### Restriction on the use of Hazardous Substances (RoHS)

At TE Connectivity (TE) , we're ready to support your RoHS requirements. We've assessed more than 1.5 million end items/components for RoHS compliance, and issued new part numbers where any change was required to eliminate the restricted materials. Part numbers in this catalog are identified as:

**RoHS Compliant** — Part numbers in this catalog are RoHS Compliant, unless marked otherwise. These products comply with European Union Directive 2002/95/EC as amended 1 January 2006 that restricts the use of lead, mercury, cadmium, hexavalent chromium, PBB, and PBDE in certain electrical and electronic products sold into the EU as of 1 July 2006.

NOTE: For purposes of this catalog, included within the definition of RoHS Compliant are products that are clearly "Out of Scope" of the RoHS Directive such as hand tools and other non-electrical accessories.

NOTE: Information regarding RoHS compliance is provided based on reasonable inquiry of our suppliers and represents our current actual knowledge based on the information provided by our suppliers. This information is subject to change. For latest compliance status, refer to our website referenced at right.

### Getting the Information You Need

Our comprehensive on-line RoHS Customer Support Center provides a forum to answer your questions and support your RoHS needs. A RoHS FAQ (Frequently Asked Questions) is available with links to more detailed information. You can also submit RoHS questions and receive a response within 24 hours during a normal work week. The Support Center also provides:

- Cross-Reference from Non-compliant to Compliant Products
- Ability to browse RoHS Compliant Products in our on-line catalog
- Downloadable Technical Data Customer Information Presentation
- More detailed information regarding the definitions used above
- So whatever your questions when it comes to RoHS, we have the answers at www.te.com/leadfree

# PC/104 and PC/104-*Plus* Connectors

## Product Facts

- **Press fit design — eliminates hand soldering**
- **Unitized PC/104 connector assembly — eliminates two piece (64 pin & 40 pin) configuration**
- **Integral board spacers with captive hardware — eases & improves assembly efficiency while minimizing stocked hardware**
- **"Flat-rock" insertable — no need for complex insertion tooling**
- **Recognized by Underwriters' Laboratories to US and Canadian standards file No. E28476**
- **Fully compliant with PC104 & PC104-*Plus* standards**
- **Solutions available for lead free processes (ie. ENIG and silver immersion plated PCB's)**

The PC/104 and PC/104-*Plus* connectors are industry standard product offerings which comply with the interconnection requirements defined by the PC/104 organization (http://www.pc104.org)

Both products are designed specifically for "flat-rock" press-fit installation for ease of application. Solder version is also available.

Optional integral standoffs minimize the customer's system assembly time.

The TE offering of the standard PC/104 product is a unitized connector rather than the two piece, 40 and 64 position connectors currently on the market. Customer needs to stock and apply only one part number rather than two.

### Performance Specifications

#### Electrical Characteristics

Meets requirements of PC/104 and PC/104-*Plus* standards

**Nominal Resistance** — 10 milliohms maximum, $\Delta$ R

**Insulation Resistance** — 1000 megohms minimum

**Dielectric Withstanding Voltage** — 500 VAC for 1 min. at sea level

#### Mechanical Characteristics

Meets requirements of PC/104 and PC/104-*Plus* standards

**Current** — Signal application only

**Temperature** — –55° to 105°C

#### Material and Finish

**Housing** — Black Thermoplastic, UL 94V-0

**Contact** — Phosphor Bronze, Full Gold all over Nickel (stackthrough), Gold on mating end, Tin or Tin-lead on PCB tail all over Nickel (non-stackthrough)

### Need more information?

Call Technical Support 1-800-522-6752:

Technical Support is staffed with specialists well versed in all TE products. The Center can provide you with:

- Technical Support
- Catalogs
- Technical Documents
- TE Authorized Distributor Locations

### Technical Documents

# Board-to-Board Vertical Receptacles and Headers

## Product Facts

- **Surface-mount products for parallel board-to-board applications, as well as right-angle board-to-board and cable-to-board applications**
- **High density .050 x .050 [1.27x1.27] centerline grid**
- **Three board-to-board stack heights: .250 [6.35], .320 [8.13] and .390 [9.91]**
- **Non-protrusive metallic holddowns**
- **Reliable dual beam receptacle contacts for redundant contact**
- **Duplex plated receptacle and post contacts; gold plated on mating areas, tin plated on tails**
- **Compatible with standard surface-mount processing (VPR and IR)**
- **Receptacle and header allow for drainage of processing fluids**
- **Tape and reel packaging available. Contact TE for details**
- **Polarized header and receptacle assemblies**
- **Sizes of 10, 20, 30, 40, 50, 60, 70, 80 and 100 positions**
- **Recognized under the Component Program of Underwriters Laboratories Inc., File No. E28476**
- **Certified by Canadian Standards Association File No. LR7189**

AMPMODU 50/50 Grid Vertical Headers and Receptacles are designed for parallel board-to-board stacking in high density applications.

Right-angle board-to-board and cable-to-board applications are also possible, since the vertical receptacles also mate with non-latching right-angle headers (page 19) and the vertical headers also mate with non-latching cable connectors.

Available are double row, vertical shrouded headers and receptacles in sizes ranging from 10 through 100 positions (in 10 position increments).

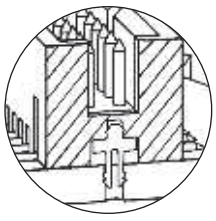

Parallel board-to-board stack heights of .250 [6.35], .320 [8.13] and .390 [9.91] are achievable by selection of the appropriate header. The receptacle is the same for all three stack height headers.

Non-protrusive metallic holddowns are designed for use in .062 [1.57] or thicker PC boards and allow surface mounting to both sides of the board. In addition to providing retention during processing, the holddowns are soldered during reflow and therefore provide long-term strain relief for the solder joints.

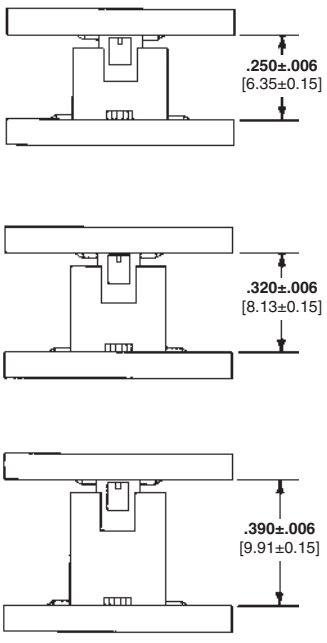

AMPMODU 50/50 Grid Vertical Headers and Receptacles are designed to be compatible with standard surface-mount processes; IR (infrared) and VPR (vapor phase reflow). The surface-mount connectors have been designed so that dimensioning, tolerances, referenced datums, holddown characteristics and packaging methods result in a system that is compatible with robotic assembly.

The headers and receptacles feature polarization to prevent misalignment.

### Non-Protrusive Metallic Holddowns

## Board-to-Board Right-Angle Headers

### Product Facts

- **Surface-mount products for right-angle board-to-board and cable-to-board applications**
- **Double-row, right-angle shrouded headers**
- **High density .050 x .050 [1.27 x 1.27] centerline grid**
- **Latching and non-latching versions available**
- **Non-protrusive metallic holddowns**
- **Metallic tabs, when soldered to PC board pad, provide added mechanical support**
- **Duplex plated post contacts; gold plated on mating area, tin plated on tails**
- **Compatible with standard surface-mount processing (VPR and IR)**
- **Standoffs on header housings allow for drainage of processing fluids**
- **All headers are polarized**
- **Sizes of 10, 20, 30, 40, 50, 60, 70, 80 and 100 positions**
- **Recognized under the Component Program of Underwriters Laboratories Inc., File No. E28476**
- **Certified by Canadian Standards Association File No. LR7189**

AMPMODU 50/50 Grid Right-Angle Headers will accommodate a variety of high density packaging applications; right-angle board-to-board applications when mated with vertical receptacles (page 15) and right-angle cable-to-board applications when mated with cable connectors (page 21). The small .050 x .050 [1.27 x 1.27] centerline contact spacing allows efficient use of the PC board area.

Mechanical support of the headers to the PC board is provided by non-protrusive metallic holddowns designed for .062 [1.57] or thicker PC boards. These holddowns are of the same design as those used in the vertical headers (page 16) and receptacles (page 15). There are also metallic tabs that are soldered to the surfaces of the PC board pads for added support.

AMPMODU 50/50 Grid Right-Angle Headers are available in double-row, in either latching or non-latching versions, and in sizes ranging from 10 through 100 positions (in 10 position increments). The latching version provides positive retention when mated with the latching cable connector (page 21). All headers feature polarization to help prevent misalignment during mating.

## Cable-to-Board Connectors

### Product Facts

- **Double-row receptacle connectors provide cable-to-board connection capabilities for vertical headers (non-latching) and right-angle headers (latching and non-latching)**
- **IDC (Insulation Displacement Crimp) mass termination of solid or stranded round conductor .050 [1.27] centerline ribbon cable with PVC or polyethylene insulation**
- **Accommodates ribbon cable conductor sizes of 28 AWG [0.08-0.09 mm$^2$] and 30 AWG [0.05 mm$^2$] and insulation diameters up to .036 [0.91] maximum**
- **Reliable single beam receptacle contact design**
- **Duplex plated receptacle contacts; gold plated in mating area, tin in termination area**
- **Terminating covers (sold separately) provide both strain relief and protection to the termination area**
- **Sizes of 10, 20, 30, 40, 50, 60, 70, 80 and 100 positions**
- **Connectors available with or without metal latch**
- **Connectors without latches are polarized to help prevent mismating**
- **Recognized under the Component Program of Underwriters Laboratories Inc., File No. E28476**
- **Certified by Canadian Standards Association File No. LR7189**

These double-row cable connectors, with a .050 x .050 [1.27 x 1.27] centerline contact spacing, provide cable-to-board connection capabilities for the AMPMODU 50/50 Grid Connector System. Cable connectors without a latch will mate with the vertical headers (page 16), while cable connectors with or without a latch can be used to mate with the right-angle headers (page 19).

The cable connectors feature reliable single-beam IDC (insulation displacement crimp) contacts which are duplex plated with .000030 [0.00076] gold. These contacts can be mass terminated to either solid or stranded round conductor ribbon cable with conductor sizes of 28 AWG [0.08-0.09 mm$^2$] and 30 AWG [0.05 mm$^2$] and a maximum insulation diameter of .036 [0.91]. During termination, the terminating covers, which must be purchased separately, assist in guiding the wire into the IDC contacts, then provide strain relief when fully seated. Actual termination is accomplished with the TE manual tooling shown on page 23.

The latching version of the cable connector is equipped with a metal latch which provides positive retention of the receptacle cable connector when mated with a surface-mounted right-angle header. The cable connector without a metal latch features polarization to help prevent mismating. All connectors are available in sizes ranging from 10 through 100 positions (in 10 position increments).

## Application Tooling for Cable Connectors

The Manual Miniature Application Frame Assembly 91295-1, equipped with a Cover Closing Kit 543518-1, is used for the IDC termination of ribbon cable to the cable connectors shown on page 21.

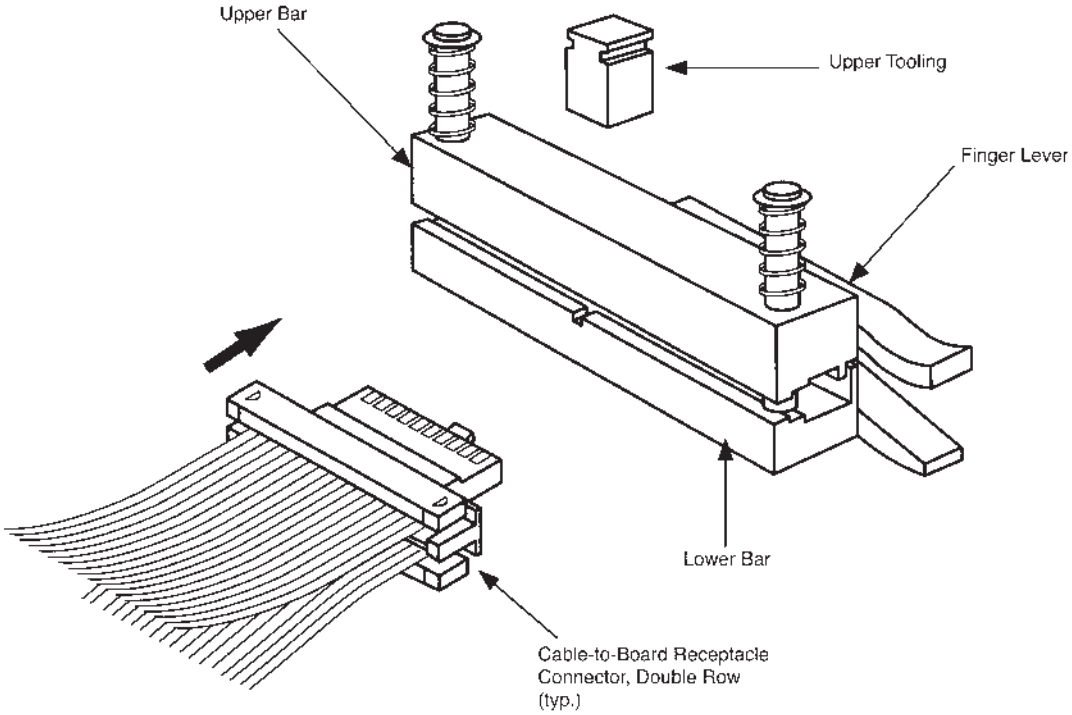

Prior to termination, the covers must be partially assembled onto a connector housing, the cable inserted between the covers and contacts and the covers preclosed by hand, clamping the cable in place.

In the Manual Miniature Application Frame Assembly, the covers are fully seated to complete the mass termination and provide strain relief for the completed connection.

For tooling information, call Technical Support Center **1-800-522-6752.**

**Manual Miniature Application Frame Assembly 91295-1 with Cover Closing Kit 543518-1**

**Note:** Refer to Tyco Electonics Instruction Sheets 408-9817 (Frame Assembly 91295-1) and 408-9909 (Cover Closing Kit 543518-1) for complete termination/tooling information.

**Note:** All part numbers are RoHS compliant.

## Performance Specifications

### Board-to-Board Connectors, Vertical and Right-Angle

**Mating Force:** 6.4 oz (1.78 N] max. per contact
**Unmating Force:** 1.0 oz [0.28 N] min. per contact
**Durability:** Tested to 200 cycles min.
**Current Rating:** (30°C T rise): .5 ampere per contact
**Operating Temperature Range:** -65°C to +105°C
**Termination Resistance:** 16 milliohms max. (initial)
**Insulation Resistance:** 5000 megohms min. (initial)
**Dielectric Withstanding Voltage:** 300 VAC

### Cable-to-Board Connectors

**Mating Force:** 6.4 oz (1.78 N] max. per contact
**Unmating Force Without Latch:** .5 oz [0.14 N] min. per contact
**Durability:** Tested to 200 cycles min.
**Current Rating:** (10°C T rise): .5 ampere per contact
**Operating Temperature Range:** -65°C to +105°C
**Termination Resistance:** 25 milliohms max. (initial and final)
**Insulation Resistance:** 5000 megohms min. (initial)
**Dielectric Withstanding Voltage:** 300 VAC

## Technical Documents

Various technical documents are available for your use:

**Product Specifications** describe technical performance characteristics and verification tests. They are intended for the Design, Component and Quality Engineer.

## AMPMODU System 50 Connectors

The AMPMODU System 50 connector family includes a wide variety of high density board-to-board (thru-hole and surface-mount) and cable-to-board connectors. AMPMODU System 50 is composed of one- and two-row receptacles and post headers on .050 x .100 [1.27 x 2.54] spacing between contacts for extreme density and efficient use of printed circuit board area.

AMPMODU System 50 receptacles and header assemblies can be categorized in three groups: board-mount headers, board-mount receptacles and cable-to-board receptacles. Receptacle contacts and mating .015 [0.38] square posts are formed from high conductivity copper alloy and are selectively plated with gold to promote higher performance and reliability.

Board-mounted thru-hole post headers and receptacle connectors are available for right-angle and vertical mating configurations. Surface-mounted connectors are available in vertical, double row styles for parallel stacking applications. Shrouded post headers provide polarization to mating cable receptacles and aid alignment of mating connectors. Unshrouded headers allow close stacking of daughter cards. Vertical stacking connectors space parallel mated boards as shown in the illustration on page 63. Housings on all board-mount assemblies are made of high temperature tolerant materials and incorporate stand-offs for free drainage of flux cleaning solutions.

Cable-to-board connectors have integral latches for positive locking to shrouded mating headers (thru-hole or surface-mount). Ribbon cable connectors mass terminate 30 AWG [0.05 $mm^2$] solid and 32 AWG [0.03 $mm^2$] stranded, .025 [0.64] centerline ribbon cable with PVC or Teflon® insulation.

Connectors for mass termination to FFC cable or flexible etched circuitry have dual beam contacts; options include shielded cable and solder tabs. Both types of cable connectors are available as component parts and as completed assemblies.

The variety of components and application possibilities, combined with small size and outstanding quality, make AMPMODU System 50 suitable for high density systems.

- **Recognized under the Component Program of Underwriters Laboratories Inc. File No. E28476**
- **Certified by Canadian Standards Association*, File No. LR 7189**

*CSA certification pending on certain products, as noted.

**Dimensioning:**

Dimensions are in inches and millimeters. Values in brackets are metric equivalents. Metric symbols used are:

mm (millimeter)
cm (centimeter)
m (meter)
$mm^2$ (square millimeter)
C (Celsius)
N (newton)
kg (kilogram)

- **Produced under a Quality Management System certified to ISO 9001**

A copy of the certificate is available upon request.

Teflon® is a trademark of E.I. du Pont de Nemours and Company.

# Thru-Hole Headers—Shrouded, .050 x .100 [1.27 x 2.54] Centerline, Board-to-Board

## Product Facts

- **High density; contacts spaced on .050 x .100 [1.27 x 2.54] centers**
- **Single row; select sizes 4 thru 50 positions**
- **Double row; select sizes 10 thru 100 positions**
- **Stand-offs for ease of cleaning**
- **High temperature tolerant thermoplastic housings**
- **Shrouded and unshrouded headers available in single and double row, vertical and right-angle configurations**

The AMPMODU System 50 interconnection system is designed to better meet industry's need for a high density interconnect system. The Board Mounted Thru-Hole Headers are available in shrouded and unshrouded versions. They are composed of single and double row post headers with .050 x .100 [1.27 x 2.54] spacing between contacts for extreme density and efficient use of printed circuit board area. The headers are available in 4 through 50 positions, in a single row configuration, and 10 through 100 positions, in a double row design.

Board mounted post headers are available in right-angle and vertical configurations. Shrouded post headers provide polarization and alignment features for mating printed circuit boards and cable connectors, while unshrouded headers allow close stacking of daughter cards. Housings for the headers are made of black thermoplastic material with a 94V-0 rating. The housings have stand-offs for free drainage of flux cleaning solutions.

# Thru-Hole Receptacles, .050 x .100 [1.27 x 2.54] Centerline, Board-to-Board

## Product Facts

- High density; contacts spaced on .050 x .100 [1.27 x 2.54] centers
- Right-angle and vertical styles
- Single row; select sizes 5 thru 50 positions
- Double row; select sizes 10 thru 100 positions
- Contacts are selectively plated with gold
- Stand-offs for removal of solder flux

The AMPMODU System 50 thru-hole receptacles offer a wide variety of high density board-to-board connectors. The .050 [1.27] spacing between each contact provides an extremely dense interconnect package and results in a more efficient use of the printed circuit board space.

AMPMODU System 50 thru-hole receptacles are available in right-angle and vertical configurations and are composed of single and double row versions. The single row versions are available in select sizes of 5 thru 50 positions and double row in positions from 10 thru 100.

Receptacle contacts and mating .015 [0.38] square posts are formed from high conductivity copper alloy and are selectively plated with gold for higher performance and reliability. The receptacle housings are made of black thermoplastic, with a 94V-0 rating to withstand high temperatures of reflow soldering and incorporate stand-offs for free drainage of flux cleaning solutions.

# Surface-Mount Connectors, .050 x .100 [1.27 x 2.54] Centerline, Board-to-Board

## Product Facts

- **Surface-mount option for parallel board-to-board applications; completely intermateable with AMPMODU System 50 thru-hole board-to-board and cable-to-board systems**
- **Double row, vertical, shrouded header and receptacle assemblies**
- **Available in select sizes from 10 through 100 positions**
- **High Density; contacts spaced on .050 x .100 [1.27 x 2.54] centers; compact footprint**
- **Compatible with standard surface-mount processes**
- **Stand-offs for free drainage of flux cleaning solutions; visible solder joints for easy inspection**
- **Simple, low insertion-force holddown for process retention and long-term strain relief for solder joints**
- **Available in tape and reel packaging (with vacuum covers) for automatic placement.**

The high-density surface-mount connector is another mounting option in the AMPMODU System 50 connector family.

This surface-mount system is fully intermateable with the AMPMODU System 50 thru-hole and cable-to-board connectors.

Additionally, the design of the mating interface has not been changed, maintaining the same high reliability as the thru-hole product.

The surface-mount system includes double row, vertical, shrouded header and receptacle assemblies in select sizes from 10 through 100 positions. It meets the tight dimensional requirements of surface-mount technology. The simple, low insertion-force holddown provides both processing retention and long-term strain relief for the solder joints in the headers and receptacles.

# Cable-to-Board Connectors, .050 x .100 [1.27 x 2.54] Centerline FFC Cable

## Product Facts

- **Signal application only, 1.5 amperes maximum single circuit**
- **Single or double row connectors**
- **Terminates flexible flat conductor cable and flexible etched circuitry**
- **Shielded cable provides for customizing**
- **Center latch housing providing positive latching**

The cable-to-board .050 [1.27] center FFC receptacle connectors are part of the AMPMODU System 50 family for terminating flexible flat conductor cable and flexible etched circuitry.

The FFC receptacle uses a dual beam contact with 30 microinches of gold plating. The FFC receptacle connectors have an integral latch for positive locking to shrouded mating headers.

Flexible flat conductor cable is a planar parallel conductor cable. It can be used as a one-to-one connector or as a complex harness, allowing split-outs and special routing. The cable is comprised of .026 [0.66] wide x .003 [0.08] thick conductors made of copper per QQ-C-502 and insulated with a flame retardant polyester film.

The FFC contacts are available in receptacle and solder tab. Receptacle contacts are made of phosphor bronze with a finish of plated gold duplex, while the solder tab contacts are finished in a bright tin-lead overall.

The complete product line provides solder tabs for board mounting at low cost and custom shielding of the cable.

### Custom Designed Cable Assemblies

TE can supply customized flexible flat conductor cable assemblies using the components shown on pages 48 thru 54. Typical examples of these cable assemblies are shown to the right.

And, to meet the internal shielding requirements of today's complex electronic equipment, custom designed shielded FFC cable assemblies can be made to your specific specifications.

# Cable-to-Board Connectors, .050 x .100 [1.27 x 2.54] Centerline, Ribbon Cable, System 50

## Product Facts

- **Preassembled housing and cover**
- **One step termination**
- **End and daisy chain termination**
- **Positive end latching of connector to shrouded headers**
- **Terminates 30 AWG [0.05 mm²] solid or stranded and 32 AWG [0.03 mm²]* stranded .025 [0.64] centerline ribbon cable with PVC insulation**
- **0.5 ampere current rating (limited by cable)**

The AMP-LATCH System 50 Ribbon Cable connector is a receptacle connector that will terminate ribbon cable on .025 [0.64] centerlines. It is available in select sizes from 10 to 100 positions and will accommodate 30 AWG [0.05 mm²] solid or stranded and 32 AWG [0.03 mm²] stranded conductors, with PVC cable insulation.

The housing and cover (black) have a 94V-0 rating. A copper alloy single mating beam contact provides the interconnect between the conductor and the .015 [0.38] square posts on the .050 x .100 [1.27 x 2.54] grid. The contacts are plated with 30 gold duplex plating. The latching feature is located on the receptacle, not the header, and saves board space and eliminates future problems of “latch height compatibility.”

