Ohmite power Tap Switches (high power rotary switches) are constructed to provide dependable, convenient operation.

All Ohmite tap switches, from 15 to 100 amps, have ceramic arc-proof bodies and metal alloy contacts. Their all-soldered and all-riveted construction assures mechanical and operational integrity. Even the smallest Ohmite Tap

Switch, rated at 7 amps, has a reinforced non-metal body and solid metal alloy contacts. These units feature high current handling capability in a small package.

FEATURES

- · "Slow-breaking, Quick-make" action proved best for switching AC current.
- · Non-shorting type disconnects previous circuit before establishing contact for succeeding tap.

- · Ceramic and metal construction provides resistance to arcing, burning and charring.
- · Tandem assemblies available as standard models.
- UL listed for models 111, 212, 312 and 412
- RoHS compliant product available Jan. 2006 Add "E" suffix to part number to specify.

SPECIFICATIONS

Material

Body: Ceramic, arc-proof (models 212, 312, 412, 608). Compression Molded Polyester (model 111). Melamine Phenolic (model 711)

Contacts: Silver alloy. Common contact is rounded for assured seating. Self-cleaning with built in wiping action.

Terminals: Soldering. 711 also accepts quick connectors: 412. #10 screws; 608, 0.25" bolts.

Mounting

Model 711: Using 3/8-32 bushing for 1/8" thick maximum panel. Four non-turn lug positions are possible on the single, unenclosed switch. Recesses in body of switch permit positioning of non-turn washer at "12, 3, 6 and 9 o'clock." 3/16 " hole for non-turn washer. Shaft 1/4"

Model 111: For 1/4" panel, maximum, using ³/₈-32 bushing and hex nut. A ³/₁₆" hole is required for the non-turn washer. Shaft

Model 212: Using 3/8-32 threaded bushing and hex nut. A 5/32" hole is required for the non-turn pin. Shaft 1/4"

Model 312: For 1/4" panel, maximum, use three 10-32 flat-head machine screws 3/8" long. Shaft

Model 412: For 1/4" panel, maximum, use three 10-32 flat-head machine screws 3/8" long. A 5/16" hole in panel is required for shaft.

Model 608: For 1" panel, maximum, three flat-head machining screws ¹/₄-20, 1¹/₄" long. Drill a 7/16" hole in panel for shaft. Shaft 3/8"

NOTE: Since all tap switches are electro-mechanical devices, they are subject to wear and, therefore, have a finite life.
