been UL approved. "First Mate - Last Break" features on one or more of the pins provide an additional measure of operator safety. Currently there are 5 insert patterns available. Consult Amphenol Industrial Operations for more information.

GT Connectors for the HMI Lighting Industry

Amphenol provides GT connectors for the rugged use experienced during stage shows and other entertainment events, even outside in the elements. The same 3-point bayonet coupling system and the same ruggedness to survive 2000 mating cycles are provided. The unique features of this connector series include color-coded receptacle shells with matching backshells on the cable plugs. The colors can be matched to specific wattage cables and/or light systems. A wide selection of environmental adapters designed to seal on the outside diameter of specific cable diameters can be fitted to the backshells. Applications for these connectors include power and control of lighting trusses, and portable power and dimmer racks. For more information request Product Data Sheet #174.

ARCL Series

Amphenol has developed a heavy duty 5015 type connector with 38999 Series III type coupling for use in mass transportation and heavy equipment applications. The ARCL Series has the same electrical characteristics as 5015 standard product but it has rugged ratchet double start stub threads. These rugged double stub threads eliminate mis-mating and provide for easy cleaning.

Other features/benefits of the ARCL connector series:

- 5 key/keyway alignment feature.
- Operating temperature is from -55°C to $+125^{\circ}\text{C}$.
Operating voltage is to 3000 VAC (RMS) at sea level.
- Crimp and solder termination available.
- 5 shell styles with all the 5015 insert patterns available.
- Supplied with low smoke, low halogen inserts which are flame retardant, but also can be supplied with standard 5015 inserts.
- Wide variety of backend accessories for all styles of cable and conduit, and a variety of cable strain reliefs including over-molding and heat shrink boots.
- RADSOK high amperage sockets can be incorporated.

Star-Line® Series

Amphenol/Pyle Star-Line Series is another heavy duty environmental cylindrical connector widely used in mass transportation and in the oil exploration market. Ideal for high amperage and high density control and instrumentation applications, this series has features and benefits as follows;

- Hard anodic coating for dielectric strength with heat and corrosion resistance.
- Operating temperature is from -67°F to $+257^{\circ}\text{F}$.
Amperages up to 1135 amps at 1000VAC or DC rating available.
- Double lead Acme threads provide complete coupling in one turn of the coupling nut, and do not clog under adverse weather conditions.
- Solder, crimp and pressure terminals; circuit breaking power and control types available.
- UL listed and CSA listed for circuit breaking capability.
- 5 shell styles with over 150 insert patterns.
- 3 retention styles with captive contacts or insertable/removable contacts.
- Variety of backend accessories including basketweave cable grips, straight or angled adapters and receptacles mounted to junction boxes.

Over-Molded Cable

Cables can be designed with custom overmold to Amphenol Industrial cylindrical connectors for almost any application in mass transportation or any other types of industrial markets. Overmold seals to the rear of the connector and to the cable jacket to provide moisture sealing. Cables may be designed to meet any environmental performance requirement and any electrical performance requirement. Variety of materials are available: neoprene, hypalon and others.

Consult Amphenol Industrial Operations for further information on these industrial products.

Amphenol® Star-Line® Series

Over-Molded Cable for Industrial Connectors

Additional Amphenol Industrial Products for the Rail Industry, cont.

Trans-Power® Connectors

Amphenol/Pyle provides head-end power connectors for commercial rail systems. These meet Amtrak specification D-77-24, APTA #RP-E-016. Features and benefits include:

- Slip-fit, double seated for environmental protection.
- Retention by receptacle cover or optional accessories.
- Crimp termination per Amtrak and APTA specifications.
- Socket contacts provide uniform pressure for low mating and unmating forces, low voltage drop, consistently low temperature rise and shock resistance.
- Operating ambient temperature is -57°F to $+110^{\circ}\text{F}$. Electrical performance up to 600 volts, 400 Amps.
- All molded elastomeric rubber body on jumper. Raintight per U/L standard.

Amphenol® Trans-Power® Connectors for Rail Mass Transit

27 Pole Train-line Receptacles and Jumpers

Amphenol/Pyle 27 pole MU (multiple unit) and communication receptacles and jumpers are provided for rail applications. Jumpers are either standard car to car, between locomotives or between locomotives and lead cars. These products are designed to Amtrak and APTA specifications. Other design features and benefits:

- Locomotive jumpers are keyed differently from all other 27 pole jumpers to prevent mis-mating. They also have identification markings to distinguish their proper usage on locomotives.
- Receptacles are a rugged aluminum housing with a spring loaded cover. Receptacles can be provided with or without leads.
- Push-pull mating.

Amphenol® 27 Pole Train-line Receptacle and Jumpers for Rail Mass Transit

Amphe-Y Composite Molded Connectors

The Amphe-Y is a new Amphenol product for mass transit application that uses RADSOK high amperage sockets. It is a molded interconnect system that provides rapid and safe connect and disconnect for traction motor installation and repair.

This packaging solution consists of a molded base plate, a silver-plated copper "connector" with RADSOK contacts, and a molded top cover. When attached to the traction motor, this unit creates a safe, reliable and efficient means of conducting high amperage current from the third rail or catenary to the propulsion controller. Each "leg" of this assembly can safely accommodate up to 1000 amps through the 18mm RADSOK contacts.

Amphenol has wide capabilities in designing specialty molded interconnect solutions, such as the new Amphe-Y, for power and/or harsh environment applications. Custom designs can include bayonet, threaded or push-pull coupling with crimp solder or pressure termination. They can utilize RADSOK or standard contacts and can be designed to meet specific environmental sealing requirements and temperature ratings.

Amphe-Y Molded Interconnect System for Rail Mass Transit