# Double Row Receptacles, .050 x .100 [1.27 x 2.54] Centerline, Cable-to-Board, Ribbon Cable, System 50

## Material and Finish

**Housing** — Black thermoplastic, 94V-0 rated

**Latches** — Stainless steel

**Contacts** — Copper alloy, plated gold over nickel with tin in termination area

## Flat Ribbon Cable, PVC Insulation

### 30 AWG [0.05 mm²], Solid Bare Copper

#### Product Specifications

**Voltage** —150 Volts

**Impedance** — 80 Ohms Nominal (GND,SIG, GND, applies to 30AWG Solid Bare Copper)

**Capacitance** — 19.2 pf/ft at 1 MHz nom.

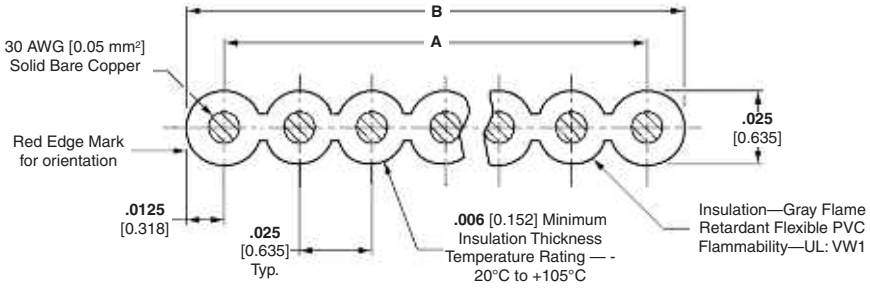

**Propagation Delay** — 1.51 ns/ft nom.

**Crosstalk** —
10 ft sample 5 ns rise time:
Near End — 4.0% max.
Far End — 6.0% max.

**UL Listing** — STYLE 2678

**Recognized under the Component Program of Underwriters Laboratories Inc., File No. E53793**

**Certified by Canadian Standards Association, (CSA File No. LL83498)**

# Application Tooling for Flexible Film Contacts

## Hand Crimping Tool Assemblies (for repair purposes)

**Part No. 90273-5**—for .100 ℄ Multi-Crimp Contacts (408-9564)

### Extraction Tools for .100 ℄ Contacts

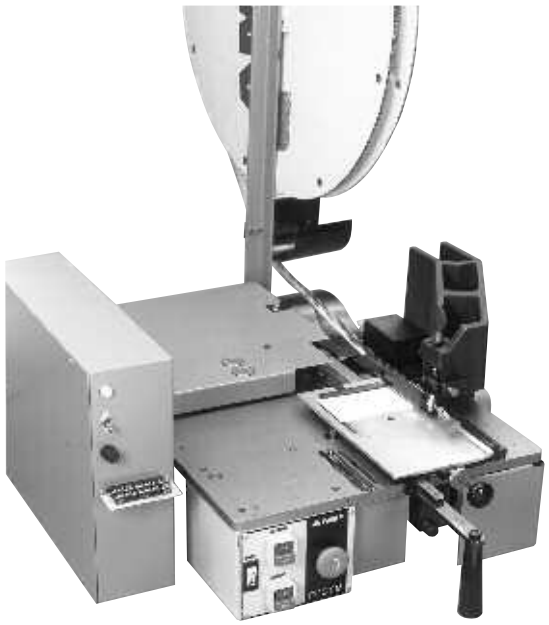

**Tool No. 91200-□***— for Receptacle Housings with **Side Locking Lance Slot** (408-7916)

**Tool No. 91047-□***— for Receptacle and Pin Housings with **End Locking Lance Slot** (408-7384)

*Consult TE for specific dash nos.

For tooling information, contact the Technical Support Center: **1-800-522-6752.**

## Flexible Film Termination Machine (Terminates Continuous Strip Contacts Sequentially)

The flexible film semiautomatic bench machine for terminating .050 [1.27] and .100 [2.54] centerline flexible flat conductor cable (FFC), flexible etched circuitry (FEC), and flexible printed wiring (FPW) with AMP FFC reel-mounted contacts. For each cable or circuitry, the contacts are automatically applied one-at-a-time in a straight sequence. To skip positions, an optional programmer control box is available. Crimp height is easily adjustable in .0002 [.0051] increments. Termination rates up to 200 contacts per minute.

| Description | Machine Part Numbers | |
|---|---|---|
| | Machine | Machine With Programmer* |
| .100 [2.54] ℄, Multi-Crimp, 120 V | 224910-1 | 318619-1 |
| .100 [2.54] ℄, Multi-Crimp, 240 V | 224910-2 | 318619-2 |
| .100 [2.54] ℄, ARINC, 120 V | 224910-3 | 318619-3 |
| .050 [1.27] ℄, Multi-Crimp, 120 V | 224910-4 | 318619-4 |
| .050 [1.27] ℄, Multi-Crimp, 240 V | 224910-6 | 318619-6 |

*The Programmer Kit (**Part No. 356484-1**) may be purchased with a new machine, or separately for adding onto an existing machine.

## Application Tooling for Compliant Pin Connectors

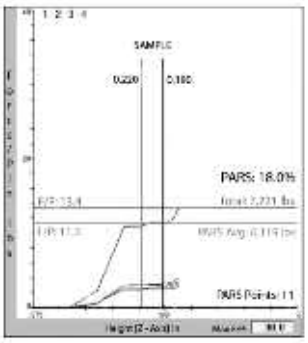

### ASG Servo Electric Presses for Compliant Pin Connectors

TE offers the ASG line of servo electric presses for the application of compliant pin products. Systems are available in a wide range of pressing forces, board size capabilities and automation levels to meet almost any applications requirements. Each system utilizes a servo electric motor with PC control. Coupled with force and distance monitoring and control, the entire line provides 100% quality assurance in real-time with SPC data collection capabilities. Automatic set up and a graphical operator interface help provide intuitive operation to help reduce common and costly operator errors.

### Press Force Monitoring for Scrap Avoidance

Every TE ASG servo press utilizes real-time force and distance monitoring and control. This allows the press to identify an error and react throughout the press stroke. Common problems such as PCB holes above\below specification and sometimes bent pins can be detected by monitoring both minimum and maximum force parameters. Common operator error such as improperly placed connectors, missing\incorrect connector or tooling can also be found by monitoring premature or missing force parameters. In each case, the system can stop during the press cycle to avoid costly scrap and rework.

### Product Line Overview

| | BMEP | MEP | AEP 6T | AEP 12T |
|---|---|---|---|---|
| System Type | Benchtop<br>Semi-Automatic Press | Stand-Alone<br>Semi-Automatic Press | Stand-Alone<br>Automatic Press | Stand-Alone or<br>Inline Automatic Press |

## Application Tooling for Ribbon Cable Connectors

These application tools are designed for one-step termination of ribbon cable connectors to planar, ground plane and shielded/jacketed ribbon cable on .025 [0.64] centers. A complete set of tooling consists of an Arbor Tool (manual, Part No. 91085-2 or pneumatic, Part No. 91112-3), a Base Assembly, Part No. 768338-4 and a Connector Specific Kit, Part No. 679167-1 (receptacle).

**Pneumatic Auto-Cycle Tool Part No. 91112-3**

**Manual Arbor Tool Part No. 91085-2**

## Technical Documents

The following is a list of technical documents covering the application, performance and maintenance of AMPMODU System 50 connectors.

**Product Specifications** describe technical performance characteristics and verification tests. They are intended for the Design, Component and Quality Engineer.

108-1093—AMPMODU System 50 Interconnection System, Board-to-Board

108-1109—AMPLATCH System 50 Receptacle and Paddleboard Connector

108-16022—Connector System, .050 [1.27] Centerline FFC Cable

108-16025—Connector, ZIF-Line 50

108-16029—Shielded Flexible Flat Conductor Cable

108-40002—Flexible Flat Conductor Cable

**Application Specifications** describe requirements for using the product in its intended application and/or crimping information. They are intended for the Packaging and Design Engineer and the Machine Setup Person.

114-16008—Multiple Crimp Contact for .050 [1.27] Centerline FFC and FEC Cable

114-16014—AMP ZIF-Line 50 & 100 PCB Connectors

114-25029—AMPMODU System 50 Ribbon Cable Connectors

114-25031—AMPMODU System 50 Thru-Hole Connectors

114-25035—AMPMODU Surface-Mount Connectors

114-25040—AMPMODU System 50 Paddleboard Connectors

**Instruction Sheets** provide instructions for assembling or applying the product. They are intended for the Manufacturing Assembler or Operator.

408-6732—Pneumatic Arbor Tool, Part Number 91112-3 (Auto-Cycle)

408-7384—Extraction Tool, Part Number 91047

408-7763—Pneumatic Arbor Tool, Part Number 91112-2

408-7777—Manual Arbor Tool, Part Number 91085-2

408-7916—Extraction Tool, Part Number 91200

408-9827—Universal Base Assembly, Arbor Tool, Part Number 768338-1

408-9872—Connector Specific Kit, Part Number 679167-1, AMPMODU System 50 Receptacle Connectors (.025 [0.64] Centerline Cable)

408-9928—Connector Specific Kit, Part Number 679176-1, AMPMODU System 50 Paddleboard Connectors (.025 [0.64] Centerline Cable)

# AMPMODU 2mm Connectors (Board to Board)

## Product Facts

- **2.0 x 2.0 [.08 x .08] centerline spacing**
- **Two-piece, double-row connector system**
- **Unshrouded header styles include; breakaway and surface-mount**
- **All headers with 0.5 [.02] square posted contacts**
- **Surface-mount connectors compatible with standard surface-mount processing (VPR, IR)**
- **Closed top-entry receptacle assemblies include; vertical mount and right-angle**
- **Receptacle contacts employ dual cantilever beams for two-point electrical stability**
- **Duplex (gold/tin-lead) plated posted contacts and receptacle contacts**
- **Thermoplastic housing material, UL 94V-0 rated**
- **Recognized under the Component Program of Underwriters Laboratories Inc., File No. E28476**
- **Certified by Canadian Standards Association, File No. LR7189**
- **Produced under a Quality Management System certified to ISO 9001**

A copy of the certificate is available upon request.

AMPMODU 2mm connectors reliably and economically meet the packaging and inter-connection requirements of today's miniature sophisticated electronics. They are ideal for mobile and portable personal computers and disk drive applications. In today's marketplace, 2mm is expanding over many other industry segments due to space constraints.

This versatile double-row connector system is comprised of various straight and right-angle posted headers for thru-hole and surface mounting and several closed top-entry receptacle assemblies for vertical and horizontal mounting. Headers and receptacle assemblies are available in selected sizes ranging from 4 through 80 positions.

Thru-hole breakaway headers feature brass straight or right-angle posts with a post length of 4.0 [.16] and a lead length of 2.6 [.10].

The receptacle assemblies employ phosphor bronze contacts with dual cantilever beams and built-in anti-overstress. This feature, coupled with duplex (gold/tin-lead) plating of the header posts and receptacle contacts, provide superior electrical performance as well as excellent solderability.

# 2mm Headers, Unshrouded, Double Row, Thru-Hole, Right-Angle Mount

## 0.5 [.02] Square Straight Posts

### Material and Finish

**Housing** — Black thermoplastic, UL 94V-0 Rated, 265°C Process Capable

**Posted Contacts** — Copper alloy, duplex plated as follows:

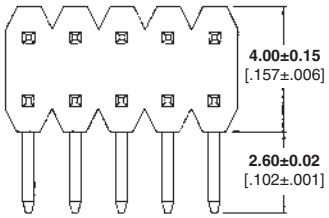

0.00020 [.000008] min. gold on contact area, 0.00254 [.000100] min. tin on solder area, with entire contact underplated 0.00127 [.000050] min. nickel

# 2mm Headers, Shrouded, Double Row, Thru-Hole, Right-Angle Mount

## 0.5 [.02] Square Right-Angle Posts with Cable Shroud

### Material and Finish

**Housing** — Black thermoplastic, UL 94 V-0 Rated

**Posted Contacts** — Brass, duplex plated as follows:

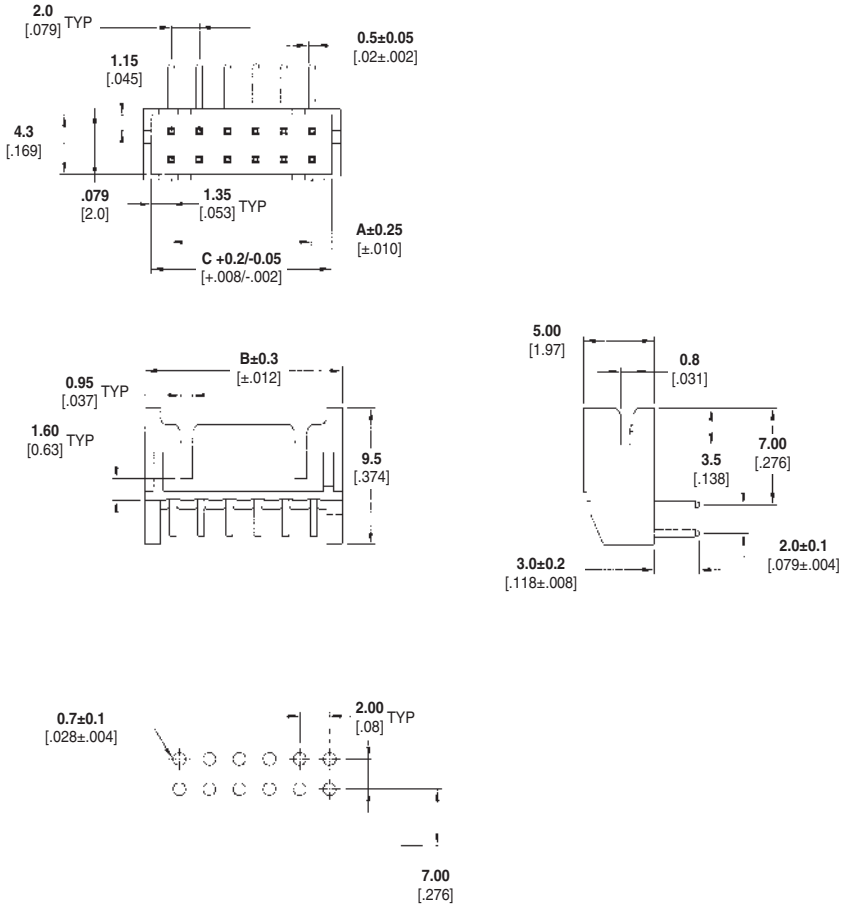

0.00254 [.000100] min. tin on contact area, with entire contact underplated 0.00127 [.000050] min. nickel

## AMPMODU .025 [0.64] Square Interconnection System

The AMPMODU interconnection system provides interconnections with a unique modular concept, utilizing precision formed receptacle contacts and mating posts.

Mating of the post and receptacle contacts of this system is very tolerant. This is made possible by a post with a burr-free lead-in and a receptacle contact featuring double cantilever beams and anti-overstress stops.

AMPMODU receptacle contacts and posts categorically fall into three general classifications of products, which include: board mounted posts and receptacle assemblies, post headers and wire-applied contact housings for crimp snap-in pin and receptacle contacts.

Board mounted receptacle assemblies are available in various geometries, offering packaging interconnections that include perpendicular, parallel and stacking capabilities.

Crimp snap-in pins for 26-22 AWG [0.12-0.4 $mm^2$] wire and crimp snap-in receptacles for 32-20 AWG [0.03-0.6 $mm^2$] wire provide excellent discrete wire terminations. Housings for these contacts provide ease of handling terminations in high density applications.

Machine applied terminations, through matched application equipment, are geared for virtually any production volume requirement, for the lowest possible applied cost.

AMPMODU mating posts are supplied typically as headers. They are available in various populations to meet the interconnection and packaging requirements of most systems. However, in instances where packaging configurations do not lend themselves to the economies of headers, TE can provide application equipment for the discrete location of individual posts.

Looking at the electronic industry's standard “levels of packaging,” the AMPMODU .025 [0.64] square interconnection system is primarily used in levels three and four.

In level three it is used as a connection between two or more printed circuits. A mother/daughter board connection is typical. In level four it is used as a connection between two subassemblies, such as a power supply and an associated subassembly.

It is also important to note this product can serve as an interconnection in more than one level, depending on the application.

The .025 [0.64] square interconnection system offers the most complete line of post/receptacle packaging products available today. This system, rated at 3 amperes per contact, has been used by almost every industry and marketplace over the last decade and is one of the oldest, most versatile and reliable interconnection systems employing .025 [0.64] square packaging technology.

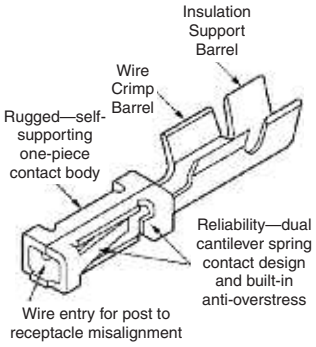

## Terms Explained

### Receptacle Contacts

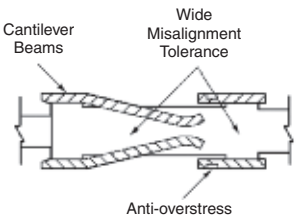

The AMPMODU receptacle cross-section is primarily rectangular, with rounded corners. Two integral cantilever beams contact the mating square or round male posts. Deflection of these spring members is limited by anti-overstress stops, and excessive permanent deformation is prevented. This feature allows a wide range for tolerance of misalignment of mating contacts.

The configuration of the receptacle completely encloses the spring members preventing damage during handling and assembly and makes the system compatible with automatic application techniques.

**Note:** Application of a contact lubricant is part of the manufacturing process of all AMPMODU tin-plated crimp products. However, it is not part of the manufacturing process of products that customers will solder, then clean. For these products, TE recommends that customers use contact lubricant. See the TE web page for further information.

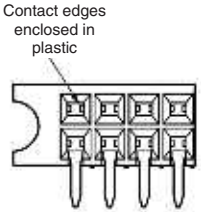

**Offers standard, intermediate and high pressure contact forces**

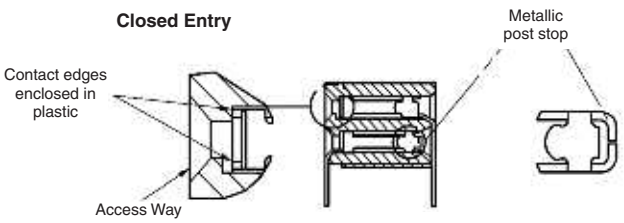

### Receptacle-Closed Entry Housing Design

The closed entry housing style better eliminates the chance of a mating post stubbing on the edges of the receptacle contact.

**Closed Entry**

## Mating Post Selection Guide

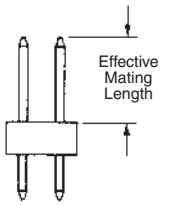

The following selection guide is provided to help in choosing a mating product after a receptacle, header or post has been selected.

In some instances references are given on the catalog page to specific mating connectors. In other instances the reader is referred here to the selection guide for mating product recommendations.

If your application requirement is not answered here, consult TE for further recommendations.

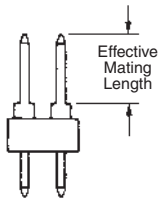

### Posts Without Shoulders

For drawn wire products (ie, AMPMODU Breakaway and Low Profile Headers) and for products having the shoulder of the post below the housing or pc board surface (ie, AMPMODU MTE and Single Row Shrouded Headers) the effective mating length starts at the housing or pc board surface.

### Posts With Shoulders

For product having the shoulder of the post extending above the housing or pc board surface (ie, Standard AMPMODU Shrouded and Unshrouded Headers) the effective mating length starts at the top of the shoulder.

| Receptacle Type | | Recommended Effective Mating Posts Lengths | |
|---|---|---|---|

## Standard Headers—Unshrouded

### Product Facts

- Variety of popular sizes available
- Substantial time/labor savings—install all posts at one time
- Vertical and right-angle versions available in single- and double-row configurations
- Triple-row version available in vertical configuration with .230 [5.84] mating length
- Copper alloy posts
- Choice of select gold or tin plated posts
- Mating length for single and double row is .318 [8.08] (.278 [7.06] effective mating length-see page 90)
- Flame retardant, black thermoplastic housings; 94V-0 rated
- Recognized under the Component Program of Underwriters Laboratories Inc., File No. E28476
- Certified by Canadian Standards Association, File No. LR 7189

### Performance Characteristics

#### Electrical

**Insulation Resistance** — 5,000 megohms minimum initial

**Dielectric Withstanding Voltage** — 750 V rms at sea level

#### Environmental

**Operating Temperature** — -65°C to +105°C (black thermoplastic housings)

**Current** — 3 amperes maximum per contact (dependent upon mating connector)

# Standard Headers—Unshrouded, Single Row, .100 [2.54] Centerline

## .025 [0.64] Square Straight Post

### Material and Finish

**Housing** — Black thermoplastic, 94V-0 rated

**Posts** — Copper alloy, plated as follows:

**Plating A** — Selectively plated .000030 [0.00076] gold on contact area, with gold flash over .000050 [0.00127] nickel on entire post

**Plating B** — Selectively plated .000015 [0.00038] gold on contact area, with gold flash over .000050 [0.00127] nickel on entire post

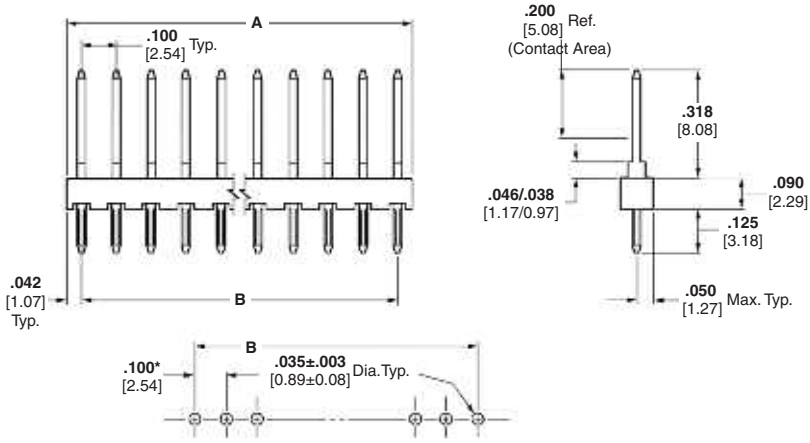

**Tin/Nickel** — Plating option available; minimum order quantities may apply. Consult TE.

### Related Product Data

**Mateable Connectors** — Refer to the Mating Post Selection Guide — page 90

**Technical Documents** — page 276

See mating connector for applicable product and application specifications.

**Recommended PC Board Hole Layout (for .055 [1.40] min. thick PC board)**

*±.003 [±0.08] tolerances not to accumulate within one connector pattern.

## Standard Headers—Unshrouded, Single Row, .100 [2.54] Centerline (Continued)

### .025 [0.64] Square Right-Angle Post

**Recommended PC Board Hole Layout (for .055 [1.40] min. thick PC board)**

*±.003 [±0.08] tolerances not to accumulate within one connector pattern.

### Material and Finish

**Housing** — Black thermoplastic, 94V-0 rated

**Posts** — Copper alloy, plated as follows:

**Plating A** — Selectively plated .000030 [0.00076] gold on contact area, with gold flash over .000050 [0.00127] nickel on entire post

**Plating B** — Selectively plated .000015 [0.00038] gold on contact area, with gold flash over .000050 [0.00127] nickel on entire post

**Tin/Nickel** — Plating option available; minimum order quantities may apply. Consult TE.

**Housing** — Black thermoplastic, 94V-0 rated

**Posts** — Copper alloy, plated as follows:

**Plating A** — Selectively plated .000030 [0.00076] gold on contact area, with gold flash over .000050 [0.00127] nickel on entire post

**Plating B** — Selectively plated .000015 [0.00038] gold on contact area, with gold flash over .000050 [0.00127] nickel on entire post

**Tin/Nickel** — Plating option available; minimum order quantities may apply. Consult TE.

# Breakaway and Retention Headers—Unshrouded

## Product Facts

- **Design and inventory versatility—headers can be broken into any size needed**
- **Variety of popular sizes available**
- **Substantial time/labor savings can install all posts at one time**
- **Vertical and right-angle versions available in single- and double-row configurations**
- **Phosphor bronze posts**
- **Choice of gold duplex or tin plated posts**
- **Post lengths include .230 [5.84] and .318 [8.08] for connector mating**
- **Board retention feature available**
- **Black, glass-filled thermoplastic housings; high temperature compatible**
- **Recognized under the Component Program of Underwriters Laboratories Inc., File No. E28476**
- **Certified by Canadian Standards Association, File No. LR 7189**

## Performance Characteristics

### Electrical

**Insulation Resistance** — 5,000 megohms minimum initial

**Dielectric Withstanding Voltage** — 750 V rms at sea level

### Environmental

**Operating Temperature** — -65°C to +105°C (black thermoplastic housings)

**Current** — 3 amperes maximum per contact (dependent upon mating receptacle)

# Breakaway Headers—Unshrouded, Single-Row, .100 [2.54] Centerline

## .025 [0.64] Square Straight Posts

### Material and Finish

**Housing** — Black thermoplastic, 94V-0 rated, high temperature compatible

**Posts** — Phosphor bronze, plated as follows:

**Plating A** — Duplex plated .000030 [0.00076] gold on contact area, .000100-.000200 [0.00254-0.00508] tin on solder tail, with entire post underplated .000050 [0.00127] nickel

**Plating B** — Duplex plated .000015 [0.00038] gold on contact area, .000100-.000200 [0.00254-0.00508] tin on solder tail, with entire post underplated .000050 [0.00127] nickel

**Plating C** — .000100-.000200 [0.00254-0.00508] tin over .000050 [0.00127] nickel

### Performance Characteristics (Board Retention Tails)

**Insertion Force** — 12 lb [53.4N] max.

**Retention Force** — .25 lb [1.11N] min.

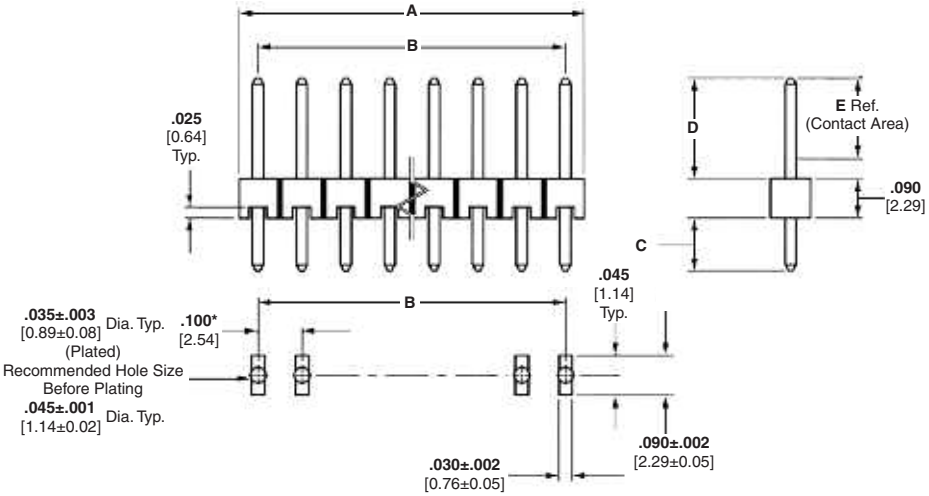

### Related Product Data

| With Board Retention Tails (See Notes 2 and 3.) | 3 | **.284** [7.21] | **.200** [5.08] | 5-146297-3 | 5-146296-3 | 5-146294-3 | 5-146293-3 | 5-146292-3 | 5-146290-3 | 5-146289-3 | 5-146288-3 | 5-146286-3 |
| | 40 | **3.984** [101.19] | **3.900** [99.06] | 9-146297-0 | 9-146296-0 | 9-146294-0 | 9-146293-0 | 9-146292-0 | 9-146290-0 | 9-146289-0 | 9-146288-0 | 9-146286-0 |

**Notes:** 1. Headers without retention tails may be broken to the desired number of positions using **Tool Kit No. 314818-1 (not shown)**.
2. Headers are also available in sizes 2 thru 39 positions (with Solder Tails) and 4 thru 39 positions (with Board Retention Tails). When ordering, add the prefix and/or suffix (dash) numbers plus 5- -0 to the base part number that corresponds with the desired size. For example, the complete part number for an 8-position header with solder tails (C dimension .090 [2.29], post plating A) would be 5-146285-8. The complete part number for a 26-position header with board retention tails (C dimension .120 [3.05], post plating B) would be 7-146292-6. This part numbering system applies only to this page.
3. For C dimensions .120 [3.05] and .125 [3.18], board retention using kinked tails are for headers 6 positions and smaller; headers 7 positions and larger use swaged tails. Headers with a C dimension of .090 [2.29] have swaged tails for all sizes.

