

The diagram shows a three-layer system. The top layer is labeled 'B REF.' and has a downward arrow indicating a reference level. The middle layer is labeled 'C' and has an upward arrow indicating a measurement point. The bottom layer is labeled 'A' and has a downward arrow indicating a measurement point. The layers are separated by horizontal lines, and the measurement points are indicated by vertical arrows.

A diagram of a circular coil with a central circular hole. A horizontal dimension line with arrows at both ends is positioned above the coil, indicating the diameter of the outer circle, labeled $D_{REF.}$.

* 2) MINIMUM 2" (50.8 mm) OVERLAP REQUIRED TO ACHIEVE UL LISTED RATED LOAD. (1.5 IN² OR 968 mm²)
