

PATGUARD LITE

This is an entry level software package facilitating the quick and effective downloading of test information and certificate printing. It's ideal for those requiring quick, basic testing. PATGuard Lite provides records and documentation to support PAT testing and enables the user to quickly and effectively download test results, even if they only have limited training. The low cost software package uses Windows-based management of information so it's easy to learn and you can hook your tester to your PC to download directly into PATGuard.

Key Features

- Automatic record generation
- Icon style display
- Most PAT downloads accepted (all Seaward)
- Database compatibility across range
- Compatible with PATGuard Work About

Ideal for the following users

- Small Organisations
- Small Number of Assets
- Limited Record Information
- Own Records

SUPERIOR SOFTWARE

Our PATGuard software is designed to be highly functional, easy to use and above all, helpful. It is available in three versions, each offering the optimum number of functions depending on your requirements. Each software package will add value to the safety testing facilities you offer your customers or use in-house. This can be achieved by utilising full test records, scheduling and pre-emptive, automated notification.

This means you know exactly where all test equipment is located, its test status, and when it requires re-testing. Add to that our PATGuard Work About software which enables mobile working through your PDA and PATGuard Time Manager for managing test times on the job, and you are in total control.

This cuts down on administrative tasks, it can save a lot of valuable time. So whether you are a large international company or small, local firm, PATGuard software makes economical sense.

To find out more please contact us on 0191 586 3511, visit www.seaward.co.uk or email us sales@seaward.co.uk.