**Note:** All part numbers are RoHS compliant.

**Housing** — Black thermoplastic, 94V-0 rated, high temperature compatible

**Posts** — Phosphor bronze, plated as follows:

**Plating A** — Duplex plated .000030 [0.00076] gold on contact area, .000100-.000200 [0.00254-0.00508] tin on solder tail, with entire post underplated .000050 [0.00127] nickel

**Plating B** — Duplex plated .000015 [0.00038] gold on contact area, .000100-.000200 [0.00254-0.00508] tin on solder tail, with entire post underplated .000050 [0.00127] nickel

**Plating C** — .000100-.000200 [0.00254-0.00508] tin over .000050 [0.00127] nickel

### Performance Characteristics (Board Retention Tails)

**Insertion Force** — 12 lb [53.4N] max.

**Retention Force** — .25 lb [1.11N] min.

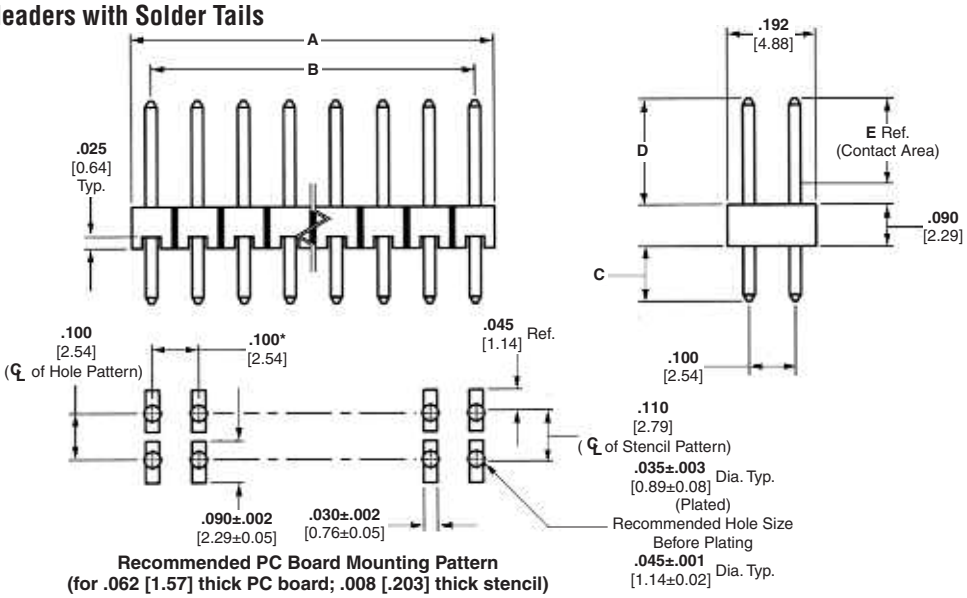

### Related Product Data

**Notes:** 1. Headers without retention tails may be broken to the desired number of positions using **Tool Kit No. 314818-1 (not shown)**.
2. Headers are also available in sizes 4 thru 78 positions. When ordering, add the prefix and/or suffix (dash) numbers plus 5- -0 to the base part number that corresponds with the number of positions per row. For example, the complete part number for a 16-position header with solder tails (C dimension .090 [2.29], post plating A) would be 5-146261-8. The complete part number for a 40-position header with board retention tails (C dimension .120 [3.05], post plating B) would be 7-146268-0. This part numbering system applies only to this page.

**Note:** All part numbers are RoHS compliant.

# AMPMODU Reeled Breakaway Headers

## Features of Breakaway Headers

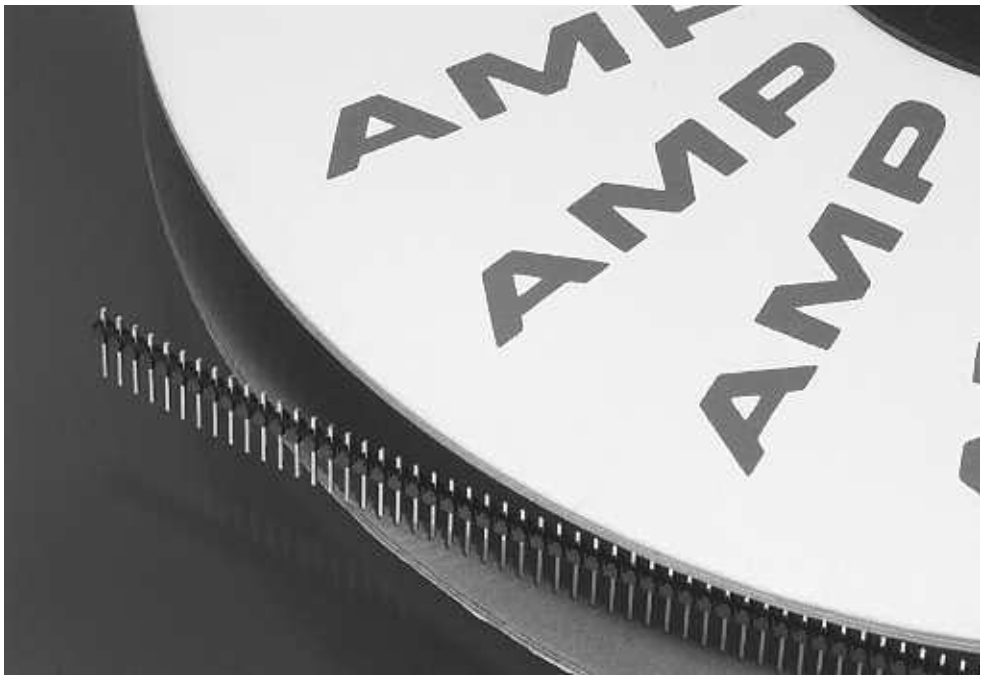

- **Design and inventory versatility — headers can easily be made into a variety of sizes**
- **High Temperature Compatible**
- **Reduced part number base**
- **Reduced inventory burden**

## Applications

- **Desktops & workstations**
- **Set-top boxes**
- **Televisions**
- **Automotive instrument panels & radios**
- **Medical and test equipment**

## Benefits

- **Off the shelf availability**
- **Various header length capability using the same reel**
- **Reduction of inventory costs**
- **Economy version of the standard breakaway headers**

TE now offers AMPMODU reeled breakaway headers, which are used for board-to-board interconnections, on a continuous reel. The reeled breakaway headers are an economy version of the standard breakaway headers, and continue to provide the same high quality standards that TE is known for in the connector industry.

Reeled breakaway headers provide the flexibility to cut the headers to many different lengths, while only having to stock one part number. As a result, the amount of part numbers that need to be purchased and stored can be greatly reduced.

Reeled breakaway headers can be purchased in single and double rows with tin, 5 Au, 15 Au, and 30 Au duplex plating. The lower applied cost also offers .230" and .318" mating lengths. (See standard breakaway-to-reeled header conversion chart for vertical headers on the reverse side of this sheet)

Potential industries include: computer peripherals, telecommunications equipment, consumer, automotive, medical and test equipment.

Tooling available from:
Robo-Pak, Inc.
814 Lakeshore Drive
East Bethel, MN 55902

A pin retention and pin removal tooling option is also available in addition to cutting.

## Breakaway Surface Mount Headers, .100 x .100 [2.54 x 2.54] Centerline

### Product Facts

- Surface Mount Leads
- Contact Material: phosphor bronze
- High temperature, black thermoplastic housings, 94V-0 rated, capable of withstanding IR or vapor-phase reflow
- Recognized under the Component Program of Underwriters Laboratories Inc. File No. E28476
- Certified by Canadian Standards Association, File No. LR 7189
- Choice of gold duplex or tin plated posts
- Posts coplanar within .006 [0.15]
- Tape and reel packaging available in addition to single tube packaging. Contact TE.
- Pick-and-place cap available for vacuum placement. Contact TE.

An extension of the AMPMODU Breakaway Header product family are the surface mount, vertical breakaway headers. The AMPMODU Surface Mount breakaway headers (Unshrouded) are available in single- and double-row vertical configurations with mating lengths of .230 [5.84] and .320 [8.13]. Posts are offered with a choice of either .000030 [.0007] gold duplex or tin plating.

Current packaging is in a single tube but tape and reel is available for automatic pick-and-place. We also can provide a pick-and-place cap for vacuum placement if required.

# Unshrouded Stacking Headers—Breakaway .100 x .100 [2.54 x 2.54] Centerline

## Product Facts

- Available in single and double row
- Parallel PC board stacking with numerous stack heights available
- Drawn wire posts allow 4 side mateability
- May eliminate the need for additional board spacers
- Can be used in conjunction with bottom entry receptacles
- Gold or tin plated
- Up to 1.430 [36.32] overall post length
- Retention and surface mount features available upon request
- Other header sizes can be made upon request
- Tape and reel packaging available. Contact TE.
- Pick-and-place cap available for vacuum placement. Contact TE.

***Note:** Headers are available in sizes 1 thru 40. When ordering, add the prefix and/or suffix (dash) numbers plus 5- -0 to the base part number that corresponds with the number of positions per row. For example, the complete part number for an 8-position header is 5-146455-8. The complete part number for a 16-position of the same series would be 6-146455-6.

**Note:** All part numbers are RoHS compliant.

## Standard Profile Headers—Shrouded

### Product Facts

- **Available in several styles—right-angle with three- and four-sided pin protection, and straight post with pin protection and mounting ears**
- **Post retention feature available**
- **Can be used for feed-to and feed-thru applications**
- **Housings are black thermoplastic, flame retardant 94V-0 rated**
- **Contacts are copper alloy**
- **Available in gold duplex, gold over nickel and tin over nickel platings**
- **Headers with .066 [1.68] and .150 [3.81] end dimensions are available in select sizes up to 60 positions**
- **Can be select loaded, consult TE**
- **Recognized under the Component Program of Underwriters Laboratories Inc. File No. E28476**
- **Certified by Canadian Standards Association, File No. LR 7189**

### Performance Characteristics

#### Electrical

**Insulation Resistance** — 5,000 megohms minimum initial

**Dielectric Withstanding Voltage** — 750 RMS at sea level

#### Environmental

**Operating Temperature** — -65°C to +105°C (black thermoplastic housings)

**Current** — 3 amperes maximum per contact

# Standard Profile Headers—Shrouded, Single-Row, .100 [2.54] Centerline (Continued)

## .025 [0.64] Square Right-Angle Post (with Standoffs)

### Material and Finish

**Housing** — Black thermoplastic, 94V-0 rated

**Posts** — Phosphor bronze, plated as follows:

**Plating A** — Duplex plated .000030 [0.00076] gold on contact area, .000100-.000200 [0.00254-0.00508] tin on solder area, with entire post underplated .000050 [0.00127] nickel

**Plating B** — Duplex plated .000015 [0.00038] gold on contact area, .000100-.000200 [0.00254-0.00508] tin on solder area, with entire post underplated .000050 [0.00127] nickel

**Plating C** — .000100-.000200 [0.00254-0.00508] tin over .000050 [0.00127] nickel on entire post

# Standard Profile Headers—Shrouded, with .150 [3.81] End Dimension, Double-Row, .100 x .100 [2.54 x 2.54] Centerline

## .025 [0.64] Square Straight Post (with Detent Windows)

### Material and Finish

**Housing** — Black thermoplastic, 94V-0 rated

**Posts** — Phosphor bronze, plated as follows:

**Plating A** — Duplex plated .000030 [0.00076] gold on contact area, .000100-.000200 [0.00254-0.00508] tin on solder area, with entire post underplated .000050 [0.00127] nickel

**Plating B** — Duplex plated .000015 [0.00038] gold on contact area, .000100-.000200 [0.00254-0.00508] tin on solder area, with entire post underplated .000050 [0.00127] nickel

**Plating C** — .000100-.000200 [0.00254-0.00508] tin over .000050 [0.00127] nickel on entire post

# Standard Profile Headers—Shrouded, with .066 [1.68] End Dimension, Double-Row, .100 x .100 [2.54 x 2.54] Centerline

## .025 [0.64] Square Right-Angle Post (with Detent Windows)

### Material and Finish

**Housing** — Black thermoplastic, 94V-0 rated

**Posts** — Phosphor bronze, plated as follows:

**Plating A** — Duplex plated .000030 [0.00076] gold on contact area, .000100-.000200 [0.00254-0.00508] tin on solder area, with entire post underplated .000050 [0.00127] nickel

**Plating B** — Duplex plated .000015 [0.00038] gold on contact area, .000100-.000200 [0.00254-0.00508] tin on solder area, with entire post underplated .000050 [0.00127] nickel

**Plating C** — .000100-.000200 [0.00254-0.00508] tin over .000050 [0.00127] nickel on entire post

# Standard Profile Headers—Shrouded, with .066 [1.68] End Dimension, Double-Row, .100 x .100 [2.54 x 2.54] Centerline

## .025 [0.64] Square Right-Angle Post (with Pin Protection on 3 Sides)

### Material and Finish

**Housing** — Black thermoplastic, 94V-0 rated

**Posts** — Phosphor bronze, plated as follows:

**Plating A** — Duplex plated .000030 [0.00076] gold on contact area, .000100-.000200 [0.00254-0.00508] tin on solder area, with entire post underplated .000050 [0.00127] nickel

**Plating B** — Duplex plated .000015 [0.00038] gold on contact area, .000100-.000200 [0.00254-0.00508] tin on solder area, with entire post underplated .000050 [0.00127] nickel

**Plating C** — .000100-.000200 [0.00254-0.00508] tin over .000050 [0.00127] nickel on entire post

# AMP-LATCH Low Profile Headers—Shrouded

## Product Facts

- **Available in selected positions 10 thru 60**
- **Flame retardant, thermoplastic housings, 94V-0 rated**
- **Vertical and right-angle versions available in double row configurations**
- **Available in .025 [0.64] square drawn wire posts**
- **Wash out clearance for flux removal**
- **Mates with AMP-LATCH Ribbon Cable Connectors**
- **Available with and without eject latches**
- **Available with and without kinked soldertails for PCB retention**
- **Recognized under the Component Program of Underwriters Laboratories Inc. File No. E28476**
- **Certified by Canadian Standards Association, File No. LR 7189**

## Performance Characteristics

### Electrical

**Insulation Resistance** — 5,000 megohms minimum initial

**Dielectric Withstanding Voltage** — 1,000 V rms at sea level

### Environmental

**Operating Temperature** — -65°C to +105°C

**Current** — 1 ampere maximum per contact

# AMP-LATCH Low Profile Headers—Shrouded, with .150 [3.81] End Dimension, Double-Row, .100 x .100 [2.54 x 2.54] Centerline

## .025 [0.64] Square Straight Post

### Material and Finish

**Housing** — Glass-filled nylon, black, 94V-0 rated

**Posts** — Copper alloy, plated as follows:

**Plating A** — Gold flash over .000030 [0.00076] min. palladium-nickel plate on the mating surfaces, .000100 [0.00254] min. tin plate on soldertails, with entire post underplated .000050 [0.00127] min. nickel

**Plating B** — Gold flash over .000015 [0.00038] min. palladium-nickel plate on the mating surfaces, .000100 [0.00254] min. tin plate on soldertails, with entire post underplated .000050 [0.00127] min. nickel

### Mounting Information

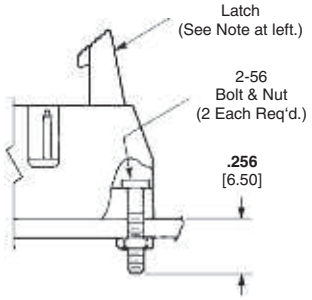

4-24 self-tapping screws and 2-56 bolts and nuts are available for mounting straight-thru pin headers of pc boards. Typical applications and part nos. for ordering this hardware are presented below.

**Note:** 2-56 bolts and nuts may be used to mount pin headers with and without latches. If latches are to be used, the bolts must be positioned in the pin header before the latches are installed.

**Note:** All part numbers are RoHS compliant.

**Pin Header Mounting using 4-24 Self-Tapping Screws:**
**Part No. 19156-1 (for .062 [1.57] Thick PC Board)**
**19156-2 (for .093 [2.36] Thick PC Board)**
**19156-3 (for .125 [3.18] Thick PC Board)**

**Pin Header Mounting with 2-56 Bolts and Nuts:**
**Part No. 746383-1 (Bolt Only)**
**Kit No. 102198-1 (Bolt and Nut, 2 Each per Kit)**

# AMPMODU Stacking Connectors—Shrouded, .025 x .025 [0.64 x 0.64] Posts

## Product Facts

- **Parallel PC board stacking without use of mother boards**
- **Provides space between boards for interference-free routing of wire-to-board connections**
- **Two header heights available: .785 [19.94] and 1.200 [30.48]**
- **Vertical mount headers are fully shrouded**
- **Receptacle contacts have dual cantilever beams with built-in overstress protection**
- **.025 [0.64] sq. posts and receptacle contacts on double-row, .100 x .100 [2.54 x 2.54] centers**
- **Header posts and receptacle contacts are phosphor bronze, duplex plated**
- **Housings are made of flame retardant, glass-filled thermoplastic**

AMPMODU stacking connectors are a two-piece interconnection system designed for parallel stacking printed circuit boards, without the use of mother boards.

Vertical mount headers and receptacle assemblies feature duplex plated posts and receptacle contacts on a double-row, .100 x .100 [2.54 x 2.54] grid. The .025 [ 0.64] sq. header posts are more protected, and the top-entry receptacle contacts utilize the proven AMPMODU receptacle contact design; dual cantilever beams with built-in overstress protection.

Headers are available in two heights: .785 [19.94] and 1.200 [30.48]. This allows the customer to use the height of the header to keep wire-to-board connections up and away from other board components, particularly if the components are densely packaged around the header.

## Receptacle Assemblies, Double-Row Board Mounted

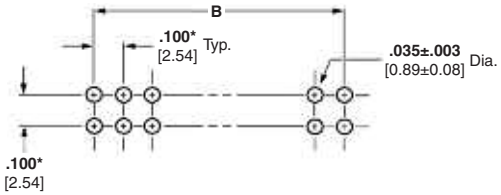

### Vertical Mount, Top Entry, High Profile, Selectively Loaded (with Standoffs)

**Recommended PC Board Hole Layout**

*±.003 [±0.08] tolerances not to accumulate within one connector pattern.

### Material and Finish

**Housing** — Glass-filled thermoplastic, black, 94V-0 rated

**Contacts** — Phosphor bronze, plated .000010 [0.000254] min. gold on mating area, .000150-.000300 [0.00381-0.00762] matte tin on solder area, with entire contact underplated .000050-.000100 [0.00127-0.00254] nickel

| No. of Pos. | Dimensions A | Dimensions B | Receptacle Assembly Part No. |
|---|---|---|---|
| 48* (40 Active) | **2.400** [60.96] | **2.300** [58.42] | 5-102766-1 |
| 60* (52 Active) | **3.000** [76.2] | **2.900** [73.66] | 5-102766-4 |

*In addition to the *active* positions, each receptacle has four cavities on each end that are not loaded with contacts. These empty cavities aid in aligning the receptacle with header posts during mating.

**Notes:** 1. Part no. and date code stamped on housing where size permits.
2. These receptacle assemblies mate with headers of the same size as the *active* positions listed above. Refer to pages 143 and 144.

**Note:** All part numbers are RoHS compliant.

## ACTION PIN Headers—Shrouded and Unshrouded

### Product Facts

- Straight posted unshrouded and shrouded versions
- .025 [0.64] square ACTION PIN posts
- ACTION PIN posts make a gas-tight, press-fit connection in plated-through holes
- Designed not to damage plated-through holes
- Unshrouded headers available in selected sizes 1 through 40 positions (single-row) and 4 through 80 positions (double-row)
- Shrouded headers (double-row) available in selected sizes of 6 through 60 positions
- Flame retardant, black thermoplastic housings, 94V-0 rated
- .100 [2.54] Centerline spacing
- Recognized under the Component Program of Underwriters Laboratories Inc., File No. E28476
- Certified by Canadian Standards Association, File No. LR 16455

# ACTION PIN Press-Fit Posts

### The Reliable Plated-Through Hole Interconnect

Solderless interconnections have been popular in electrical and electronic applications with world-wide success for decades. They provide reliable electrical and mechanical stability and offer applied-cost savings across the board. For PC board applications, compliant ACTION PIN posts provide these features:

- Large gas-tight contact zone
- High reliability due to stored energy
- More resistant to damage to plated-through holes during installation
- Especially suited for multilayer PC boards
- Less costly board manufacturing due to larger hole tolerances compared to use of solid pins
- Application can be made by end-user
- Repairability—contact can be replaced in the same pin location (two repairs)
- Installation with no heat cycling of board
- Permits mass insertion by minimizing forces needed to insert pins as compared to solid pin press-fit application
- Significant applied-cost savings in many applications

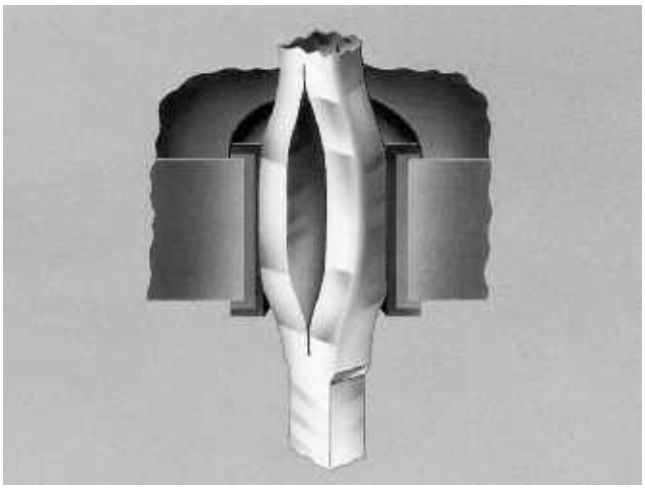

Since compliant ACTION PIN posts do not have to be soldered, problems associated with solder are eliminated, such as:

- Faulty solder joints
- Solder fumes; contaminants are deposited on the contacts
- Solder spots; short circuits between printed circuits
- Flux residuals
- Thermal strain on printed circuit boards and components
- Degassing of plated-through holes

Solderless press-fit interconnections using compliant pins are primarily integrated in, but not limited to, backplanes.

Solderless press-fit interconnections are used in racks, especially where connectors must be fixed on the solder side of the PC board and/or component side. In these applications, the holes for ACTION PIN post connectors are covered during the soldering process and press-fitting is performed after soldering.

Other applications for ACTION PIN post interconnections include PC boards that incorporate components using surface mount technology (SMT). Here, too, press-fit interconnections can be applied after soldering, thus eliminating complications associated with connectors suitable for surface mounting.

### Principle of the Compliant ACTION PIN Post

When a compliant ACTION PIN post is inserted into a plated-through hole, two spring members are compressed, exerting force against the hole for a gas-tight connection. The diameter of the hole is smaller than the diagonal size of the pin (see cross-section illustration below).

The beam characteristics of the pin are designed so that a plastic, as well as an elastic, deformation takes place during insertion. The two spring members compress to different degrees to accommodate hole tolerances. The compliant pin also reduces strain on the board. With a rigid pin, the elastic strain energy is stored entirely in the board, leading to damage of the plated-through holes. With the compliant ACTION PIN post, the residual force of the elastic deformation maintains stored energy to produce a tight contact zone between the pin and the plated-through hole. This maintains long-term electrical and mechanical reliability of the interconnection.

