

## 100EL11 5V ECL 1:2 Differential Fanout Buffer

### General Description

The 100EL11 is a 5V 1:2 differential fanout buffer. One differential input signal is fanned out to two identical differential outputs. By supplying a constant reference level to one input pin a single ended input condition is created.

With inputs open or both inputs at  $V_{EE}$  the differential Q outputs default LOW and  $\bar{Q}$  outputs default HIGH.

The 100 series is temperature compensated.

### Features

- Fairchild MSOP-8 package is a drop-in replacement to ON TSSOP-8
- Meets or exceeds JEDEC specification EIA/JESD78 IC latch-up test
- Moisture Sensitivity Level 1
- ESD Performance:
