

W-Series Switch

Carling Technologies set the standard for performance and aesthetics with the widely successful, often imitated but never duplicated, V-Series rocker switches. Building further upon that platform, Carling has once again raised the bar with the fully sealed W-Series. The W-Series' traditional appearance features complete IP68 protection, including below the panel, where the critical connection is made from wiring harness. When used in conjunction with the integrated connector, the totally submersible W-Series provides a seal for up to ten individual wires, assuring compatibility with even the most complex circuitry.

The W-Series also offers a wide variety of accoutrements including endless illumination options featuring dual level and multicolor LEDs, progressive and hazard warning circuits, ratings up to 10A 24V, choice of paddle, rocker, locking or laser etched actuators, hundreds of standard legend choices and the electrical performance and reliability that is the hallmark of Carling Technologies products.

Key Features:

- ♦ Fully sealed and submersible
- ♦ IP68 protection including below the panel
- ♦ Tri-seal design
- ♦ Connector with twin locking tabs

Typical Applications:

- ♦ Marine equipment
- ♦ Transportation equipment