**Minimum Hole Dia. .037** [0.94]

**Maximum Hole Dia. .043** [1.09]

**Cross-Section Area of ACTION PIN Press-Fit Post in Printed Circuit Board Holes**

## ACTION PIN Press-Fit Posts (Continued)

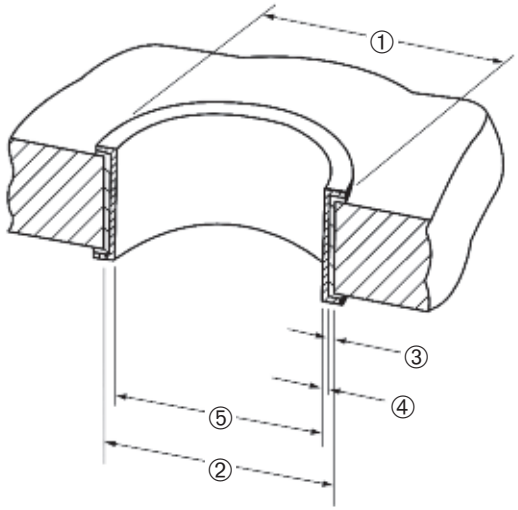

ACTION PIN posts provide a more reliable press-fit connection. Localized pressure in the interface area provides oxide break-through and prevents corrosion better in many of the harshest environments to help provide a reliable connection. Also, radial and axial distortion are controlled to meet today's standards for multilayer board applications.

### PC Board Thickness

ACTION PIN posts are designed for use in a variety of PC board thicknesses. However, certain ACTION PIN posts are to be used in specific ranges of board thicknesses. To promote optimum performance, the recommended board thicknesses provided with the connector being used must be followed.

① Annular Ring (See Note)
② Drilled Hole
③ Copper Thickness
④ Tin-lead Thickness
⑤ Plated-Through Hole

### ACTION PIN Post/PC Board Applications

| ACTION PIN Contact Material Thickness | Drilled Hole Diameter② | Plating Thicknesses | | Plated-Through Hole Diameter⑤ | Distortion Specification* | |
|---|---|---|---|---|---|---|
| | | Copper③* | Tin-lead④ | | Average | Maximum |
| **.025** [0.64] | **.0453**$^{\pm.001}$ [1.151$^{\pm0.03}$] | **.001-.003** [0.03-0.08] | **.0003** [0.008]Min. | **.037-.043** [0.94-1.09] | **.0015** [0.038] | **.002** [0.05] |

*Maximum hardness of copper layer is 150 Knoop.
**Radial hole distortion.
**Note:** Recommended annular ring diameter is hole diameter plus **.020** [0.51].

# Application Tooling for AMPMODU Headers with ACTION PIN Posts

## ACTION PIN Post Replacement Tooling

**Rear Insertion/Extraction Tool No. 265871-7 (Ref. 408-2636)**
**Includes:**
**Impact Tool No. 380392-8**
**Removal Tool No. 265964-1**
**Replacement Tip No. 308554-1**

## Single-Row Connector Seating Tools

Tooling Assembly No. 91171-1 is used to install single-row AMPMODU headers with ACTION PIN posts into PC boards.

Pin headers with ACTION PIN posts allow high speed, solderless back-plane construction through press-fit application. Press fitting connectors to printed circuit boards requires special seating tools which transfer application force directly to the contacts.

Force applied to the tool to seat the connectors can be provided by the TE seating machines shown on this page.

For tooling information, call the TE Automation Group 1-800-722-1111.

## ASG Servo Electric Presses

**BMEP 5T**

**AEP 6T**

TE offers a wide range of servo-electric presses for the application of press-fit connectors. Systems are available with varying force capacity, board size capacity and process capability. Each system features real-time force feedback and PC control to allow the highest level of control and traceability. Every connector pressed is monitored to confirm that maximum force is not exceeded and minimum force is met. Each system controls force, height and speed to allow termination of the pressing cycle by force or height parameters. Complete SPC data is available as each connector press cycle is monitored and stored.

Please see the matrix below and contact TE Automation Group at 1-800-722-1111 for assistance in understanding which system will best meet your needs.

| Press Model | Description | Max Pressing Force tons [kN] | Max Board Size (L x W) in [mm] |
|---|---|---|---|
| BMEP 3T | Semi-automatic, benchtop servo-electric press | 3 [26.7] | 18 x 24 [460 x 610] |
| BMEP 5T | Semi-automatic, benchtop servo-electric press | 5 [44.5] | 18 x 24 [460 x 610] |
| MEP 6T | Semi-automatic, stand-alone servo-electric press | 6 [53.4] | 24 x 36 [610 x 914] |
| MEP 12T | Semi-automatic, stand-alone servo-electric press | 12 [106.8] | 30 x 36 [ 762 x 914] |
| AEP 12T | Automatic, inline servo-electric press | 12 [106.8] | 36 x 48 [914 x 1219] |
| AEP 6T | Automatic, stand alone servo-electric press | 6 [53.4] | 30 x 36 [762 x 914] |

**Note:** All part numbers are RoHS compliant.

## Application Tooling for Post Insertion

TE offers a wide range of application tooling solutions ranging from stand alone manual insertion systems through fully automatic inline systems. Please contact your local TE representative or the TE Tooling Assistance Center at 1-800-722-1111 for help in finding the right solution to meet your particular requirements.

### Modular Insertion System Bench Machine No. 217600-1

This machine uses TE insertion heads to install a variety of printed circuit board products at rates of 2,000 per hour. The printed circuit board is placed in a Board Holding Fixture which is attached to a two-hand controlled mechanism. The operator moves the board over the machine anvil; a switch in the anvil actuates the machine when the printed circuit board is placed on the anvil. A spotlight illuminates the insertion area.

Consult TE for further information on this machine and the insertion heads.

### P300 and P350 Automatic Insertion Machines

The P300 and P350 are automatic insertion machines for the application of reeled compliant pin and thru-hole products. Systems are available as stand alone or fully inline with SMEMA compatible conveyor system. Up to 3 different insertion heads can be mounted on a system allowing one machine to apply up to 3 different products. Insertion rates of up to 3 insertions per second on the P300 and up to 5 insertions per second on a P350 are possible (application dependent). PCBs up to 15.5" x 23.5" [400x600mm] on the P300 and up to 17.5" x 17.5" [450x450mm] on the P350 can be processed by high speed XY positioning tables. A wide range of options, including force monitoring, PCB vision correct, and PCB thickness measurement are available to meet your performance and production flexibility requirements.

**Note:** All part numbers are RoHS compliant.

# ACTION PIN Stacking Connector System (Non-Intermateable with AMPMODU Connectors)

## Product Facts

- **Can stack multiple printed circuit boards without the need of a mother board**
- **Connect bus lines in the shortest possible distance**
- **Receptacle assembly has ACTION PIN posts for solderless board mounting**
- **Can be mounted onto the board simply by press fitting with Mini-Press**
- **Receptacle assembly is easy to service and replace (up to 2 times)**
- **Receptacle contacts are of fork design to mate with posts at two points. Virtually eliminates danger of scooping at mating/unmating**
- **Stacking dimensions are 13.4 [.528] or 19.0 [.748] when using receptacle assemblies together, and 13.9 [.547] or 19.5 [.768] when using a combination of receptacle and post header assemblies**
- **Accepts 1.6 [.062] thick boards**
- **Housing provided with polarization to help prevent mismating**
- **Housing made of chemical-resistant glass-filled PBT, black in color**
- **Contacts are of copper alloy material with high spring characteristics, gold-over-nickel plated**
- **Post hood available to protect the post portion of receptacle contacts. Can be selected depending on stacking dimensions**
- **Connectors available in sizes of 26, 30, 34, 40, 50 and 60 positions**
- **Product specification: 108-5197**

ACTION PIN Stacking Connectors are a family of two-piece connectors used to stack multiple printed circuit boards in parallel. They have been developed to provide a more reliable and economical means of compact wiring and high-density packaging inside a variety of electronic equipment.

The connectors have many advanced features: they can be used to connect bus lines in the shortest possible distance without the need of a mother board, thus permitting effective utilization of space above the board; compared with other methods of jumper connection using cable connectors, they make the overall board layout more clean and straight for compact packaging.

Contacts are on 2.54 x 2.54 [.100 x .100] grid. The connectors are available in sizes of 26, 30, 34, 40, 50 and 60 positions. ACTION PIN Stacking Connectors consist of a receptacle assembly, a mating post header and a post hood to protect the post portion of the receptacle assembly.

A complete description of the ACTION PIN Stacking Connectors is presented on the following page (155).

## ACTION PIN Stacking Connector System (Non-Intermateable with AMPMODU Connectors) (Continued)

### Receptacle Assembly

The receptacle assembly features reliability and economy characteristic of this product line.

The mating portion of its built-in receptacle contacts is a fork design, highly resilient and helps prevent damage to contacts by scooping at mating/unmating.

On the board mount side of the assembly are 0.55 [.022] square ACTION PIN posts.

No soldering is required to mount the assembly on the board, the posts being simply, press fit into the board's 0.825 [.032] diameter holes.

Two types of receptacle assemblies are available; one is used with an outermost board and the other with intermediary boards. A solder version is also available for the outer board mount assembly.

### Post Hood

When using the intermediary board mount receptacle assembly, this post hood is used to protect the post portion of the assembly. The post hood is available in two types: one with the housing height of 10.0 [.394] and the other with the housing height of 15.7 [.618]. They can be selected, depending on stacking dimensions.

### Post Header

The post header is mounted onto the outer board on the other side of the board to which an outer board mount receptacle assembly is applied. The post header is preloaded with 0.50 [.022] square soldering posts. These posts are protected by the side walls of the housing.

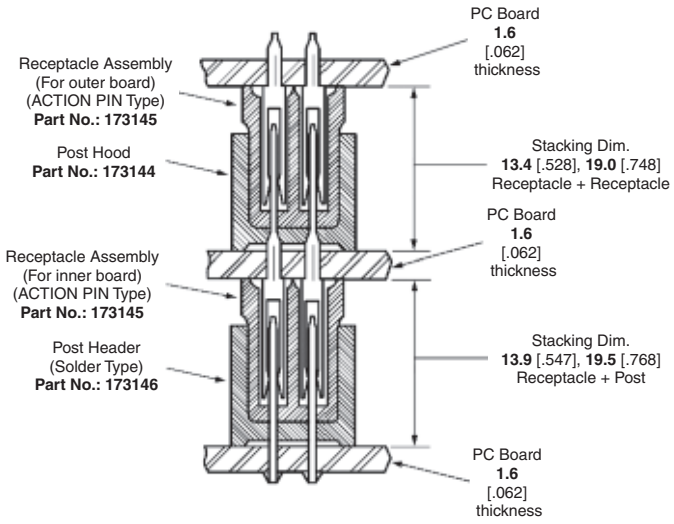

Stacking dimensions provided by this connector line are as follows:

When the outer board receptacle and intermediary board receptacle assemblies are used 13.4 [.528] or 19.0 [.748].

When the intermediary board receptacle assembly and the post header assembly are used 13.9 [.547] or 19.5 [.768].

### Typical Application

**Note:** All part numbers are RoHS compliant.

## Post Hood (Non-Intermateable with AMPMODU Connectors)

The post hood, mounted onto the post of the intermediary receptacle assembly, protects the post and serves as a header assembly when stacking several boards.

## Application Tooling for ACTION PIN Stacking Connectors

### Mini-Press

| No. of Pos. | Part No. |
|---|---|
| 40 | 1-758030-1 |
| 50 | 1-758030-2 |
| 60 | 1-758030-3 |

The part numbers above include the Mini-Press unit, insertion support plate and press-fit jig.

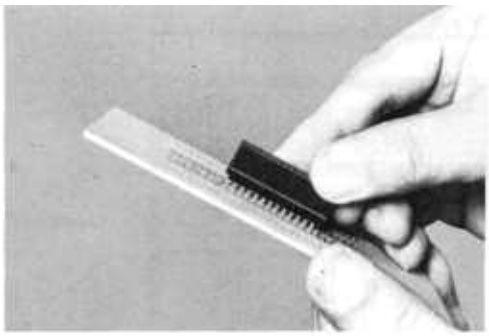

**Mini-Press Unit**
**Part No. 1-758030-3**

When ordering a press-fit jig only, consult the table below.

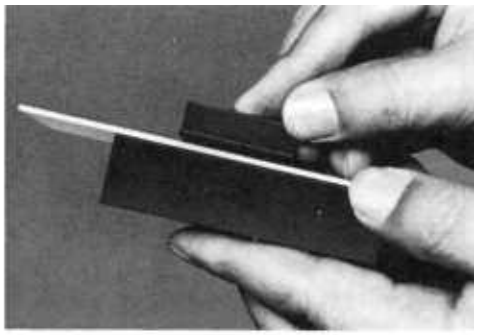

**Press-fit Jig** (separate order)

| No. of Pos. | Part No. |
|---|---|
| 26 | 907459-1 |
| 30 | 907459-2 |
| 34 | 907459-3 |
| 40 | 907459-4 |
| 50 | 907459-5 |
| 60 | 907459-6 |

Also, optional insertion support plates are obtainable by separate order to meet your specific requirements for improved board handling.

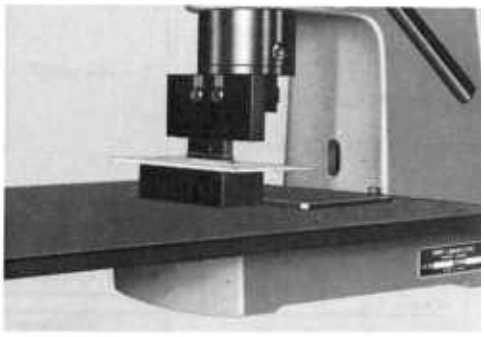

1. Insert connector into the board tentatively (Be sure that connector is in the right direction).

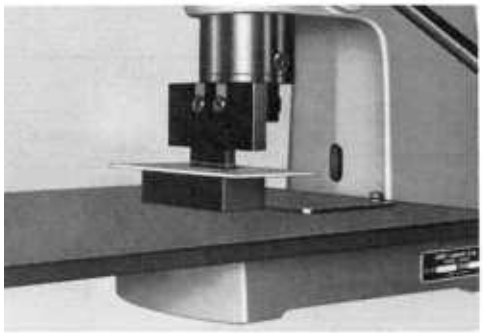

2. Attach insertion support plate to the leg portion of connector from below.

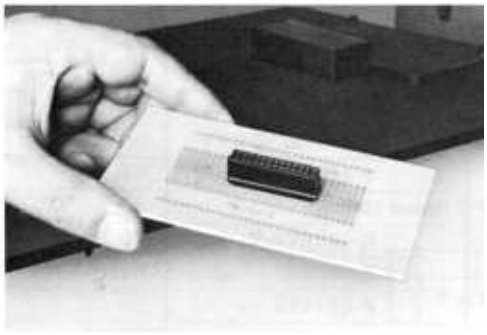

3. Set insertion support plate in place by butting it against Mini-Press platform.

4. By pressing Mini-Press handle down, rest the press-fit jig against connector.

5. Press handle down gently and insert connector into the board.

6. Now connector has been mounted to the board securely.

**Insertion Support Unit**
(Option)

**Note:** All part numbers are RoHS compliant.

**Bandolier** — Brass
**Posts** — Phosphor bronze, plated as follows:
**Plating A** — Duplex plated .000030 [0.00076] gold on contact area, .000100-.000200 [0.00254-0.00508] tin on solder area, with entire post underplated .000050 [0.00127] nickel
**Plating B** — Duplex plated .000015 [0.00038] gold on contact area, .000100-.000200 [0.00254-0.00508] tin on solder area, with entire post underplated .000050 [0.00127] nickel
**Plating C** — .000100-.000200 [0.00254-0.00508] tin over .000050 [0.00127] nickel on entire post

**Notes:** 1. Posts can be applied using **Hand Tool 91419-1.** *Point of measurement for plating thickness.
2. Approximate posts per reel—30,000.
3. The Bandolier Insertion head can be used on the Comp-U-Sertor II machine or the Modular Insertion System Bench machine (see page 153).
4. For PCB finishes other than tin, contact TE.

## Strip Form Posts (Uninsulated)

### Material and Finish

**Posts** — Phosphor bronze, plated as follows:
**Plating A** — Duplex plated .000030 [0.00076] gold on contact area, .000100-.000200 [0.00254-0.00508] tin on solder area, with entire post underplated .000050 [0.00127] nickel

# AMPMODU .025 [0.64] Square Continuous Posts

## Features of .025 [0.64] Square Continuous Posts

- **Brass drawn wire for posts**
- **.400 to 1.000 [10.16 to 25.40] overall pin length (.010 [0.25] increments)**
- **Plating Options:**
  **Tin**
  **15µ in. gold**
  **30µ in. gold**
- **Star feature also available**

## Benefits

- **Less expensive than bandolier style posts**
- **Can be placed on printed circuit boards at any desired centerline**
- **Less scrap material (no carrier strip)**

**Technical Documents** — page 276
**Application Specification**
114-13011

TE now offers AMPMODU .025 [0.64] Square Continuous Posts. These posts can be used instead of the original posts that come on a bandolier style carrier strip. These posts are on a reel, but the posts are 'notched' at the desired length (no carrier strip is needed). This feature allows more versatility by providing post lengths from .400 to 1.000 [10.16 to 25.40], available in increments of .010 [0.25].

The posts are brass drawn wire and are inserted into a printed circuit board via application tooling at any centerline configuration. They can be used for wire wrap applications or mated to a receptacle.

The current rating is 3 amps. The posts are available plated with tin, 15µ in. gold, or 30µ in. gold. Other platings are available upon request.

TE application tooling is a modular head (Part Number 904641-1) placed on the Modular Insertion System Bench Machine (Part Number 217600-1.)

**Note:** All part numbers are RoHS compliant.

# AMPMODU .045 [1.14] Square Continuous Posts

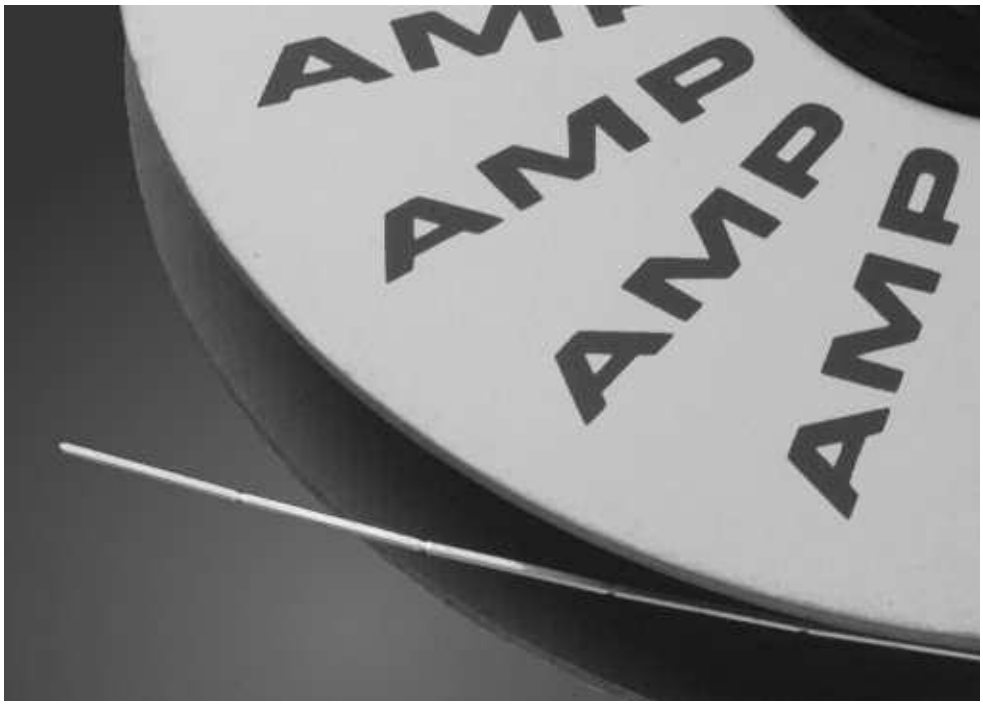

## Features of .045 [1.14] Square Continuous Posts

- **Brass drawn wire for posts**
- **.400 to 1.000 [10.16 to 25.40] overall pin length (.010 [0.25] increments)**
- **Plating Options:**
  **Tin**
  **15µ in. gold**
  **30µ in. gold**
- **Star feature also available**

## Benefits

- **Less expensive than bandolier style posts**
- **Can be placed on printed circuit boards at any desired centerline**
- **Less scrap material (no carrier strip)**

**Technical Documents** — page 276
**Application Specification**
114-13011

TE now offers AMPMODU .045 [1.14] Square Continuous Posts. These posts can be used instead of the original posts that come on a bandolier style carrier strip. These posts are on a reel, but the posts are 'notched' at the desired length (no carrier strip is needed). This feature allows more versatility by providing post lengths from .400 to 1.000 [10.16 to 25.40], available in increments of .010 [0.25].

The posts are brass drawn wire and are inserted into a printed circuit board via application tooling at any centerline configuration. They can be used for wire wrap applications or mated to a receptacle.

Potential industries include: building systems, commercial/home equipment, household appliances, home power tools and equipment.

The current rating is 7 amps. The posts are available plated with tin, 15µ in. gold, or 30µ in. gold. Other platings are available upon request.

TE application tooling is a modular head (Part Number 904640-1) placed on the Modular Insertion System Bench Machine (Part Number 217600-1.)

**Note:** All part numbers are RoHS compliant.

# Receptacle Assemblies, Horizontal Mount

## Product Facts

- **All receptacle assemblies are end stackable**
- **Contact design employs dual cantilever beams with built-in anti-overstress feature**
- **Closed entry housings help prevent post stubbing**
- **Wide range of sizes available**
- **Other versions available upon request**
- **Housings made of high temperature, surface mount compatible thermoplastic material, 94V-O rated**
- **Duplex gold and matte tin plated contacts have full nickel underplate**
- **Housings feature PC board standoffs**
- **Solder tails accommodate a PC board thickness of .062 [1.57]**
- **Recognized under the Component Program of Underwriters Laboratories Inc., File No. E28476**
- **Certified by Canadian Standards Association, File No. LR 7189**

Horizontal Mount receptacle assemblies are designed to reliably and economically meet the packaging and interconnection requirements of today's electronics industry, generally for applications using the mother/daughter board arrangement.

This product line is offered in both single and double row configurations. The .100 [2.54] centerline assemblies are available in a wide range of position sizes. They have end stacking capability which gives the added advantage of flexibility.

The housings are made of high temperature, surface mount compatible thermoplastic material that is 94V-0 rated. Contacts are phosphor bronze, fully underplated with nickel to help prevent corrosion and are available in three plating options.

The receptacle contact is an established proven design with a fully enclosed, one-piece "box" to protect the contact area. In addition, the receptacle contact has dual cantilever beams with a built-in anti-overstress feature. Standard solder tails accommodate a board thickness of .062 [1.57].

## Performance Characteristics

### Mechanical Characteristics

**Mating Force** — 6.0 oz. [1.67N] per contact (max.)

**Unmating Force** — .75 oz. [0.21N] per contact (min.) during third mating cycle

**Durability** — 200 cycles

### Environmental Characteristics

**Operating Temperature** — -65°C to +125°C

### Electrical Characteristics

**Current Rating** — 3.0 amperes (max.) for single contact; 2.0 amperes (max.) per contact when connector is fully energized

**Contact Resistance** — 12 milliohms (max.)

**Insulation Resistance** — 5000 megohms (min.) between adjacent contacts

**Dielectric Withstanding Voltage (at sea level)** — 750 V rms

# Mod II Receptacle Assemblies, Single-Row, .100 [2.54] Centerline

## Closed Entry, End Stackable, Short Point-of-Contact, with Standoffs

### Material and Finish

**Housing** — Glass-filled thermoplastic, black, 94V-0 rated

**Contacts** — Phosphor bronze, plated as follows:

**Plating A** — Duplex .000030 [0.00076] gold on contact area, .000150-.000300 [0.00381-0.00762] matte tin on solder area all over .000050 [0.00127] nickel

**Plating B** — Duplex .000010 [0.000254] gold on contact area, .000150-.000300 [0.00381-0.00762] matte tin on solder area all over .000050 [0.00127] nickel

**Plating C** — .000150-.000300 [0.00381-0.00762] matte tin on solder leads, all over .000050 [0.00127] nickel

### Related Product Data

# Mod II Surface Mount Horizontal Receptacle Assemblies, .100 x .100 [2.54 x 2.54] Centerline

## Product Facts

- **Surface mount leads**
- **All receptacle assemblies are end stackable**
- **Contact design employs dual cantilever beams with built-in anti-overstress feature**
- **Closed entry housings help prevent post stubbing**
- **Housings made of high temperature, surface mount compatible thermoplastic material, 94 V-0 rated**
- **Duplex gold and matte tin plated contacts have full nickel underplate**
- **Housings feature PC board standoffs**
- **Recognized under the Component Program of Underwriters Laboratories Inc., File No. E28476**
- **Certified by Canadian Standards Association, File No. LR 7189**

Horizontal surface mount receptacle assemblies are designed to reliably and economically meet the packaging and interconnection requirements of today's electronics industry as process technologies evolve from wave soldering to surface mount processing.

This broad product line is offered in both single and double row configurations. The .100 [2.54] centerline assemblies are available in 2-40 (single row) positions and 4-80 (double row) positions. Housings are end stackable, which gives the advantage of added flexibility.

The housings are made of high temperature material that is 94V-0 rated. Contacts are phosphor bronze, fully underplated with nickel to help prevent corrosion and are available in three plating options.

