

VINNIC L1154 WATCH/PHOTO BATTERIES

	Dantona Part # V13GA Voltage: 1.5 Capacity: 100 Composition: ALKALINE Dimensions: 11.6MM X 5.4MM Connector: PRESSURE
---	--

This is a 1.5 volt alkaline button cell battery commonly used in laser pointers, watches, children books, calculators and medical devices. A button cell battery is a small, round battery that is 11.6mm(0.457 inch) in diameter and 5.4mm(0.21 inch) thick. An alkaline battery is a battery that uses manganese dioxide and zinc to create a reaction, and it is an economical alternative to silver oxide batteries, while still providing high capacity and long usage. This is a primary cell battery, and it is non-rechargeable. This alkaline button cell battery provides long power life and excellent continuous power sources to your device. Works effectively in both low and high temperature.

Battery Specifications:

- Nominal Voltage: 1.5 Volt
- Chemistry: Alkaline
- Height: 5.4mm
- Diameter: 11.6mm
- UPC: 039800049223

This alkaline button cell battery is used in:

- Watches
- Clocks
- Calculators
- Cameras
- Digital Cameras
- PDAs
- Remote Controls
- Camcorders
- Electronic Games
- Electronic Instruments
- MP3 Players
- Digital Voice Recorders
- Children Toys
- Blood Glucose, Cholesterol Testing Meters
- Many other electronic products
