Soldering and Rework System

Cartridge heater technology provides soldering and rework performance to suit even the most demanding SMT removal and placement applications. The cartridges provide fast thermal performance and respond quickly to the load demands. A small shaft diameter provides access to tightly cramped rework areas and enables the most difficult operations to be performed effortlessly.

Soldering Tip Heater Options

With hand soldering, the task is to make a quality solder connection, without damaging the substrate and without negatively impacting throughput. All of the standard MFR Series power tips & rework cartridges are designed for use with glass fiber (FR4) PCB substrates. This is denoted by the second letter in the part number: "F". For example: **SFP-CH10**, **DFP-CN3**, and **SFV-CNL10**.

However, some specialist applications require working with thermally demanding or temperature sensitive substrates, such as ceramic hybrids or flexible circuits. OK International has developed specialty heaters that quickly deliver the necessary power, but operate at temperatures that minimize the risk of substrate damage. These are denoted by replacing the "F" in the part number with a "T" for temperature sensitive or a "C" for demanding loads. Please contact your local representative for information and availability of specialty tip heaters. For example: **STP-CH10** and **DCP-CN3**.

F = Standard FR4 Substrate
T = Temperature Sensitive
C = Ceramic or Heavy Load

	SFP-CN05 Conical Cartridge, 0.5mm (.02")
	SFP-CNB04 Conical Cartridge Bent, 0.4mm (.016")
	SFP-CNB05 Conical Cartridge Bent, 0.5mm (.02")
	SFP-CNL04 Conical Cartridge Long Reach, 0.4mm (.016")
	SFP-DRH05 Drag Soldering Cartridge, Hoof 0.5mm (.02")
	SFP-DRH15 Drag Soldering Cartridge, Hoof 1.5mm (.06")
	SFP-DRH35 Drag Soldering Cartridge, Hoof 3.5mm (.14")
	SFP-DRK50 Drag Soldering Cartridge, Knife 5.0mm (.20")

To order specialty versions of the Soldering Tip Cartridges replace the "F" in the part number with the appropriate letter designate for your application when ordering:

T = Temperature Sensitive C = Ceramic or Heavy Load

Rework Cartridges

The Rework Cartridges are used with the MFR-HSR Soldering & Rework Hand-piece for conduction rework of surface mount components. The geometries are compatible with common SMT Chip and SOIC components.

The second digit denotes substrate material (damage tolerance). **F** = FR4 / Glass Fiber, for most standard applications. Two other series are also available; just replace F with either T or C.

T = Temperature Sensitive **C** = Ceramic or Heavy Load