The receptacle contact is an established proven design, with a fully enclosed one-piece "box" to protect the contact beams with built-in anti-overstress feature.

## Performance Characteristics

### Mechanical Characteristics

**Mating Force** — 6.0 oz. [1.67N] per contact (max.)

**Unmating Force** — .75 oz. [0.21N] per contact (min.) during third mating cycle

**Durability** — 200 cycles

### Environmental Characteristics

**Operating Temperature** — -65°C to +125°C

### Electrical Characteristics

**Current Rating** — 3.0 amperes (max.) for single contact; 2.0 amperes (max.) per contact when connector is fully energized

**Contact Resistance** — 12 milliohms (max.)

**Insulation Resistance** — 5000 megohms (min.) between adjacent contacts

**Dielectric Withstanding Voltage (at sea level)** — 750 V rms

# Receptacle Assemblies, Vertical Mount

## Product Facts

- **Dual-cantilever beam contact with box design**
- **Single-row assemblies have .100 [2.54] centerline contact spacing; double-row assemblies have .100 x .100 [2.54 x 2.54] centerline contact spacing**
- **3 through 40 positions in single-row assemblies; 2 through 80 positions in double-row assemblies**
- **Mod II Standard .340 [8.64] and Mod IV low .265 [6.73] profiles**
- **Mod II and Mod IV profiles available in dual entry**
- **Duplex gold and matte tin plated contacts have full nickel underplate**
- **Thermoplastic housings, 94V-0 rated**
- **Standoffs for easy flux cleaning**
- **All throughhole assemblies are end stackable**
- **Recognized under the Component Program of Underwriters Laboratories Inc., File No. E28476**
- **Certified by Canadian Standards Association, File No. LR 7189**

Vertical receptacle assemblies are designed to reliably and economically meet the packaging and interconnection requirements of today's electronics industry.

This broad product line offers a wide variety of assembly styles and features. They are available in dual entry style, in both single and double row configurations. The .100 [2.54] centerline assemblies are available in 3-40 (single row) positions and 2-80 (double row) positions. Standard and low profile housings which are end stackable also enhance the product line giving the advantage of added flexibility.

The housings are made of flame retardant material that is 94 V-0 rated. Contacts are phosphor bronze, fully underplated with nickel to help prevent corrosion and are available in three plating options.

The receptacle contact is an established proven design, with a fully enclosed one-piece "box" to protect the contact beams.

These assemblies are offered in .265 [6.73] (Mod IV) and .340[8.64] (Mod II) high profiles. Standard solder tails accommodate board thickness of .062 [1.57].

Product styles include single and dual tine variations. Outrigger tine styles are also available for bottom entry parallel board stacking applications.

## Performance Characteristics

### Mechanical Characteristics

**Mating Force** — 9.0 oz. [2.5N] per contact (max.)

**Unmating Force** — 1.5 oz. [0.42N] per contact (min.)

**Durability (Tested to)** — 200 cycles

### Environmental Characteristics

**Operating Temperature** — -65°C to +125°C

### Electrical Characteristics

**Current Rating** — 3.0 amperes (max.) for single contact; 2.0 amperes (max.) per contact when connector is fully energized

**Contact Resistance** — 12 milliohms (max.)

**Insulation Resistance** — 5000 megohms (min.) between adjacent contacts

**Dielectric Withstanding Voltage (at sea level)** — 750 V rms

**Notes:** 1. TE recommends mating gold or duplex plated headers with duplex plated receptacle assemblies.
2. To obtain the minimum mating post length, add .020 [0.51] (not including the post lead in chamfer) to the maximum point-of-contact dimension.

**Note:** All part numbers are RoHS compliant.

# Mod II Receptacle Assemblies, Double-Row, .100 x .100 [2.54 x 2.54] Centerline

## Closed Top Entry, Side and End Stackable .100 x .100 [2.54 x 2.54] Centerline, .100 [2.54] Tine Spacing

### Material and Finish

**Housing** — Glass-filled thermoplastic, black, 94V-0 rated

**Contacts** — Phosphor bronze, plated as follows:

**Plating A** — Duplex .000030 [0.00076] gold on contact area, .000150-.000300 [0.00381-0.00762] matte tin on solder area all over .000050 [0.00127] nickel

**Plating B** — Duplex .000010 [0.000254] gold on contact area, .000150-.000300 [0.00381-0.00762] matte tin on solder area all over .000050 [0.00127] nickel

**Plating C** — .000150-.000300 [0.00381-0.00762] matte tin on solder leads, all over .000050 [0.00127] nickel

**Notes:** 1. TE recommends mating gold or duplex plated headers with duplex plated receptacle assemblies.
2. To obtain the minimum mating post length, add .020 [0.51] (not including the post lead in chamfer) to the maximum point-of-contact dimension.

**Note:** All part numbers are RoHS compliant.

**Notes:** 1. TE recommends mating gold or duplex plated headers with duplex plated receptacle assemblies.
2. To obtain the minimum mating post length, add .020 [0.51] (not including the post lead in chamfer) to the maximum point-of-contact dimension, and .062 [1.57] for recommended board thickness if used in bottom entry application.

**Note:** All part numbers are RoHS compliant.

# Mod IV Surface Mount Vertical Receptacle Assemblies, .100 x .100 [2.54 x 2.54] Centerline

## Product Facts

- **Surface Mount Leads**
- **Contact Material: phosphor bronze**
- **High temperature, black thermoplastic housings, 94V-0 rated, capable of withstanding IR or vapor-phase reflow**
- **Gold/tin duplex plating for reliable mating interconnection and solder interface**
- **Metallic hold downs provide retention in the PC board prior to and during the reflow process … and strain relief after soldering**
- **Hold downs provide for proper lead-to-pad registration**
- **Closed-entry receptacle housings provide lead-in ramp for positive mating**
- **Receptacle contacts employ dual cantilever beams for reliable connections**
- **Recognized under the Component Program of Underwriters Laboratories Inc. File No. E28476**
- **Certified by Canadian Standards Association, File No. LR 7189**

The AMPMODU 0.025 [0.64] square interconnection system is an industry standard that has provided level III and IV thru-hole interconnections to almost every industry and marketplace for years. As technology advances, so has the AMPMODU product line.

Surface mount vertical receptacle assemblies are available to meet your level II packaging needs as process technologies evolve from wave soldering to surface mount reflow (infrared and vapor-phase) processes. AMPMODU surface mount receptacle assemblies are offered in vertical dual entry configurations. These receptacles are available in single-row and double-row configurations with a contact centerline spacing of .100 x .100 [2.54 x 2.54].

AMPMODU surface mount vertical receptacle assemblies continue to provide the proven features and benefits of their thru-hole counterparts in the AMPMODU product family. Closed-entry style housing design provides a lead-in ramp for positive mating of contacts, virtually eliminating the possibility of stubbing. The dual-beam receptacle contact design, coupled with gold plating in the contact area, provides a reliable interface. Tin plating on the solder tails also enhances solderability.

The incorporation of compliant metallic hold downs on receptacle assemblies offers multiple benefits. The hold downs provide for proper lead-to-pad registration and provide retention to the PC board prior to and during processing. Used with a plated thru-hole, the hold downs are soldered during the reflow process and serve as a strain relief for the solder joints during mating/unmating.

The design of the hold downs results in an excellent ratio of insertion/extraction forces (into the PC board); 20 lb. [89 N] maximum insertion force per pair and 10 lb. [44.5 N] minimum extraction force per pair (unsoldered). No tools are required for insertion.

## Mod IV Surface Mount Vertical Receptacle Assemblies, .100 x .100 [2.54 x 2.54] Centerline (Continued)

**Performance Specifications**

**Voltage Rating:** 250 VAC
**Current Rating:** 3.0 amperes (max.) for single contact;
2.0 amperes (max.) per contact when connector is fully energized
**Operating Temperature Range (Receptacle Assemblies):** –65°C to +125°C
**Operating Temperature Range (Headers):** -65°C to +105°C
**Dielectric Withstanding Voltage:** 750 VAC
**Termination Resistance:** 12 milliohms (max.)
**Insulation Resistance:** 5000 megohms (min.)
**Mating Force (Receptacle Assemblies):** 9.0 oz. [2.50N] (max.) per contact
**Unmating Force (Receptacle Assemblies):** 1.5 oz. [0.42N] (min.) per contact
**Durability:** Tested to 200 cycles (min.) for .000030 [0.00076] gold plated contacts

# Mod IV Receptacle Assemblies, Single-Row, Surface Mount, .100 [2.54] Centerline with Compliant Pin Hold Downs

## Surface Mount, Single-Row, Dual Entry with Compliant Pin Holddowns

### Material and Finish

**Housing** — Glass-filled thermoplastic, black, 94V-0 rated

**Contacts** — Phosphor bronze, plated as follows:

**Plating A** — Duplex .000030 [0.00076] gold on contact area, .000150-.000300 [0.00381-0.00762] matte tin on solder area all over .000050 [0.00127] nickel

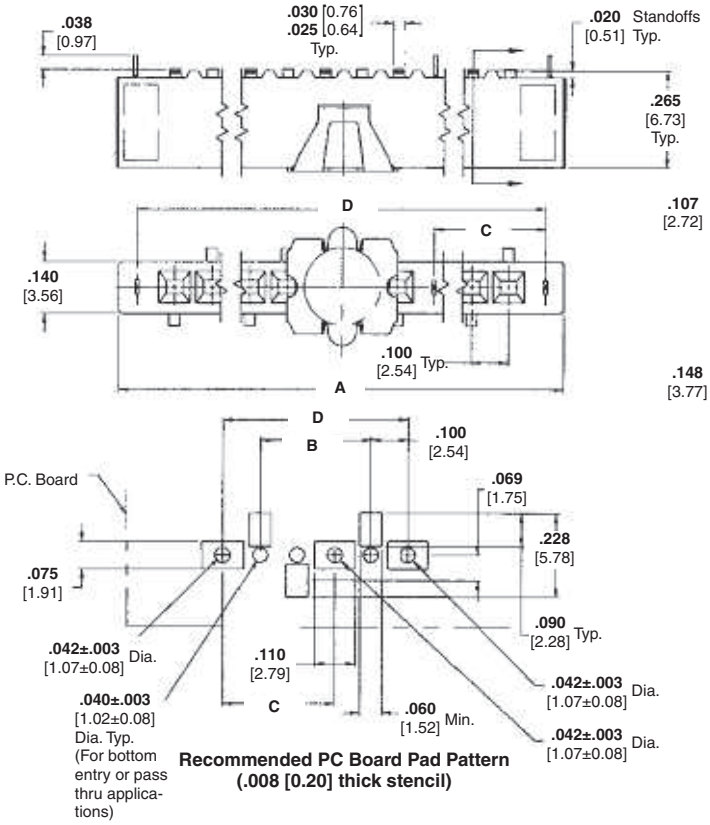

**Plating B** — Duplex .000010 [0.000254] gold on contact area, .000150-.000300 [0.00381-0.00762] matte tin on solder area all over .000050 [0.00127] nickel

**Plating C** — .000150-.000300 [0.00381-0.00762] matte tin on solder leads, all over .000050 [0.00127] nickel

**Notes:** 1. TE recommends mating gold or duplex plated headers with duplex plated receptacle assemblies.
2. To obtain the minimum mating post length, add .020 [0.51] (not including the post lead in chamfer) to the maximum point-of-contact dimension, and .062 [1.57] for recommended board thickness if used in bottom entry application.

**Note:** All part numbers are RoHS compliant.

## Two-Piece Printed Circuit Board Connectors

### Product Facts

- **Two-Piece reliability**
- **Two- and three-row systems available**
- **Short signal path for VLSI applications**
- **Receptacles employ dual cantilever beams and built-in anti-overstress to provide reliable connections**
- **Built-in guides provide alignment before contact engagement**
- **Closed entry receptacle housings provide lead-in ramp for positive mating of contacts**
- **Shrouded headers provide full pin protection**
- **Polarized headers**
- **Vertical headers available with ACTION PIN posts or .025 [0.64] square solder posts**
- **Repairable ACTION PIN posts**
- **Simple seating tooling for headers with ACTION PIN posts**
- **Recognized under the Component Program of Underwriters Laboratories Inc., File No. E28476**
- **Certified by Canadian Standards Association, File No. LR 7189**

## Two-Piece Printed Circuit Board Connectors (Continued)

AMPMODU Two-Piece Printed Circuit Board connectors are designed to reliably and economically meet the packaging and interconnection requirements of today's sophisticated electronics.

The double row system is produced in 10 thru 200 positions in the vertical headers and horizontal receptacles, and 10 thru 160 positions in the right angle headers and vertical receptacles.

The AMPMODU three-row connector system is produced in 30 through 300 positions (straight post headers and mating horizontal receptacles).

Both two- and three-row vertical headers are available with press-fit ACTION PIN posts or standard .025 [0.64] square solder posts. There is a simple seating tool for headers with ACTION PIN posts.

A board retention feature is offered in the two-row horizontal receptacles, two-row right angle headers and two- and three-row vertical headers. Built-in guides assure accurate header and receptacle alignment before contact engagement.

Closed entry receptacle housings provide a lead-in ramp for positive mating of contacts.

### Performance Specifications

**Current Rating** —
3 amperes max. for single contact; 2 amperes max. per contact for fully energized connector

**Voltage Rating** — 250 VAC

**Dielectric Rating** — 750 VAC rms between contacts for one minute

**Termination Resistance** —
12 milliohms max. at 100 milliamperes test current, and 50 millivolts open circuit voltage

**Insulation Resistance** — 1000 megohms after temperature/humidity cycling

**Temperature Rating** —
Headers and Receptacles —
–65°C to +125°C (black thermoplastic housings, 94V-0 rated)

**Durability (Tested to)** — 200 cycles for .000030 [0.00076] gold plating; 75 cycles for .000015 [0.00038] gold plating

**Mating Force** — 8 oz. [2.22N] maximum per contact

**Unmating Force** — .75 oz. [0.2N] minimum per contact during third mating cycle

# Receptacle Assemblies, Board Mount, Double-Row, Closed Entry, .100 x .100 [2.54 x 2.54] Centerline

## Horizontal Mount (with Guide Pin Slots and Standoffs)

### Material and Finish

**Housing** — Glass-filled thermoplastic, black, 94V-0 rated

**Contacts** — Phosphor bronze, plated as follows:

**Plating A** — Duplex plated .000030 [0.00076] gold on contact area, .000050-.000100 [0.00127-0.00254] matte tin on solder area, with entire contact underplated .000050 [0.00127] nickel

**Plating B** — Duplex plated .000015 [0.00038] gold on contact area, .000050-.000100 [0.00127-0.00254] matte tin on solder area, with entire contact underplated .000050 [0.00127] nickel

### Related Product Data

## Accessories: Barrier Insert, Part No. 87743-1

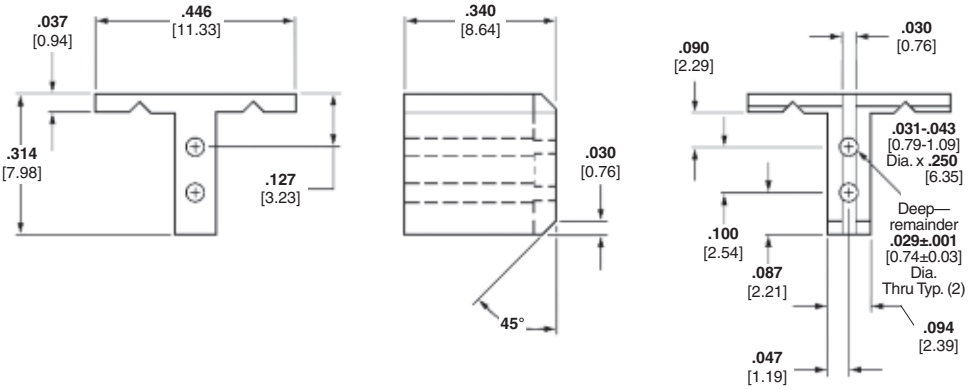

### Material

Black polyester

**Technical Documents** — page 276

The barrier insert can be used on double row headers (.100 x .100 [2.54 x 2.54] centers), including shrouded versions—3 and 4 sides, as well as unshrouded straight post headers. With one barrier insert several configurations can be obtained, providing headers with capabilities of accepting various combinations of polarized and non-polarized AMPMODU connectors.

For unshrouded headers, the barrier insert is used to establish polarization and to compartmentalize the header. For shrouded headers, the barrier insert is used to compartmentalize the header, while maintaining polarization. The barrier insert itself is notched to facilitate cutting off the ends with a simple tool such as tin snips or scissors to achieve the desired configuration.

### Barrier Insert Cutoffs

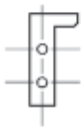

**Fig. 3**
**Complete Cutoff**
(Left Side)
**Partial Cutoff**
(Right Side)

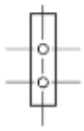

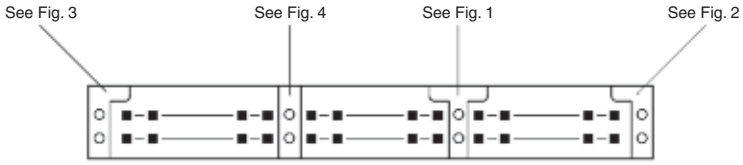

**Fig. 4**
**Complete Cutoff**
(Left and Right Sides)

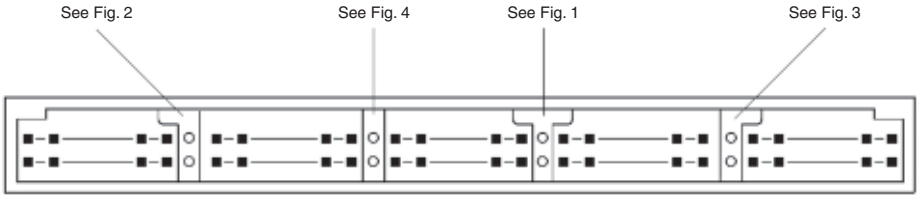

## Typical Barrier Insert Applications

### For Unshrouded Double-Row, Straight Post Headers, .100 x .100 [2.54 x 2.54] Centers

**Note:** All configurations of barrier inserts compartmentalize headers and maintain polarization, except bar (Fig. 4) configuration, which is used primarily for compartmentalizing headers.

### For Shrouded Double-Row, 3 and 4 Sided Headers, .100 x .100 [2.54 x 2.54] Centers

**Note:** Right-angle (Figs. 2 and 3) and "T" (Fig. 1) configurations of barrier insert establish polarization; bar (Fig. 4) configuration of barrier insert compartmentalizes header.

**Note:** All part numbers are RoHS compliant.

## Accessories: Snap-In Polarizer for Low Profile Headers

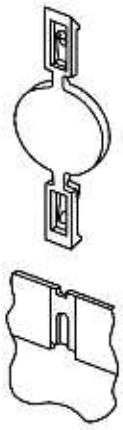

### Material
Black thermoplastic, flame retardant

### Part Numbers
**499991-2** (Packaged 50 per bag)
**499991-3** (Packaged 1000 per bag)

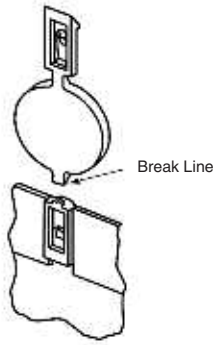

### Related Product Data
**Low Profile Headers used with** — pages 135-140

The snap-in polarizer provides military polarization for low profile headers. Installation of the polarizer is as follows:

Orient the polarizer so that the polarizer latch is on the same side as the inner wall (post side) of the header housing.

Slide the polarizer over the polarizing slot of the housing until the latch engages the hole. Snap off the tab at the break line next to the housing. Using the remaining polarizer, repeat the process for the other housing location.

**Note:** For Post Shunts, contact TE.

**Note:** All part numbers are RoHS compliant.

# Locking Clip Contacts and Housings

## Product Facts

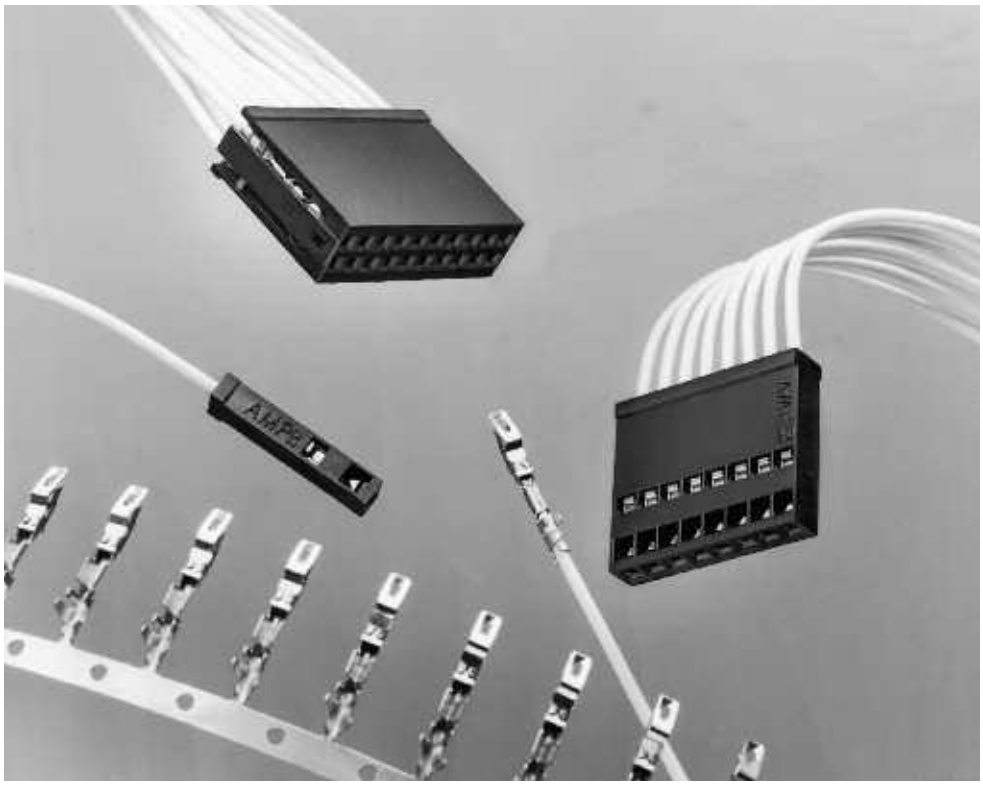

- **Self-retaining contacts provide permanent connection with quick connect and disconnect**
- **Fast, easy installation with no additional locking hardware required**
- **Mates with .025 [0.64] square posts in a variety of configurations**
- **Single- and double-row configurations in up to 20 positions on .100 [2.54] centers**
- **Modular design permits end-to-end stacking (double- row only) for circuit grouping**
- **Choice of tin or select gold plating**
- **Housings made of 94V-0 rated glass-filled polyester**
- **Recognized under the Component Program of Underwriters Laboratories Inc., File No. E28476**
- **Certified by Canadian Standards Association, File No. LR 7189**

## Performance Characteristics

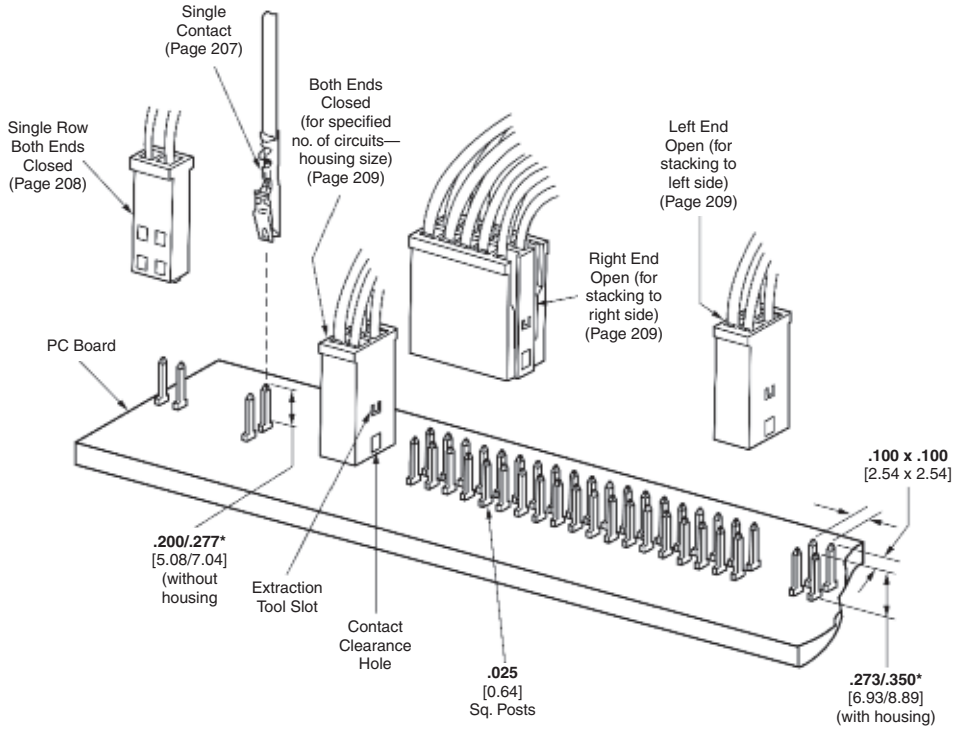

**Contact Current Rating** — 3 amperes

**Termination Resistance** — 12 milliohms (max.) — Gold plated contacts
16 milliohms (max.) — Tin plated contacts

**Durability** — Ref. Product Specification 108-36028 and 108-36028-1

## Typical Application

*If post is longer than maximum specified, post tip may butt against wire ends. Dimension defines .025 x .025 [0.64 x 0.64] portion of post.

