

FIXED PRINTED CIRCUIT Metric Pin Spacing^a Tubular Screw Clamp

For use when standard size printed circuit terminal blocks are too large for available space or where a very small circuit board is utilized.

Our new subminiature design offers a low profile, an extremely small "footprint" and the highest circuit density available.

- Multipole, Single Mold Design
- Up to 7 Circuits Per Inch
- Pin Spacing is Maintained When Terminal Blocks are Placed End-to-End
- With Wire Protector
- Housing Material: Polyamide 6.6
- Standard Color: Gray

^aBlocks with US (Inch) pin spacing begin on page 110.

FIXED PRINTED CIRCUIT Metric Pin Spacing^a Tubular Screw Clamp

For wire-to-board connections in applications with strict budgets and where infrequent wire terminations are expected.

Our "mini" design offers a low profile and a small "footprint".

The popular AK500 is now offered in a single mold design as Type AK502. Please contact Altech for ordering information.

- Multipole, Modular Design
- Wire Protector Standard
- Housing Material: Polyamide 6.6
- Standard Color: Gray

Metric Pin Spacing^a
Screw-Cage Clamp

For wire-to-board connections in industrial applications and where frequent wire terminations occur.

- Multipole, Modular Design
- Housing Material: Polyamide 6.6
- Standard Color: AK300 is Gray, all others are green

^aBlocks with US (Inch) pin spacing begin on page 110.

AK300
45° Wire Entry

Pin Spacing 5mm (.197)
Stripping Length 7mm (.276)
Screw Hole Diameter 3.5mm (.138)

Minimum clearance, small footprint conserves valuable PCB real estate

AK(Z)250
Front Wire Entry

Pin Spacing 5.08mm (.200)^c
Stripping Length 7mm (.276)
Screw Hole Diameter 3.5mm (.138)

FIXED PRINTED CIRCUIT DOUBLE AND SINGLE LEVEL Metric Pin Spacing^a Screw-Cage Clamp

For wire-to-board connections in industrial applications and where frequent wire terminations occur.

Use Double Level where space requirements call for high density wiring.

- Multipole, Modular Design
- Housing Material: Polyamide 6.6
- Standard Color: Green

^aBlocks with US (Inch) pin spacing begin on page 110.

FIXED PRINTED CIRCUIT Metric Pin Spacing^a Dual Pin Screwless Spring Clamp

Choose from 3 methods of clamp actuation:

Type AK(Z)3000 - Insert a small screwdriver with a tip width up to 3mm (approx. 1/8") into slot in housing and push to open clamp.

Type AK(Z)3001KD - Push on grooved lever with screwdriver to open clamp.

Type AK(Z)3001FD - Simply push flat lever with finger to open clamp.

- Interlocking Sectional Design
- Stainless Steel Spring
- Front to Rear Pin Spacing, 5mm (.197 in.)
- Multipole Assemblies Supplied with End Plate Installed.
- Housing Material: Polyamide 6.6
- Standard Color: Light Gray

PLUGGABLE PRINTED CIRCUIT **Metric Pin Spacing^a** **Tubular Screw Clamp Plug**

For plug-in applications where infrequent wire-to-board connections are made and a very cost effective pluggable terminal block is needed.

Multipole assemblies are offered in modular interlocking design up to 12 poles or single mold construction up to 16 poles. While modular construction reduces and simplifies inventory, the single mold design provides maximum strength.

- Modular or Single Mold Design
- Wire Protector Standard
- Housing Material: Polyamide 6.6
- Standard Color: Gray

^aBlocks with US (Inch) pin spacing begin on page 110.

PLUGGABLE PRINTED CIRCUIT Metric Pin Spacing^a Pin Headers

STL130, STL132 (Straight) and STL140 (Right Angle) Pin Headers are used with the highly cost effective Tubular Screw Clamp Plugs, Types AK130 and AK132. in lighter duty applications where infrequent wire to board connections must be made. Type STL132 features a reduced pin diameter of 1.0mm (.0394") on the soldering side.

Open pin headers are supplied in strips up to 16 poles or in standard 24 pole lengths. The Pin Header strip features breakaway construction that eliminates cutting or sawing.

- Straight and Right Angle
- Strip Material: Polyamide 6.6
- Standard Color: Gray

^aBlocks with US (Inch) pin spacing begin on page 110.

STANDARD PLUGGABLE PRINTED CIRCUIT

Metric Pin Spacing^a

Screw-Cage Clamp Plug

For standard industrial plug-in applications where multiple wire-to-board connections must be made quickly and simultaneously.

Reduce wiring mistakes, downtime and facilitate troubleshooting. Simply unplug defective board and plug in a new one.

Horizontal and Vertical Headers are available in open and closed end designs. Refer to pages 148 to 149.

- Multipole, Single Mold Construction
- Industry Standard Compatible
- Locking Tabs Prevent Unplugging
- Optional Keying Prevents Misplugging^b
- Housing Material: Polyamide 6.6
- Standard Color: Green

^bFor Keying, refer to Accessories on page 150.

STANDARD PLUGGABLE PRINTED CIRCUIT Metric Pin Spacing^a Screw-Cage Clamp Plug

For standard industrial plug-in applications where multiple wire-to-board connections must be made quickly and simultaneously.

Two wire entry options increase plug accessibility. The shape of the plug facilitates plug-in and removal.

Horizontal and Vertical Headers are available in open and closed end designs. Refer to pages 148 to 149.

- Multipole, Single Mold Construction
- Industry Standard Compatible
- Locking Tab Prevents Unplugging
- Optional Keying Prevents Misplugging^b
- Housing Material: Polyamide 6.6
- Standard Color: Green^c

^aBlocks with US(inch) spacing begin on page 110.

PRINTED CIRCUIT ACCESSORIES

Convenient options that facilitate wire termination and increase wiring efficiency.

KEYING INSERTS

Use KI Keying Inserts to prevent misplugging of screw-cage clamp plugs in adjoining headers without loss of position. Incorrect plug installation can cause serious electrical damage to sensitive electronic circuits.

Type KI-AK Keying Insert is a precision molded profile that installs into parallel slots provided on the plug housing. Type KI-STL is a similar insert that installs into slots molded into the header housing.

When two of these inserts are located in corresponding slots on both the plug and header, the pair cannot be joined because the inserts interfere with one another. If the inserts are installed into separate slots on the plug and header, the pair will engage as usual.

Keying Inserts install quickly and easily and are held securely in place by a friction fit. You devise the pattern and select the quantity of inserts required for your application.

Packaged for convenient handling KI-AK and KI-STL Inserts are supplied on wheels of 6 inserts.

Factory keyed plugs and headers are available, please consult Altech with your keying requirements. Color: Red. Molding Material: Polyamide 6.6.

MARKING LABELS

Use KSO preprinted pressure sensitive labels for printed circuit board applications where changing requirements make it impractical to order and inventory hot stamp imprinted terminal blocks. Preprinted labels are quick and easy to apply to all Fixed and Pluggable Printed Circuit Terminal Blocks. Simply cut to required length and peel strip from card. Apply the strip to the terminal block by exerting finger pressure.

Marking cards contain 25 strips and are available in several standard number combinations. Select from consecutive ascending numbers 1 - 12, 13 - 24; consecutive descending numbers 12 - 1; and blank for hand marking. Custom Marking Labels with special character imprints are also available upon request. Imprint is black on white labels. Material: White PVC.

KI KEYING INSERTS

Type	Cat. No.	Std. Pk. Wheels/ Inserts	Use With Types

12 - 1	KSO121	30.098	5/125
Blank	KSO00	30.099	5/125

PRINTED CIRCUIT ACCESSORIES

HOT STAMP IMPRINTING

For high volume requirements or when it is impractical to apply PSA Marking Labels, use Hot Stamp Imprinting to provide positive circuit identification for Fixed and Pluggable Printed Circuit Terminal Blocks. Properly identified circuits increase wiring efficiency, save installation time and make wire hook-up, system modifications and trouble shooting quick and easy.

Hot Stamp Imprinting provides a permanent marking which will not rub, wear or wash off even when solvents are present.

Standard or custom imprint sequences are available for 2 to 24 pole positions. Imprints are centered above the wire entry.

Standard Imprint

- Character Style - DAVID
- Character Size: 8 Pt., 2.4mm (3/32 in.) high
- Standard Imprint Color: Black on Green Housing; White on Gray Housing
- Optional Imprint Color: White on Green Housing

Imprint Ordering

Standard Imprints can be specified and ordered by adding the required suffix after the Cat. No. and Type designation. Simply select the appropriate Ordering Suffix for the required Imprint Sequence.

Hot Stamp Imprints up to 12 poles are standard for US (inch) and metric (mm) spacings. For pricing purposes, they are considered to be one assembly.

Imprints with 13-24 poles are considered to be (2) assemblies. For pricing purposes, they are considered to be two assemblies.

Consult Altech for Hot Stamp Imprinting pricing, minimum order quantities and applicable lot charges.

Custom Imprints

Special number sequences and character combinations including letters, symbols and numbers are available. To order special sequences or combinations send us your imprint schedule. For die charges and minimum order quantities for your custom imprints, please consult Altech.

STANDARD IMPRINT

Ordering Suffix	Imprint Sequence	Imprint Description	Illustration
i A	(1, 2, 3, 4, ...)	Consecutive, Ascending, Left to Right	
i B	(... 4, 3, 2, 1)	Consecutive, Descending Left to Right	
i C	(... '4 '3 '2 '1)	Upside Down, Consecutive Descending, Left to Right	
i D	(1 '4 '3 '2 '1)	Upside Down, Consecutive Ascending, Left to Right	

Standard Imprint Example:

13 pole, Type AKZ350 Printed Circuit Terminal Block to be imprinted upside down with descending, consecutive numbers reading left to right should be ordered as below:

Type	Cat. No.
AKZ350/13iC	32.063iC