*For use with AMP-O-LECTRIC Model "K" machines. Call the Technical Support Center (1-800-522-6752) for part nos. of applicators for use with the AMP-O-LECTRIC Model "G" machines (shown on page 270), as well as other bench machines and fully automatic AMPOMATOR lead making machines.

**Notes:** 1. These contacts must be crimped in accordance with TE Specification No. **114-25006** in order to function properly in a connector housing.

2. **Extraction Tool No. 91084-1** is used for removing individual contacts from connector housings and for detaching contacts from mating posts.

### Related Product Data

**Extraction Tool No. 91084-1**

### Wire Harnessing

If necessary, wires can be grouped with cable ties and secured to a panel with fixed clamps. However, locking clip contacts must be free to float within the connector housings to allow proper extraction. Therefore, harnessing hardware or the use of multiple terminations per contact must not restrict the free-floating action of contacts in the housing.

For more information request Insulation and Bundling Products Catalog 124132.

**Note:** All part numbers are RoHS compliant.

# Mod IV Wire-Applied Contacts and Housings

## Product Facts

- **Terminates 32-20 AWG [0.03-0.6mm²] discrete wire**
- **Contacts have insulation support**
- **Choice of three contact mating pressures**
- **Available in a variety of gold and tin platings**
- **Receptacles mate with .025 [0.64] square or round posts**
- **Dual cantilever contact beam with built-in anti-overstress feature for reliable matings**
- **Housings accept a variety of receptacle and pin contacts**
- **Housing sizes range up to 100 positions**
- **Housing configurations include single- and double-rows on .100 [2.54] centerlines**
- **Housing options include detent latching, polarization and bonded strain relief/ pull tabs**
- **Recognized under the Component Program of Underwriters Laboratories Inc., File No. E28476**
- **Certified by Canadian Standards Association, File No. LR 7189**

## Performance Characteristics

**Contact Current Rating** — 3 amperes

**Termination Resistance** — 12 milliohms (max.) — Beryllium copper contacts

20 milliohms (max.) — Copper-tin-phosphor bronze contacts

**Durability** — Ref. Product Specification 108-25020

**Note:** All part numbers are RoHS compliant.

*Cavity identification, part number and date code stamped on housing where size permits.
**No marking on housing.
**Notes:** 1. Strain reliefs are available and may be purchased separately. Consult TE.
2. Contact **Extraction/Lance Reset Tool No. 843996-3.**

**Note:** All part numbers are RoHS compliant.

### Keying Plugs

**Part No. 86286-1**
(Plugs into standard or intermediate pressure receptacle contact)

**Material** — Natural color nylon

**Part No. 87077-1**
(for .645 high housings)
**Part No. 87077-2**
(for .600 high housings)
(Plugs directly into housing)

*Cavity identification, part number and date code stamped on housing and/or strain relief where size permits.
**No marking on housing or strain relief.

**Notes:** 1. The Strain Relief/Pull Tab can be bonded to any thermoplastic connector housing.
2. Strain reliefs may be purchased separately.
3. Contact **Extraction/Lance Reset Tool No. 843996-3.**

**Note:** All part numbers are RoHS compliant.

# Short Point, Crimp Snap-In Wire-Applied Contacts and Housings

## Product Facts

- **Short point of contact mates with .169 [4.29] to .259 [6.58] long post**
- **Double-row housings are end-to-end and side-to-side stackable**
- **Terminates 32-20 AWG [0.03-0.6 mm²] discrete wire**
- **Contacts have insulation support to accept a maximum insulation diameter of .060 [1.52]**
- **Available with .000015 [0.00038] or .000030 [0.00076] gold duplex, or tin plating**
- **Mates with .025 [0.64] square posts**
- **Dual cantilever contact beams for reliable matings**
- **Locking retention latch provides approximately 3 lb [13.34 N] of retention force**
- **Unique locking latch design helps prevent latch from protruding through latch window**
- **Contacts snap into AMPMODU MTE single-row housings**
- **Double-row housing configurations include .100 [2.54] centerline, plain and polarized**
- **Housing sizes range from 4 to 52 positions**
- **Recognized under the Component Program of Underwriters Laboratories Inc., File No. E28476**
- **Certified by Canadian Standards Association, File No. LR7189**
- **Produced under a Quality Management System certified to ISO 9001**
  A copy of the certificate is available upon request

AMPMODU Short Point receptacle contacts are designed to mate with .025 [0.64] square posts. They will mate with posts as short as .169 [4.29].

Short Point double-row housings are end-to-end and side-to-side stackable on .100 [2.54] centers. Contacts also can be used in single-row AMPMODU MTE housings to provide a complete wire-crimp system, or to serve as replacement contacts.

## Performance Characteristics

**Contact Current Rating** — 3 amperes

**Termination Resistance** — 12 milliohms (max.)

**Durability** — Ref. Product Specification 108-1472

**Note:** All part numbers are RoHS compliant.

## MTE Interconnection System

### Product Facts

- **Receptacle assemblies mate with .025 [0.64] sq. posts; mating post length is .200 [5.08] min., .250 [6.35] max.**
- **Proven AMPMODU receptacle contact design; dual cantilever beams, built-in anti-overstress, completely enclosed "box" design, standard or high-pressure**
- **Insulation displacement technology**
- **Two contact sizes for terminating 30-22 AWG [0.05-0.3 mm²] wire range; .054 [1.37] max. insulation diameter with an insulation wall thickness of .015 [0.38] max.**
- **Choice of gold duplex or tin plated contacts**
- **Interchangeable crimp snap-in pin and receptacle contacts available**
- **Housing sizes 2 through 25 positions, single-row .100 [2.54] centers**
- **Plain housings are end-to-end and/or back-to-back stackable for open pin field applications**
- **Optional header with "swaged tail" feature helps prevent movement prior to flow soldering**
- **Integral latch provides positive retention between header and receptacle housing**
- **Coupling shrouds permit ganging of smaller connectors with guide ribs to form larger single- or double-row latching connectors**
- **Mass terminating tooling provides lowest applied cost for most production needs**
- **SMT and SMT compatible, high-temp headers available**
- **Recognized under the Component Program of Underwriters Laboratories Inc., File No. E28476**
- **Certified by Canadian Standards Association, File No. LR7189**

The AMPMODU MTE Interconnection System offers both wire-to-board and wire-to-wire connectors using .025 [0.64] sq. post technology.

The AMPMODU MTE Interconnection System consists of single-row housings with contacts preloaded on .100 [2.54] centers. Housings are furnished with contacts partially inserted, leaving the termination areas exposed. Final contact insertion can be accomplished automatically with TE application equipment, and manually when terminated with the TE pistol grip hand tool.

The heart of the system is the insulation displacement contact design, featured in both pin and receptacle contacts. The receptacle contact, available in either standard or high-pressure, features dual cantilever beams in an enclosed "box." The post stop helps prevent a mating post from disturbing the wire termination and also limits the mating depth of a long post to protect a wrap-type termination at the base of the post. The forward contact stop helps prevent contact overinsertion prior to termination. All contacts are furnished on carrier strips which are interlocked for stability and positive location during termination.

Single-row housings are available in sizes 2 through 25 positions. Included are three styles of receptacle housings—plain, polarized/latching and ribbed and two styles of pin housings, shrouded with polarizing/latching feature and ribbed.

### Performance Specifications

#### Electrical Characteristics

**Contact Current Rating** — 3 amperes for single contact in free air (Amperage could vary due to ambient temperature, wire size and duty cycles.)

**Contact Termination Resistance** — 15 milliohms (max.)

**Dielectric Withstanding Voltage** — At Sea Level–600 VAC, rms
At 70,000 Ft. [21 336 m]–225 VAC, rms

**Insulation Resistance** — 5,000 megohms (min.)

#### Environmental Characteristics

**Operating Temperature** — -65°C to +105°C

**Vibration** — 15 G's (gold), 10 G's (tin)

**Physical Shock** — 50 G's

**Industrial Mixed Flow Gasing** — Class 1 (20 days) (gold)

**Product Specification** 108-25034

**Application Specification** 114-25026

# MTE Receptacle Assemblies—Plain, Single-Row, .100 [2.54] Centerline

**Preassembled housings in strip form are available in positions 2 thru 12. For ease of handling, positions 2 thru 5 are recommended when using the TE Manual Pistol Grip Tool.**

## Material and Finish

**Housing** — Black thermoplastic, 94V-0 rated

**Contacts** — Phosphor Bronze, plated as follows:

**Plating A** — Duplex plated .000030 [0.00076] gold on contact area, .000050 [0.00127] min. tin in crimp area, with entire contact underplated .000050 [0.00127] nickel

**Plating B** — Duplex plated .000015 [0.00038] gold on contact area, .000050 [0.00127] min. tin in crimp area, with entire contact underplated .000050 [0.00127] nickel

**Plating C** — .000100 [0.00254] tin over .000050 [0.00127] nickel on entire contact

**Note:** Insulation displacement contacts accept an insulation diameter of .030 [0.76] min. to .054 [1.37] max. with an insulation wall thickness of .015 [0.38] max. Mating post length for preloaded housings is .200 [5.08] min., .250 [6.35] max.

**Notes:** 1. Receptacle assemblies are furnished with strip contacts partially inserted into housing—contacts latched into "preload" windows. Contacts are fully inserted into housings automatically when terminated with TE application machines, or manually when terminated with TE pistol grip hand tool.
2. Use **Extraction/Lance Reset Tool No. 843477-1** to remove receptacle contacts.
3. Keying plugs are available, see page 253.

**Note:** All part numbers are RoHS compliant.

# MTE Receptacle Assemblies—Polarized/Latching, Single-Row, .100 [2.54] Centerline

**Preassembled housings in strip form are available in positions 2 thru 12. For ease of handling, positions 2 thru 5 are recommended when using the TE Manual Pistol Grip Tool.**

## Material and Finish

**Housing** — Black thermoplastic, 94V-0 rated

**Contacts** — Phosphor Bronze, plated as follows:

**Plating A** — Duplex plated .000030 [0.00076] gold on contact area, .000050 [0.00127] min. tin in crimp area, with entire contact underplated .000050 [0.00127] nickel

**Plating B** — Duplex plated .000015 [0.00038] gold on contact area, .000050 [0.00127] min. tin in crimp area, with entire contact underplated .000050 [0.00127] nickel

**Plating C** — .000100 [0.00254] tin over .000050 [0.00127] nickel on entire contact

**Note:** Insulation displacement contacts accept an insulation diameter of .030 [0.76] min. to .054 [1.37] max. with an insulation wall thickness of .015 [0.38] max. Mating post length for preloaded housings is .200 [5.08] min., .250 [6.35] max.

**Notes:** 1. Receptacle assemblies are furnished with strip contacts partially inserted into housing—contacts latched into "preload" windows. Contacts are fully inserted into housings automatically when terminated with TE application machines, or manually when terminated with TE pistol grip hand tool.
2. Use **Extraction/Lance Reset Tool No. 843477-1** to remove receptacle contacts.
3. Keying plugs are available, see page 253.

**Note:** All part numbers are RoHS compliant.

# MTE Receptacle Assemblies—Guide Ribs, Single-Row, .100 [2.54] Centerline

**Preassembled housings in strip form are available in positions 2 thru 12. For ease of handling, positions 2 thru 5 are recommended when using the TE Manual Pistol Grip Tool.**

## Material and Finish

**Housing** — Black thermoplastic, 94V-0 rated

**Contacts** — Phosphor Bronze, plated as follows:

**Plating A** — Duplex plated .000030 [0.00076] gold on contact area, .000050 [0.00127] min. tin in crimp area, with entire contact underplated .000050 [0.00127] nickel

**Plating B** — Duplex plated .000015 [0.00038] gold on contact area, .000050 [0.00127] min. tin in crimp area, with entire contact underplated .000050 [0.00127] nickel

**Plating C** — .000100 [0.00254] tin over .000050 [0.00127] nickel on entire contact

**Note:** Insulation displacement contacts accept an insulation diameter of .030 [0.76] min. to .054 [1.37] max. with an insulation wall thickness of .015 [0.38] max. Mating post length for preloaded housings is .200 [5.08] min., .250 [6.35] max.

**Notes:** 1. Pin assemblies are furnished with strip contacts partially inserted into housing—contacts latched into “preload” windows. Contacts are fully inserted into housings automatically when terminated with TE application machines, or manually when terminated with TE pistol grip hand tool.
2. Use **Extraction/Lance Reset Tool No. 843477-1** to remove pin contacts.

**Note:** All part numbers are RoHS compliant.

**Notes:** 1. Pin assemblies are furnished with strip contacts partially inserted into housing—contacts latched into "preload" windows. Contacts are fully inserted into housings automatically when terminated with TE application machines, or manually when terminated with TE pistol grip hand tool.
2. Use **Extraction/Lance Reset Tool No. 843477-1** to remove pin contacts.

**Note:** All part numbers are RoHS compliant.

# MTE Headers, Shrouded Polarized/Latching, Single-Row .100 [2.54] Centerline

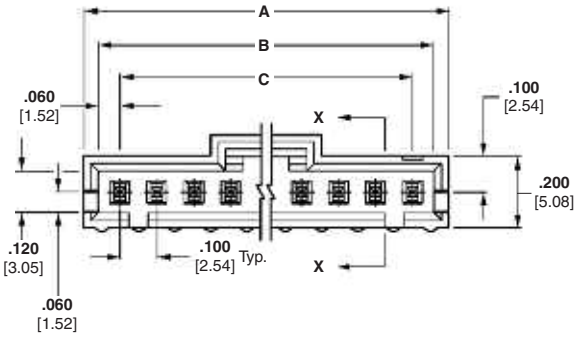

## .025 [0.64] Square Straight Post (With or Without Swaged Tail)

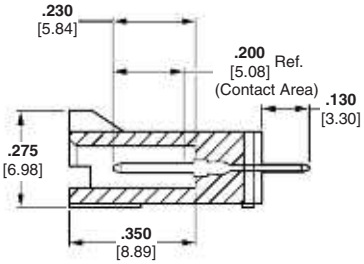

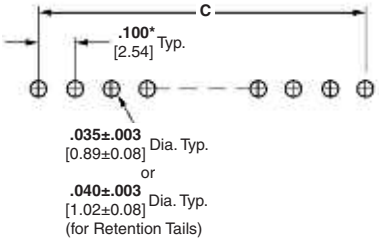

Swaged Retention Tail
(See Note)

**Section X-X**

**Recommended PC Board Hole Layout**

*±.003 [±0.08]; tolerances not to accumulate within one connector pattern.

**Note:** Swaged retention tails are provided in a minimum of two locations per header.

### Material and Finish

**Housing** — Black thermoplastic, 94V-0 rated

**Posts** — Brass, plated as follows:

**Plating A** — Duplex plated .000030 [0.00076] gold on contact area, .000100 [0.00254] min. tin on solder area, with entire post underplated .000050 [0.00127] nickel

**Plating B** — Duplex plated .000015 [0.00038] gold on contact area, .000100 [0.00254] min. tin on solder area, with entire post underplated .000050 [0.00127] nickel

**Plating C** — .000100 [0.00254] tin over .000050 [0.00127] nickel on entire post

# MTE Headers, Shrouded Latching, Single-Row .100 [2.54] Centerline

## .025 [0.64] Square Right-Angle Post

### Material and Finish

**Housing** — Black thermoplastic, 94V-0 rated

**Posts** — Brass, plated as follows:

**Plating A** — Duplex plated .000030 [0.00076] gold on contact area, .000100 [0.00254] min. tin on solder area, with entire post underplated .000050 [0.00127] nickel

**Plating B** — Duplex plated .000015 [0.00038] gold on contact area, .000100 [0.00254] min. tin on solder area, with entire post underplated .000050 [0.00127] nickel

**Plating C** — .000100 [0.00254] tin over .000050 [0.00127] nickel on entire post

**Receptacle Assemblies with Guide Ribs (installed in Single-Row Coupling Shroud)** — pages 232, 233, 235, 240

**Technical Documents** — pages 277, 278

**Product Specification** 108-25034

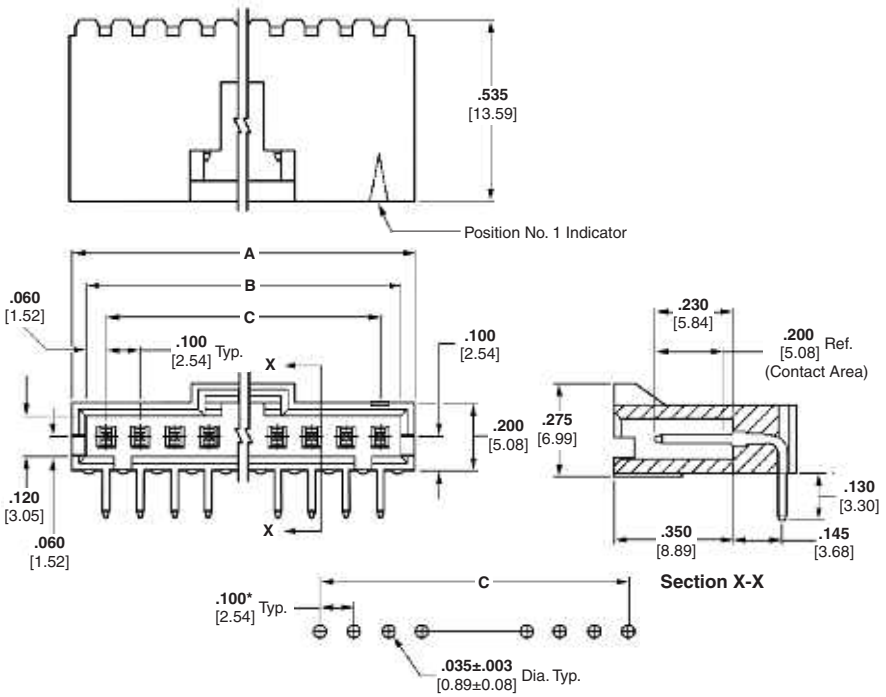

**Application Specification** 114-25026

### With Holddown

**Recommended PC Board Hole Layout**
**(PC board thickness (for Holddown Feature) is .062±.008 [1.57±0.20])**
*±.003 [±0.08]; tolerance not to accumulate within one connector pattern.

### Without Holddown

**Recommended PC Board Hole Layout**
*±.003 [±0.08]; tolerance not to accumulate within one connector pattern.

# MTE Headers, Right-Angle, Polarized/Latching, Surface Mount

## Material and Finish

**Housing** — Black thermoplastic, 94V-0 rated

**Posts** — Brass, plated as follows:

**Plating A** — Duplex plated .000030 [.00076] gold on contact area, .000100 [.00254] min. tin on solder area, with entire post underplated .000050 [.00127] nickel.

**Plating B** — Duplex plated .000015 [.00038] gold on contact area, .000100 [.00254] min. tin on solder area, with entire post underplated .000050 [.00127] nickel.

**Plating C** — .000100 [.00254] tin over .000050 [.00127] nickel on entire post

## Recommended PC Board Layout

(Refer to MTE Application Spec. 114-25026 for Stencil Aperture Layout Using .006 [0.152] or .008 [0.203] Stencil Thickness)

## Interchangeable Contacts, Wire Crimp (Snap-In)

### Material and Finish

Copper alloy C7025, plated as follows:

**Plating A** — Duplex plated .000030 [0.00076] min. gold on contact area, .000050 [0.00127] min. tin in crimp area, with entire contact underplated .000050 [0.00127] min. nickel

**Plating B** — Duplex plated .000015 [0.00038] min. gold on contact area, .000050 [0.00127] min. tin in crimp area, with entire contact underplated .000050 [0.00127] min. nickel

**Plating C** — .000100 [0.00254] min. tin over .000050 [0.00127] min. nickel on entire contact

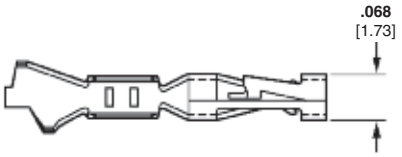

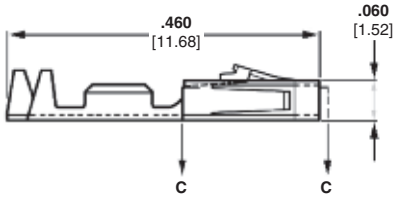

**Keying Plug**
**Part No. 104072-1**
Ten plugs are supplied per strip.
Order quantity reflects the number of strips required.

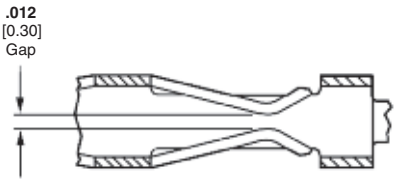

**Extraction/Lance Reset Tool No. 843477-1**

# MT and Shielded MT Interconnection System

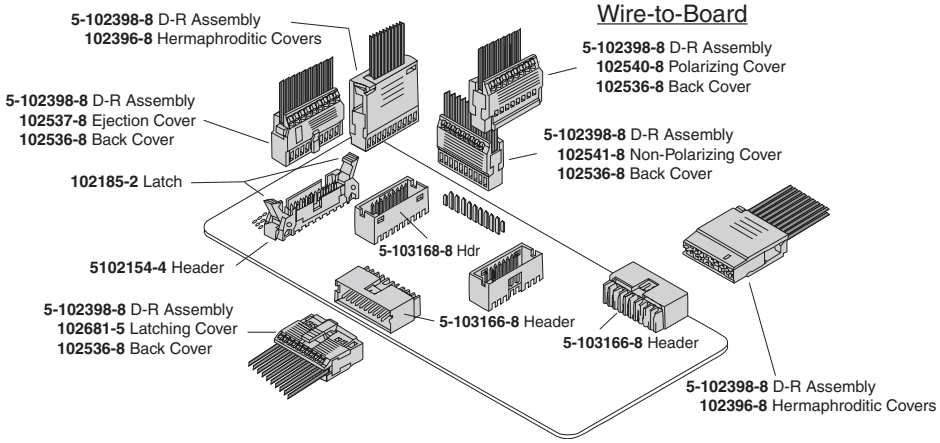

## Product Facts

- **Full line of mass termination tooling offers lowest installed cost for most production needs**
- **Dual cantilever beams with anti-overstress features provide redundant contact of mating post and limit beam deflection, preventing permanent deformation**
- **Redundant insulation displacement slots provide for maximum reliability**
- **Integral wire strain relief on contact can prevent wire motion from being transmitted to wire termination areas**
- **Built-in contact post stop can protect terminated wire from being disturbed by over-insertion of mating post, prevents wire from entering contact area and positively limits mating connector depth**
- **Insulation displacement contacts and crimp, snap-in contacts are interchangeable**
- **Complete serviceability with replacement contacts**
- **Cover styles include low profile (polarized, non-polarized, latching and ejection) and standard profile (hermaphroditic and ejection)**
- **Connector housings may be stacked end-to-end within one pair of covers. All varieties of covers in this catalog are suitable for multiple housing stacking applications similar to the example illustrated in the photograph to the right**
- **Recognized under the Component Program of Underwriters Laboratories Inc., File No. E28476**
- **Certified by Canadian Standards Association, File No. LR 7189**

**Typical Application of End-to-End Stacking**

The AMPMODU MT and Shielded MT Interconnection System offers labor and cost savings through mass termination technology, while maintaining the time-proven reliability of the AMPMODU product family. The MT system is comprised of preloaded, double-row receptacle assemblies with snap-on covers and a variety of shielding hardware and accessories. The system is supported by a full line of mass termination tooling to meet virtually most production needs.

The insulation displacement contact, the heart of the MT system, features a mating interface that is the same as the conventional AMPMODU crimp, snap-in contact, featuring dual cantilever beams, built-in overstress protection and a completely enclosed "box" design.

To reduce EMI/ESD (electromagnetic interference/electrostatic discharge) at the input-output interface, add-on metal shields can be used to convert standard MT connectors to shielded MT connectors.

## Performance Characteristics

**Contact Current Rating** —
3 amperes for single contact in free air. (Amperage could vary due to ambient temperature, wire size and duty cycles.)

**Operating Temperature** —
-65°C to +105°C

**Termination Resistance** —
12 milliohms max.

**Max. Mating Force** —
High pressure - 26 oz. [7.23 N]
Standard pressure - 9 oz. [2.50 N]

**Min. Unmating Force** —
High pressure — 5 oz. [1.39 N]
Standard pressure — 1.5 oz. [0.417 N]

**Contact Retention in Housing** —
5 lb. [22.24 N] per contact min.

**Note:** All part numbers are RoHS compliant.

**Technical Documents** — pages 277, 278

**Product Specification**
108-25015, 108-25018, 108-25030

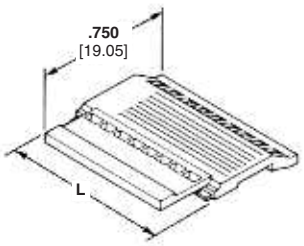

**Application Specification**
114-25032

**Instruction Sheet**
408-6532

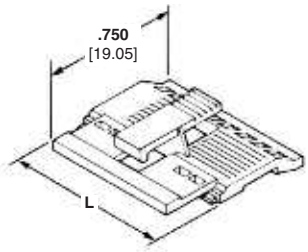

**Note:** See page 259 for Low Profile Cover Part Nos.

## Front Covers

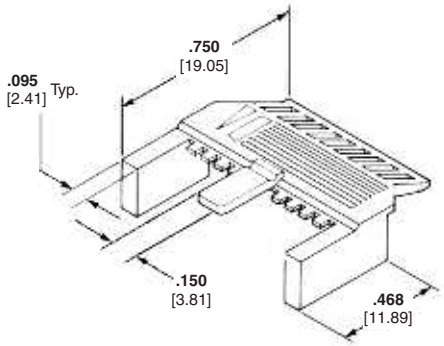

**A - Polarizing Cover**
(Mates with AMPMODU 4-sided shrouded headers. Refer to pages 117, 122, 126, 130.)

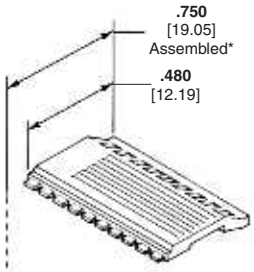

**B - Latching Cover**
(Mates with AMPMODU 4-sided shrouded headers with extraction slot. Refer to pages 117, 122, 126, 130.)

**C - Ejection Cover**
(Mates with AMP-LATCH universal ejection style pin headers equipped with latching ears, Part No. 102185-2 (with push tabs) or Part No. 102312-2 (without push tabs), see TE Catalog 82012.

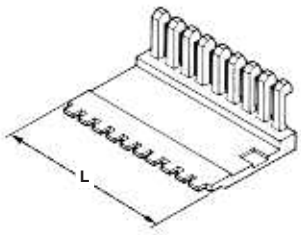

**D - Non-Polarizing Cover**
(Designed for use with shielded connectors, pages 261 & 262; or for non-polarizing applications.)

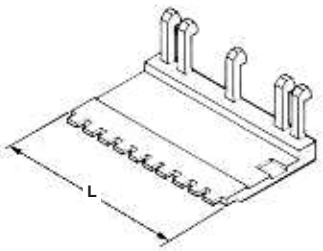

*Dimension applies to cover when installed on connector housing.

## Back Covers

**E - For Shielding and Non-Shielding Applications**
(For use with any low profile cover.)

**F - For Shielding Applications**
(For use with Non-Polarizing Cover only.)

**Note:** All part numbers are RoHS compliant.

## Shielding Hardware and Accessories for MT Interconnection System

### Product Facts

- **Add-on shielding accessories for existing AMPMODU Standard MT and PC board mounted headers**
- **Compact design**
- **Tin plated copper alloy material**
- **Redundant cantilever beams provide for good peripheral contact, eliminating the need for a separate RF gasket**
- **Polarized mating**
- **360° cable braid termination with cable jacket support**
- **Cable shielding hardware permits molded cable terminations after assembly**
- **Must be used with braided shielded cables**
- **Solder tabs on right-angle header shields are self-retaining in a PC board**

**Shielded MT Receptacles**

**Shielded Right-Angle Headers**

The shielded AMPMODU MT system features add-on metal shielding kits for double-row standard MT receptacle assemblies and double-row right-angle headers.

Cable shielding hardware consists of a ferrule and two stamped and formed shell halves. The inner shell half has a series of integral cantilever beams to provide good peripheral contact with the mating outer shell half. This feature also eliminates the need for a separate RF gasket. Detents in the cantilever beam provide a positive lock when the two halves are mated. During assembly the inner and outer shell halves are snapped together over a terminated standard MT connector.

Shields for right-angle headers have integral cantilever beams which provide good contact with the mating shielded MT receptacle assembly, without the use of a separate RF gasket.

## AMPMODU Right-Angle Headers PC Board Mounted

### Material and Finish

**Housing** — Black thermoplastic, flame retardant

**Posts** — Copper alloy, plated .000030 [0.00076] gold over .000050 [0.00127] nickel on entire post

**Shield** — Copper alloy, .020 [0.51] thick; pretinned .000030 [0.00076] min.

**Note:** Termination tooling for MT receptacle insulation displacement contacts is shown on pages 273-275.

MT receptacle contacts incorporate the following features.

The MT receptacle contact cross-section is primarily rectangular, with rounded corners. Two integral cantilever beams contact the mating square male posts. Deflection of these spring members is limited by anti-overstress and excessive permanent deformation is prevented. This feature allows a wide range for tolerance of misalignment of mating contacts.

The configuration of the receptacle completely encloses the spring members helping to prevent damage during handling and assembly, and makes the system compatible with automatic application techniques.

**Extraction/Lance Reset Tool No. 843477-3**

# Mini-Tandem Spring Receptacle Housings and Contacts

## Product Facts

- **Individual contacts mate with .025 [0.64] sq. posts, .125 [3.18] long**
- **Crimp snap-in contacts accept 32-22 AWG [0.03-0.32 mm$^2$] wire**
- **Retention latch provides for positive installation**
- **No insertion tool required**
- **High durability design provides long life**
- **Available with .000015 [0.00038] or .000030 [0.00076] thick gold inlay in contact areas, or bright tin plated**
- **Closed-entry housings**
- **Mini-contact box size: .060 [1.52] sq.**
- **Mini-Tandem Spring Housings can be stacked on .100 [2.54] centers in either direction**
- **Mini-Tandem Spring Housings are Recognized under the Component Program of Underwriters Laboratories Inc., File No. E28476**
- **Certified by Canadian Standards Association, File No. LR 7189**

Mini-Tandem Spring Receptacle Contacts are designed to mate with .025 [0.64] posts. When used individually, they will mate with posts as short as .125 [3.18] and when used in a housing, they will mate with .140 [3.55] long posts. These versatile contacts may be used for interconnecting posted pc panels, I/O wiring and cross-connecting pin arrays.

The receptacle contact's box configuration provides for long contact life with controlled contact mating forces which minimize wear. An external retention spring facilitates quick assembly and provides firm seating in a contact housing.

Mini-Tandem Spring Receptacle Contacts are used in single- or double-row housings with .100 [2.54] centerline spacing. Single-row housings can be converted into double-row connectors on .100 x .200 [2.54 x 5.08] centers with the use of stacking clips.

Mini-Tandem Spring Housings can be stacked side-by-side or end-to-end on .100 [2.54] centers.

## Specifications

**Contact Current Rating** — 3 amperes

**Termination Resistance** — 12 milliohms (max.) — gold plated contacts
18 milliohms (max.) — tin plated contacts

## Application Tooling for Wire Crimp Contacts

Tooling shown on this page is designed to terminate wire crimp contacts used in various AMPMODU wire-to-board connectors. Refer to page 88 to determine the applicable connectors.

**AMP-O-LECTRIC Model "G" Terminating Machine (Shown with Optional Crimp Force Monitor)**

A totally new design of our most popular machine for bench-top operation. It features a quiet and reliable direct motor drive, electronic controls for easy setup and operation, and improved guarding and lighting for operator convenience and safety. All versions include either manual or automatic precision adjustment for crimp height.

For further details, request TE Catalog 65828.

**AMP-O-MATIC Stripper/Crimper Machine**

This machine automatically strips as well as terminates individual wires. Similar to the AMP-O-LECTRIC Model "G" machine, applicators are quickly interchangeable, and it includes precision adjustment for crimp height. All adjustments can be made from the front of the machine, without special tools.

For further details, request TE Catalog 65004.

**Applicators**

Several terminating machines, including the AMP-O-LECTRIC Model "G", AMP-O-MATIC Stripper/ Crimper and AMPOMATOR CLS machines, are designed for use with interchangeable applicators. Basic styles are quickly interchangeable to minimize costly downtimes, and feature dial-in wire and insulation crimp height settings. Special applicators are available for use with the Crimp Force Monitor (see page 272), for measuring the crimp height of each termination as it is made, plus evaluating the quality of each crimp.

**Heavy Duty Miniature Applicators**

**EDGE, Electronic Applicator Counter**

The new versatile EDGE applicator counter tracks wearable tool usage for the most effective maintenance planning. The completely electronic counter with clear LCD display, indicates cycles since installation. By performing maintenance at measured intervals with pre-set limits, operators avoid breakdowns and rejects caused by tool wear or mid-adjustment. For more information, request catalog 1773385.

## Application Tooling for Wire Crimp Contacts (Continued)

### AMP 3K/40 and AMP 5K/40 Terminators

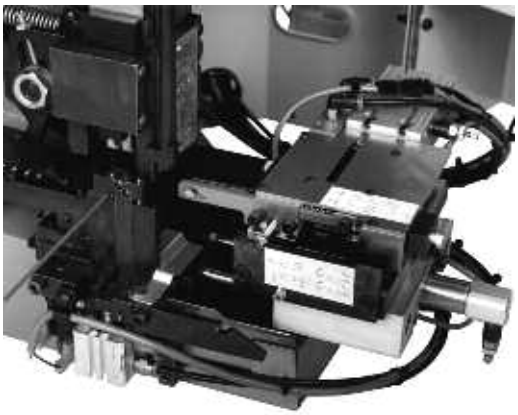

As a value oriented terminator, the AMP 3K/40 and AMP 5K/40 are designed for customers that require the increased output and quality of a semiautomatic machine at a competitive price. By incorporating the most commonly requested features as standard and offering a long list of optional equipment, these terminators offer flexibility to meet the specific needs of various applications at the lowest possible cost.

**AMP 5K/40 Terminator**

### Optional Stripping Module for the AMP 3K/40, AMP 5K/40 and the AMP-O-LECTRIC Model G

The combination of the Stripping Module with the AMP-O-LECTRIC Model G Terminator or the AMP 3K/40, 5K/40 provides an economical, proficient method of stripping wire and crimping terminals on the same machine. Wires are stripped moments before crimping, meaning there is virtually no chance of damaging wire conductors during handling or storage. Once the wire is fed into the start sensor, the Stripping Module does the rest, improving placement accuracy. For more information, request catalog 1309085.

## Application Tooling for Wire Crimp Contacts (Continued)

Tooling shown on this page is designed to terminate wire crimp contacts used in various AMPMODU wire-to-board connectors. Refer to page 88 to determine the applicable connectors.

### Crimp Force Monitor (CFM)

Your quality program calls for more than a good crimping system. It demands proof - the proof you get with the SLE Crimp Force Monitor. It has high-resolution piezo-quartz sensor technology for a more precise identification of typical crimping faults. The monitor features Zone & Peak Force Analysis, 128x128 Dot Matrix, Force Trigger and Encoder Proximity Trigger, and Absolute Force Measurement for real-time monitoring of every crimp. The CFM can be used with bench or fully-automatic machines. Special applicators are not required.

Sure, you can sample and test crimp height with a micrometer. In fact, that's how you standardize your process. But for ongoing quality control, testing every crimp, SLE is the choice. It's known worldwide, and meets our standards for a high performance terminating system. That's how you can be sure.

High quality crimping - with verification - means higher production and productivity.

### AMPOMATOR System III Leadmaker

The AMPOMATOR System III is an automatic machine for the production of terminated wire leads. The machine combines state of the art technology to process single and double wire application utilizing the wire processing industry's best and most friendly subsystems and accessories available to meet the latest market requirements for wire lead production.

The new machine incorporates a servo-driven, software-controlled AMP-O-LECTRIC ST III terminator and the next generation System III Applicator.

See catalog 1654956-5 for more information.

### Commercial PRO-CRIMPER III Hand Tool

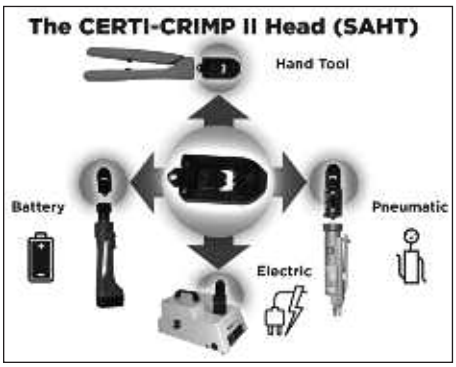

Commercial grade hand tool for crimping various products. Features ratchet control to provide complete crimp cycle. Accepts both pinned- and shouldered-style die sets. Locators are provided with pinned-style die sets for proper contact and wire positioning, and to help minimize contact rotation and bending during crimping. Approximate weight 1.3 lb [0.60 kg].

### Premium CERTI-CRIMP Straight Action Hand Tool (SAHT)

TE hand tools are ideal for small production and prototype applications. They feature ratchet control to help eliminate partial crimps, straight-line die closure, terminal locator and support, and insulation crimp adjustment. TE hand tools also can be adapted for use with pneumatic tooling assemblies, providing air operated crimping capabilities.

For further details on TE straight action hand tools, request TE Catalog 65780. For more details on TE pneumatic tooling assemblies, call the TE Technical Support Center, 1-800-522-6752.

# Application Tooling for Insulation Displacement Crimp (IDC) Contacts and Connectors

Tooling shown on this page is designed to terminate IDC contacts for various AMPMODU wire-to-board connectors. Refer to page 88 to determine the applicable connectors.

### Pistol Grip Manual and Air Powered Tools

The manual pistol grip tool features an interchangeable modular terminating head which also can be used in the pneumatic version, the Bench Mount Pneumatic Power Assembly and the IDC Electric Power Unit. The head terminates one unstripped wire per cycle and indexes the connector to the next terminating position. The head rotates to permit optimum access to the wiring area.

The Bench Mount Pneumatic Power Assembly is air actuated with either a foot or knee switch. This capability frees the operator's hands for optimum positioning.

**Modular Heads:**

**58062-1** (for MT connectors)
**58336-1** (for MTE connectors)
**58395-1** (for Level V IDC connectors)
**58540-1** (for MTE connectors, discrete wire or flat ribbon cable)

**Manual Pistol Grip Tool No. 58074-1**

**Pneumatic Pistol Grip Tool No. 58075-1**

**Bench Mounted Pneumatic Power Assembly No. 58338-1**

**IDC Electric Power Unit No. 931800-1**

### IDC Electric Power Unit

This electrically powered semiautomatic bench machine is designed for applying AMPMODU MTE and MT connectors to discrete wires. It is portable and compact and uses existing pistol grip modular heads. The heads are easily interchanged to run different products. *The IDC Electric Power Unit's cycle rate is approximately 7,200 cycles per hour, with exact production rates depending upon operator dexterity.

**Modular Heads:**

**58062-1** (for MT connectors)
**58336-1** (for MTE connectors)

*A tube-fed track assembly, Part No. 856675-1, also can be used with MTE Connectors.

**Modular Head Tool No. 58540-1**

This modular head tool can be used on any pistol grip tool. It was designed for discrete wire or flat ribbon cable applications.

**Note:** All part numbers are RoHS compliant.

## Application Tooling for Insulation Displacement Crimp (IDC) Contacts and Connectors (Continued)

Tooling shown on this page is designed to terminate IDC contacts for various AMPMODU wire-to-board connectors. Refer to page 88 to determine the applicable connectors.

### Tube-Fed Ribbon Cable Machine

**Tube-Fed Ribbon Cable Machine No. 856002-1**

Designed for bench applications, this machine is pneumatically operated and controlled by a foot pedal. It terminates connectors onto end-notched ribbon cable. *The connectors are supplied in strip form and in plastic tubes. The machine consists of three basic subassemblies: a feed track, a terminating station and a seating station. The feed track is a constant force, spring-driven unit which conveys connectors through the product tube to the terminating station. The air-operated terminating station positions and terminates contacts onto the notched cable. The seating station is manually operated and seats connector housings onto the terminated contacts.

*At a rate of 13-25 positions at a time.

### 2700 lb. Power Unit With Cable Notching Die

**2700 lb. Power Unit No. 312522-1**

Equipped with a cable notching die an adapter kit, this fully pneumatic bench machine provides the 2700 lb [12 010N] force required for end-notching ribbon cable. It features a grooved cable support plate, a pressure plate and a cable stop to facilitate cable alignment and positioning during the notching process.

**Notching Dies:**

**854449-1** (for 24-22 AWG [0.2-0.6 mm$^2$] Wire

**854449-2** (for 28-26 AWG [0.08-0.15 mm$^2$] Wire

**Note:** All part numbers are RoHS compliant.

Tooling shown on this page is designed to terminate IDC contacts for various AMPMODU wire-to-board connectors. Refer to page 88 to determine the applicable connectors.

### CHAMPOMATOR Model 2.5 Terminating Machine No. 354786-(*)

This compact bench machine terminates wires manually sorted from multiconductor cables. Termination sequence may include full termination of all contacts, or selective termination. Designed for easy programming, the machine is microprocessor controlled and programmed by a membrane switch keyboard. It also has an internal storage capability for retaining up to 350 cable assemblies. Connectors can be terminated with either straight or right-angle wire dress.

*For applicable dash nos., call the Technical Support Center: 1-800-522-6752.

For further details, request TE Catalog 82247

### CHAMPOMATOR Model 3A Terminating Machine No. 761420-(*)

This floor model machine automatically sorts wires from multiconductor jacketed cable and terminates them in a user-determined sequence; either full termination of all contacts, or selective termination. Designed for easy programming, the machine is microprocessor controlled and programmed by a touchscreen. It also has an internal storage capability for retaining up to 50 cable assemblies. Connectors can be terminated with either straight or right- angle wire dress. All cable assemblies are tested for continuity and shorts.

*For applicable dash nos., call the Technical Support Center: 1-800-522-6752.

For further details, request TE Catalog 82247

**Note:** All part numbers are RoHS compliant.

# Level V IDC Connectors, .125 x .125 [3.18 x 3.18] Centerline

## Product Facts

- **Termination of discrete wire sizes 26-22 AWG [0.12-0.3 mm²] as well as jacketed cable and bonded ribbon cable (conductors separated)**
- **Connectors stackable end-to-end and side-to-side on .125 [3.18] centers**
- **Connectors preloaded with insulation displacement receptacle contacts**
- **Contact design employs dual cantilever beams, redundant insulation displacement slots, built-in post stop and wire support crimp**
- **Copper alloy contacts are duplex plated**
- **Snap-on covers with or without cable tie paddles**
- **Full line of mass termination tooling offers lowest installed costs for most production needs**
- **Recognized under the Component Program of Underwriters Laboratories Inc., File No. E28476**
- **Certified by Canadian Standards Association, File No. LR 7189**

AMPMODU Level V IDC connectors provide cost effective discrete wire connections that are compatible with today's telecommunications packaging techniques. These connectors are designed to mate with .025 [0.64] sq. posts on .125 x .125 [3.18 x 3.18] centers and are comprised of double-row housings preloaded with insulation displacement receptacle contacts, snap-on hermaphroditic covers, and a full line of mass termination tooling to meet virtually every production need. For modular flexibility, connectors can be stacked end-to-end or side-to-side, maintaining a .125 x .125 [3.18 x 3.18] centerline spacing.

Covers can be furnished with and without a cable tie paddle. The covers are simply snapped onto a housing after the connector has been terminated.

The receptacle contacts feature the TE insulation displacement crimp technique for achieving top quality, low cost terminations. These contacts employ dual cantilever beams for redundant interface with a mating post, an integral post stop to limit post mating depth and protect the crimp termination, and a wire support (strain relief) crimp to prevent accidental wire pull-out. The contacts are made of high conductivity copper alloy and are duplex plated.

## Performance Characteristics

**Contact Current Rating** — 3 amperes

**Termination Resistance** — 12 milliohms (max.)

**Durability** — Ref. Product Specification 108-25028 (Interconnection System, Insulation Displacement Connector, IDC Level)

## Housings Preloaded with Insulation Displacement Crimp Receptacle Contacts

### Material and Finish

**Housing** — Black thermoplastic, flame retardant

**Contacts** — Copper alloy, duplex plated .000050 [0.00127] gold on contact area, .000100 [0.00254] min. tin in crimp area, with entire contact underplated .000050 [0.00127] nickel

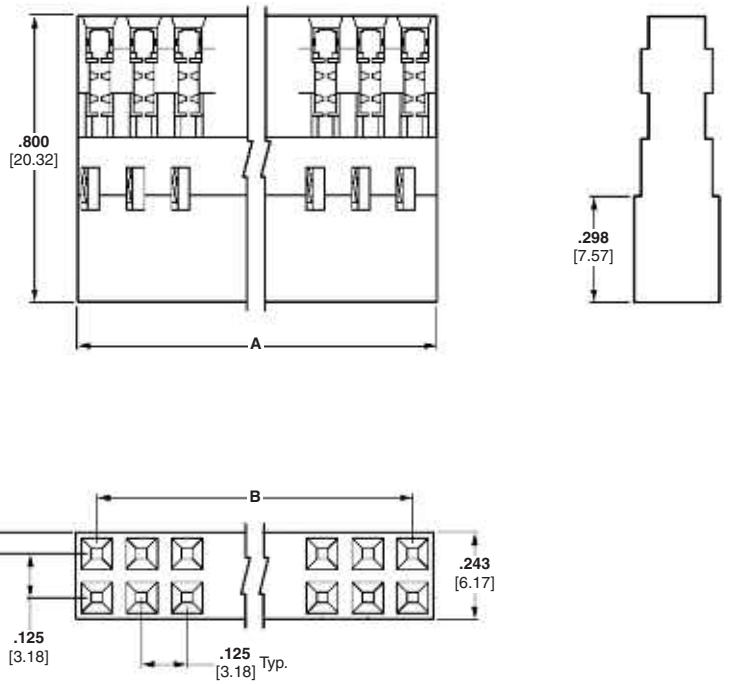

**Note:** Preloaded contacts accept max. insulation dia. of .050 [1.27]. The minimum point of contact, as measured from front edge of housing, is .095 [2.41].

# AMPMODU .031 x .062 [0.79 x 1.57] Interconnection System

## Product Facts

- **Rugged connector system featuring .031 x .062 [0.79 x 1.57] posts with mating receptacles**
- **Current rating 5 amps max per contact. Varies due to ambient temperature, wire size and duty cycles.**
- **Available for board-to-board and wire-to-board applications**
- **Posts available on strip for machine application directly to pc board or in housings for board mounting**
- **Receptacles available for board mounting or wire crimping**
- **Contacts available in both tin and gold plating**
- **Flame retardant thermoplastic housings 94V-0 rated**
- **Locking Clip contacts available to mate with .031 x .062 [0.79 x 1.57] posts**
- **Recognized under the Component Program of Underwriters Laboratories Inc., File No. E28476**
- **Certified by Canadian Standards Association, File No. LR 16455**

The .031 x .062 [0.79 x 1.57] interconnection system has served as an industry standard for modular packaging for over three decades. It is a rugged, large scale system designed for board-to-board and board-to-wire or cable applications that has offered millions of reliable interconnections and countless mating cycles. This versatile interconnection system successfully meets the requirements for most modular power supply packaging.

Board mounted receptacles and receptacle assemblies are available in various geometries, offering packaging interconnections that include perpendicular, parallel and stacking capabilities. Machine applied terminations, through matched application equipment, are geared to virtually any production requirement, assuring the lowest possible applied cost.

Crimp snap-in receptacles for 26-18 AWG [0.12 – 0.9mm$^2$] wire provide excellent discrete wire terminations. Housings for these contacts provide for ease of handling terminations in high density applications.

AMPMODU mating posts are supplied typically as header assemblies. They are available in various sizes to meet the interconnection and packaging requirements of your system. However, in instances where packaging configurations do not lend themselves to the economies of assemblies, TE can provide for the discrete location of individual posts and receptacles.

If your interconnections require Top Entry, Bottom Entry and/or Side Entry for perpendicular, parallel and stacked configurations, the .031 x .062 [0.79 x 1.57] interconnection system can fulfill your needs with the lowest applied cost through efficient interconnections and supporting application equipment.

## AMPMODU .031 x .062 [0.79 x 1.57] Interconnection System (Continued)

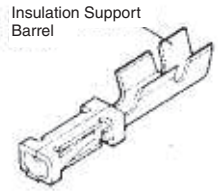

The AMPMODU receptacle cross-section is primarily rectangular, with rounded corners. Two integral cantilever beams contact the mating square or rectangular posts. Deflection of these spring members is limited by anti-overstress and excessive permanent deformation is prevented. This feature allows a wide range of tolerances for misalignment of mating contacts. The configuration of the receptacle completely encloses the spring members preventing damage during handling and assembly and makes the system compatible with automatic application techniques.

This design also permits the use of the receptacles without housings or encapsulation.

**Note:** Application of a contact lubricant is part of the manufacturing process of all AMPMODU tin-plated crimp products. However, it is not part of the manufacturing process of products that customers will solder, then clean. For these products, TE recommends that customers purchase a contact lubricant. (See application specification 114-25004 for further information.)

## Recommended Board Layout for Receptacle Assemblies and Individual Receptacles (Type A and B)

**Round Hole (Post Entry Type A or B)**

J-Receptacle centers may vary depending on requirements. For individual receptacles, minimum nominal centerline spacing between adjacent receptacles is .150 [3.81]; for receptacle assemblies, centerline spacing between adjacent receptacles is .156 [3.96]. The .003 [0.08] tolerances are not to accumulate over length of board. For solder mask, see TE Instruction Sheet 408-7411.

**Note:** Drawings depict normal use of the contact in a one or two-sided circuit board. When using plated thru-holes, refer to TE Engineering Report ER-001 and TE Instruction Sheet 408-7411. For solder mask, see TE Instruction Sheet 408-7411.

**Note:** All part numbers are RoHS compliant.

The letter A stamped on contact indicates mating end of receptacle.

## Recommended Board Layouts for Receptacle Assemblies and Individual Receptacles (Type C)

This configuration recommended for use with machine applied posts or headers with a .405 [10.29] minimum mating end post length.*

This configuration recommended for use with machine applied posts or headers with a .345 [18.76] minimum mating end post length.*

This configuration recommended for use with machine applied posts or headers with a .500 [12.70] minimum mating end post length.*

The mating post length is depicted by the A dimension on page 294 (machine applied posts) and the C dimension on pages 295-297 (headers).

H-Receptacle centers may vary depending on requirements. For individual receptacles, minimum nominal centerline spacing between adjacent receptacles is .125 [3.18] for receptacle assemblies, centerline spacing between adjacent receptacles is .156 [3.96]. The .003 [0.08] tolerances are not to accumulate over length of board.

# Mod I Receptacles, Crimp Snap-In (Wire Applied), .031 x .062 [0.79 x 1.57] Centerline

## Material and Finish

Copper alloy, plated as follows:

**Plating A** — Selectively plated .000030 [0.00076] gold on contact area, with gold flash over .000050 [0.00127] nickel on entire contact

**Plating B** — .000016 [0.00041] min. tin on entire contact

# Mod I Headers, Right-Angle Post, Keyed, .031 x .062 [0.79 x 1.57] Centerline

## Single Row, .156 [3.96] Centers

### Material and Finish

**Housing** — Black thermoplastic, 94V-0 rated

**Posts** — Brass, plated as follows:

**Plating A** — Selectively plated .000030 [0.00076] gold on contact area, with gold flash over .000050 [0.00127] nickel on entire post

**Plating B** — .000015 [0.00038] gold over .000050 [0.00127] nickel on entire post

**Plating C** — .000100-.000200 [0.00254-0.00508] tin over .000050 [0.00127] nickel on entire post

# Locking Clip Contacts for .031 x .062 [0.79 x 1.57] Posts, .031 x .062 [0.79 x 1.57] Centerline

## Wire Crimp Contacts with Insulation Support

### Material and Finish

**Contact Body** — Phosphor bronze, plated as follows:

**Plating A** — Selectively plated .000015 [0.00038] gold on contact area, with gold flash over .000050 [0.00127] nickel on entire post

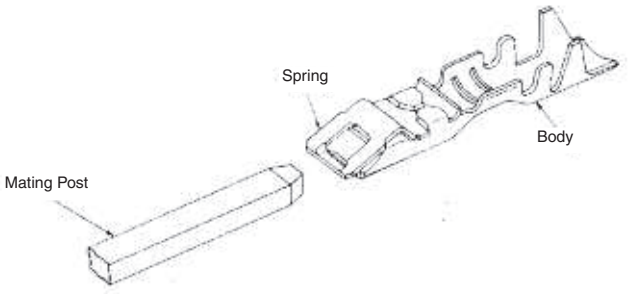

**Plating B** — .000100 [0.00254] min. tin over .000050 [0.00127] nickel on entire contact

**Contact Spring** — Stainless steel

| | 466950-2 | SCA | Stripper/Crimper (AMP-O-MATIC) | |

[1]AMP-O-LECTRIC KII Machine. Applicators also available for AMPOMATOR Lead Making Machines. Consult TE.
**Note:** These contacts must be crimped in accordance with TE Specification No. 114-25008 in order to function properly in a connector housing.
Extraction Tool **Part No. 91104-1** is used for removing individual contacts from connector housings and for detaching contacts from mating posts.

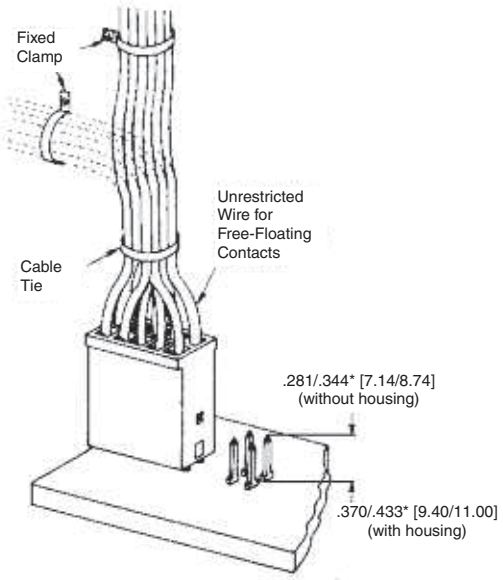

**Extraction Tool Part No. 91104-1**

**Instruction Sheet** 408-7678

### Wire Harnessing

If necessary, wires can be grouped with cable ties and secured to a panel with fixed clamps. However, locking clip contacts must be free to float within the connector housings to allow proper extraction. Therefore, harnessing hardware or the use of multiple terminations per contact must not restrict the free-floating action of contacts in the housing. For more information, request Insulating and Bundling Products Catalog 124132.

*Dimension defines .031 x .062 [0.79 x 1.57] portion of post.
If post is longer than maximum specified, post tip may butt against wire ends.

**Note:** All part numbers are RoHS compliant.

## Application Tooling

**For Crimp Snap-In Receptacles and Locking Clip Contacts**

### Side-Feed Heavy-Duty Miniature Applicators (Coded HDM)

Interchangeable applicators for crimping products reeled side-by-side on single or dual carrier strips (primarily closed-barrel terminals and open-barrel contacts). Similar design as the end-feed version. All side-feed applicators include a wire stop to help correctly position the wire end in the crimping target area.

For more information, request Instruction Sheet **408-8040**.

### AMP-O-LECTRIC Model "G" Terminating Machines, 354500-1, -9, -11

Semiautomatic bench machines for crimping reeled terminals and contacts, featuring a quiet and reliable direct motor drive, microprocessor controls for ease of setup and operation, and guarding and lighting designed for operator convenience and safety. All models are equipped with either manual or automatic precision adjustment of crimp height. Machine-mounted sensors are available for crimp quality monitoring using conventional miniature-style applicators.

**Specifications**

**Width** — 18.7-25.3 [475-643] depending on applicator type

**Depth** — 21.5-28.1 [546-713] depending on applicator type

**Height** — 20 [508]

**Weight** — 240 lb [110 kg]

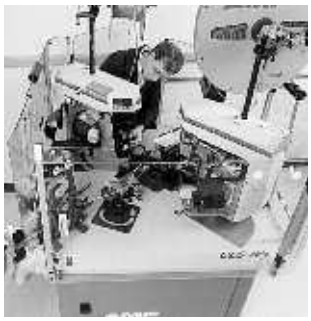

**Electrical** — 120 or 220 VAC, 50 or 60 Hz; 310 VA

**Air** — 90-110 psi [6.21-7.59 bar], 6 scfm [0.00282 $m^3/s$] when required with air-feed applicators

**Wire Range** — 26-10 AWG [0.12-6 $mm^2$] solid or stranded, depending on product applied

For more information, request Catalog **65828**, Video **198116**, Catalog **82275 [Crimp Quality Monitor (CQM)],** Video **198094.**

### AMPOMATOR CLS IV+ Lead-Making Machines, 356500-1, -2, 1213400-1, -2

Fully-automatic machines that measure, cut, strip and terminate single leads. Microprocessor-controlled, and programmed and operated using an easy-to-follow, menu-driven touchscreen. Features include direct-drive terminating units with precision crimp height adjustment, fully programmable setups, wire runout and splice detection, and motorized pre-feed with wire straightener. Crimp quality monitoring is also available.

**Specifications**

**Width** — 159 [4 040]

**Depth** — 68 [1 730]

**Height** — 86 [2 185] with 24 [610] dia. reel

**Weight** — 2 000 lb [907 kg]

**Electrical** — 220 VAC, 50 or 60 Hz, single phase, 25 A, with neutral and ground

**Air** — 90 psi [6.21 bar], 15 scfm [0.0071 $m^3/s$] sustained

**Wire Range** — 26-10 AWG [0.12-6 $mm^2$] stranded, 26-16 AWG [0.12-1.4 $mm^2$] solid

**Lead Lengths** — 3-90 [76.2-2 285], 90-1 000 [2 285-25 400] with long lead conveyors

For more information, request Catalog **124324**, Video **198142** (NTSC)**, 199609** (PAL).

**Note:** All part numbers are RoHS compliant.

## Application Tooling (Continued)

**For Crimp Snap-In Receptacles and Locking Clip Contacts** (Continued)

### AMP-O-MATIC Stripper-Crimper Machines, 854040-3, -4

Semiautomatic bench crimping machines that also strip the wire, and are therefore used for terminating jacketed cable. Feature manual precision adjustment of crimp height, keyed strip blades for faster, more accurate setups, and an efficient scrap removal system. All adjustments can be made from the front of the machines without special tools. Available with crimp quality monitoring.

**Specifications**

**Width**—14 [355]

**Depth**—18 [457]

**Height**—33 [838] without reel

**Weight**—150 lb [68 kg]

**Electrical**—120 VAC, 50 or 60 Hz, .5 A

**Air**—80-100 psi [5.52-6.90 bar], 3.5 scfm [0.00165 $m^3/s$]

**Wire Range**—32-14 AWG [0.03-2 $mm^2$]

For more information, request Catalog **65004**, Video **198075,** Catalog **82275 [Crimp Quality Monitor (CQM)],** Video **198094.**

### Stripper-Crimper Applicators (coded SCA)

Interchangeable applicators for crimping products in AMP-O-MATIC Stripper-Crimper Machines. Consist of separate ram and lower tooling assemblies. Similar dial-in settings for different wire sizes and insulation diameters as HDM applicators. Available with sensors for use with the Crimp Quality Monitor.

For more information, request Catalog **65004 (AMP-O-MATIC Stripper-Crimper Machines)**, Catalog **82275 [Crimp Quality Monitor (CQM)]**.

### Kappa 235, Automatic Cut and Strip, 3-547178-1

The Kappa 235 has the capability of processing wires with a cross section of up to 4 AWG and an outside diameter of 0.59 inch. Options include an inner conductor processing kit for multiconductor cables and a flat ribbon cable kit.

**Specifications**

**Width**—25 [630]

**Depth**—16 [490]

**Height**—13.4 [370]

**Weight**—95 lb [44 kg]

**Wire Cross-Sections**—24-4 AWG [0.22-25 $mm^2$]

**Flat Ribbon Cables**—width up to 40mm

**Length Range**—0.04”-328ft [1mm - 99.99m] (+/- 0.2%)

**Electrical**—110/230 V - 50/60Hz, switches automatically

### Cosmic 927R Micro-Cable Stripper

The Cosmic 927R Micro-Cable Stripper was developed to reliably strip various insulation materials and micro-cable. From conductor diameter 36 AWG to 10 AWG, the stripping diameter display can be set to within 0.1mm increments.

Thus optimal stripping quality is guaranteed and damage to the conductor is eliminated.

**Note:** All part numbers are RoHS compliant.

**Note:** For additional tooling options, contact TE or reference the TE web site.

### CERTI-CRIMP Straight Action Hand Tools (SAHT)

Premium grade hand tools. Feature ratchet control to provide complete crimp cycle. Die sets close in a straight line. Include a contact locator and wire stop, plus an insulation crimp adjustment lever, when applicable. Approximate weight 1.3 lb [0.59 kg]

All CERTI-CRIMP head assemblies / dies, have multiple power options available. The accompanying diagram outlines those power options. See catalogs 1654714 (SDE Electric Terminator), 124208 (626 Pneumatic Tool System) and 1773381(Battery-Powered Crimp Tool Kits) for more information.

For more information, request Catalog **65780**.

### PRO-CRIMPER III Hand Tool

Commercial grade hand tool for crimping various products. Features ratchet control to provide complete crimp cycle. Accepts both pinned- and shouldered-style die sets. Locators are provided with pinned-style die sets for proper contact and wire positioning, and to help minimize contact rotation and bending during crimping. Approximate weight 1.3 lb [0.60 kg].

All PRO-CRIMPER head assemblies / dies, have multiple power options available. The accompanying diagram outlines those power options. See catalogs 1654714 (SDE Electric Terminator), 124208 (626 Pneumatic Tool System) and 1773381(Battery-Powered Crimp Tool Kits) for more information.

### For Board Mount Receptacles and Machine Applied Posts

#### Modular Insertion System (MIS) Bench Machines, 217600 Series, 662820 Series (shown)

**For Board Mount Receptacles**

Bench machines for inserting a variety of products into pc boards. Uses the same interchangeable insertion heads as the Comp-U-Sertor II Machines. Series 217600 machines feature a manually-operated X-Y positioning fixture, plus a locator spotlight. The machine cycles when the board hole is placed on the anvil and both triggers on the dual handles attached to the X-Y fixture are depressed. Series 662820 machines, without board fixturing, cycle automatically when the hole is properly located. A stabilizing disk over the anvil helps keep the board level.

This benchtop insertion machine installs contacts into PC boards at rates to 2000 per hour. A spotlight highlights the insertion area, and lower tooling assures precise board location. The machine is activated by a foot pedal.

**Specifications**

**Width** — 18 [457]
**Depth** — 24 [610]
**Height** — 18 [457]
**Weight** — 250 lb [113 kg]
**Electrical** — 120 to 220 VAC, 50 or 60 Hz (217600); 120 or 240 VAC, 60 Hz, single phase, 120 VA (662820)
**Air** — 80 psi [5.52 bar] min., 15 scfm [0.00708 $m^3/s$] min.
**Insertable Area** — 18 x 22 [457 x 559] max.
For more information, request Catalog **296059**.

#### P300 Automatic Insertion Machine

Automatic machine for inserting a variety of contacts into pc boards (PCBs). Equipped with an insertion tool (comprised of a product-specific insertion head, an anvil, and a product feed mechanism). Stepper-motor driven X-Y table positions PCBs under insertion head. Surface Mount Equipment Manufacturers Association (SMEMA) compatible inline PCB Insertion Station for posts, tabs, receptacles or sockets. Stand-alone unit is field upgradeable to Pass Through. Mounts up to four TE pneumatic insertion heads. Modem diagnostics standard, vision system optional. Control panel used to program and monitor entire insertion process.

**Specifications**

**Width** — 57.5 [1 460]
**Depth** — 64.5 [1 640]
**Height** — 60 [1 520]
**Weight** — Depending on configuration
**Electrical** — 110 V, 60 Hz
**Air** — 87 psi [6 bar]
**Insertable Area** — 24 x 16 [600 x 400]
For more information, contact TE.

**Note:** All part numbers are RoHS compliant.

**Note:** For additional tooling options, contact TE or reference the TE web site.

## Application Tooling (Continued)

**For Board Mount Receptacles and Machine Applied Posts** (Continued)

### P350 Pin Insertion Machine

The P350 is a fully automatic inline pin insertion machine capable of applying reeled pins, tabs, receptacles and similar products into PCBs. With inline operation, an automatic tool changer and insertion rates up to 5 per second, it is focused at fully automatic high speed operation to maximize throughput while minimizing costly scrap.

A servo powered XY table positions the PCB under a central drive station at high speed. The tool changer can hold up to 3 insertion heads each capable of applying a different product. A unique rotary insertion finger allows the application of products at up to 7 different angles without rotating the PCB. This allows the P350 to apply product at different angles without a reduction in insertion rate or the potential positioning error associated with PCB rotation. Icon driven software with touch screen provides a simple to use, intuitive operator interface.

The P350 provides a wide range of solutions for pin insertion applications. Quick change tooling packs, and a wide range of options make it a flexible high speed platform.

### Specifications

**Width** — 102 [2600]
**Depth** — 118 [3000]
**Height** — 87 [2200]
**Weight** — approx 3500 lb [1600 kg]
**Electrical** — 230 V, 50-60 Hz, 10 A
**Air** — 600 kPa dried air
**Max. Board Size** — 17.5 x 17.5 [450 x 450]

### Electrical Characteristics

**Contact Current Rating** —
5 amperes max. for single contact in free air, could vary due to ambient temperature, wire size and duty cycles.

**Contact Resistance** —
12 milliohms at 100 ma and 50 mv open circuit.

**Dielectric Rating** —
At Sea Level – 1200 VAC between contacts on .156 [3.96] centers for 1 minute.

**Insulation Resistance** — 5 x $10^3$ megohms (initial)

#### Connector Durability

| | |
|---|---|
| **Receptacles** | |
| Mating | – 16 oz. [4.45N] max. per contact after 3 mating cycles (standard pressure) |
| | –30 oz. [8.34N] max. per contact after 3 mating cycles (high pressure, gold) |
| | –60 oz. [16.68N] max. per contact after 3 mating cycles (high pressure, tin) |
| Unmating | – 1 oz. [0.28N] min. per contact after 3 mating cycles (standard pressure) |
| | 3 oz. [0.83N] min. per contact after 3 mating cycles (high pressure) |
| **Locking Clip Contacts** | |
| Mating | – 4 lb. [17.79N] max. per contact after 3 mating cycles |
| Unmating | – 2 lb. [8.90N] min. per contact after 3 mating cycles |

### Environmental Characteristics

**Operating Temperature** — -65°C to 105°C [-85°F to 221°F] (Gold Plated)
-65°C to 60°C [-85°F to 140°F] (Tin Plated)

## Technical Documents

Various technical documents are available for your use:

**Product Specifications** describe technical performance characteristics and verification tests. They are intended for the Design, Component and Quality Engineer.

**108-25016** Interconnection System, Standard Pressure

**108-25025** Interconnection System, High Pressure, Gold

**108-25025-1** Interconnection System, High Pressure, Tin

**108-36029** Locking Clip Connectors

**Application Specifications** describe requirements for using the product in its intended application and/or crimping information. They are intended for the Packaging and Design Engineer and the Machine Setup Person.

**114-25000** Crimp Snap-In Receptacle Contacts

**114-25004** Board Mount Receptacle Contacts

**114-25008** Locking Clip Contacts

**114-25011** Machine Applied Straight Posts

**Instruction Sheets** provide instructions for assembling or applying the product. They are intended for the Manufacturing Assembler or Operator.

**408-7308** Clinching Procedures for Header Assemblies

**408-7411** Suggestions for Wave Soldering AMPMODU Receptacles

**408-7594** TE Hand Tool 90274-2 for Crimping Crimp Snap-In 18-22 AWG Contacts

**408-7750** TE Hand Tool 90328-1 for Crimping Crimp Snap-In Contacts (22-26 AWG)

**408-7676** AMPMODU Locking Clip Connectors and Contacts

**408-7671** TE Hand Tool 90308-1 for Crimping Locking Clip Contacts

**408-7678** TE Extraction Tool 91104-1 for Locking Clip Contacts

**408-7981** Clinching Procedures for Receptacle Assemblies

**408-9451** TE Extraction Tool 843473-1 for Crimp Snap-In Receptacles

**Note:** All part numbers are RoHS compliant.

## Shunts

### Product Facts

- **7600 Series Programmable Shunts use conventional .100 x .300 [2.54x7.62] DIP leg spacing**
- **Post Shunts are used to common pairs of .025 [0.64] square posts, .025 [0.64] diameter round posts and .022 x .026 [0.56 x 0.66] formed posts**

TE offers a variety of high quality shunts for low cost manual programming. TE 7600 Series Programmable Shunts are designed on the standard .100 x .300 [2.54 x 7.62] DIP spacing.

TE DIP Shunts are a highly reliable, low cost means of manually programming various types of electrical/electronic equipment. The shunt consists of a series of conductive straps packaged in a DIP configuration. The straps can be retained intact for a closed circuit or broken with a hand tool to produce an open circuit.

TE Post Shunts mate with any common pairs of square, rectangular and round posts. Post shunts come in two-position low profile, 2 mm miniature, tandem spring, dual beam, and multiposition versions.

Among the options available are choices of gold or tin plating, beryllium copper or phosphor bronze contact material and shunts with 94V-0 rated housing spaces on .079 [2.00], .100 [2.54] and .200 [5.08] centers with the low profile series requiring only .250 [6.35] clearance from the pc board.

All TE shunts feature one-piece construction for high reliability. All have high normal forces for excellent electrical continuity. For added reliability, Tandem Spring and Dual Beam Shunts have two points of contact in each receptacle.

# Dual In-Line Package (DIP) Shunts — 7600 Series

## Standard Shunt
## Standard Pressure

### Material and Finish

**Housing** — Glass-filled polyester, UL 94V-0 rated

**Contacts** — Brass

**Finish** — Selectively plated .000100 min. tin on solder area over .000050 min. nickel on entire contact

**Contact Lead Spacing** — .100 x .300 [2.54x7.62]

**Lead Length** — .140 [3.56] below mounting surface

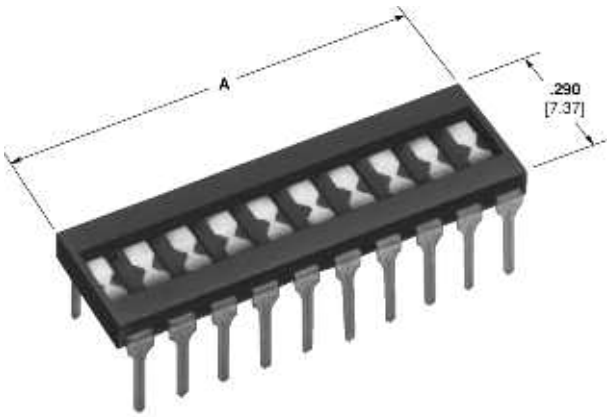

**Housing Color** — Black

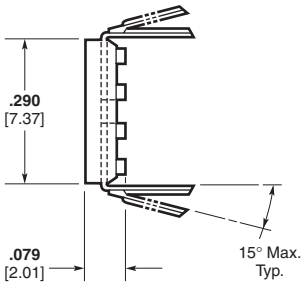

**Programming Tool** — See below

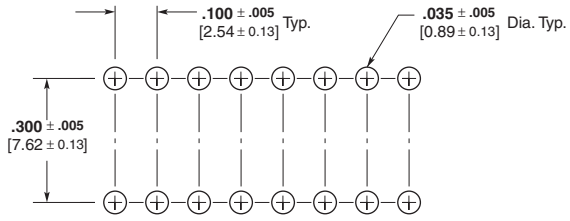

**Programming Hand Tool**
Part No. 435862-1

This tool provides a reliable means of programming DIP shunts. It is rugged, light-weight and dependable. No special skills are required to use this tool.

| No. of Pos. | Dimension A | | Standard Shunt Standard Pressure |
|---|---|---|---|
| | inch | mm | |
| 4 | .400 | 10.16 | 1825190-4 |

# Post Shunts

## Product Facts

- One-piece contact construction
- High normal forces
- 94V-0 rated housings
- Gold inlay, gold plate or tin plate over nickel
- Stackable
- Those post shunts indicated are recognized under the component program of Underwriters Laboratories Inc., File No. E28476 and certified by the Canadian Standards Association File No. LR 7189

## Tandem Spring Shunts

- Two points of contact provide extra reliability
- Shunts accept posts as short as .175 [4.45]; posts bottom at .330 [8.38]

## 2mm Mini Shunts

- Stackable on 2mm contact centerline
- Low profile
- Available in strips of 10

### Material and Finish — Low Profile and 2mm Shunts

**Housing** — Glass-filled thermoplastic, black, UL 94V-0 rated

**Contacts** — Beryllium copper or phosphor bronze, plated .000050 [0.00127] nickel underplate with gold plate in contact area or tin overall

### Material and Finish — Tandem Spring Shunts

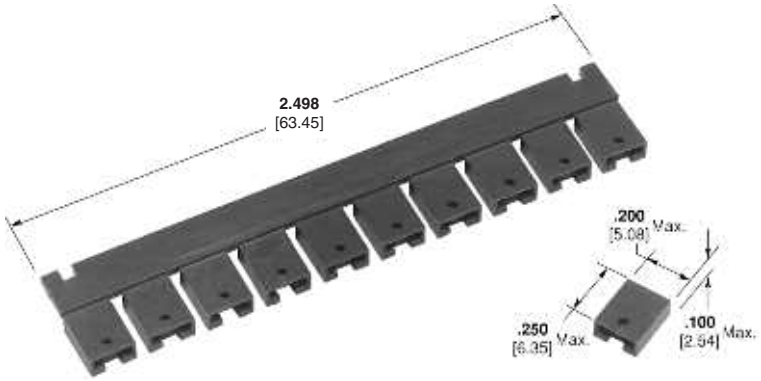

**Housing** — Nylon, UL 94V-0 rated

**Contacts** — Phosphor Bronze

**Finish** — .000030 [0.00076] nickel underplate with gold inlay in the contact area or tin overall

## 2-Position, Low Profile Shunts

## Performance Specifications

### Dual In-Line Package (DIP) Shunts — 7600 Series

**Current Rating** —
Standard pressure — 2 amperes for +20˚C rise above ambient (one conductor per shunt
Machine insertable — 1 ampere for +20˚C rise above ambient (one conductor per shunt)

**Insulation Resistance** — 1x $10^{10}$ ohms min. at 100 VDC

**Dielectric Withstanding Voltage** — 500 VDC min.

**Capacitance** — 2 picofarads max. between adjacent straps

**Temperature Rating** — -55˚C to +105˚C

**Terminal Strength (Bend Test)** — Two 45˚ bend cycles per MIL-STD-202, Method 211, Condition B

**Solder Bridging** —
Cut straps can be reconnected by solder bridging. Solder bridging recommendations are:

- Use low temperature solder (60/40 tin/lead)
- Use solder tip approximately 1/32 [0.79] in diameter
- Do not let solder tip come in contact with plastic material

### Post Shunts

**Current Rating** —
3 amperes max. unless otherwise noted

**Temperature Rating** — -65˚C to +105˚C (gold) -40˚C to +85˚C (tin)

## Technical Documents

Various technical documents are available for your use:

**Product Specifications** describe technical performance characteristics and verification tests. They are intended for the Design, Component and Quality Engineer.
