Type PVC Polyester and Polypropylene Film/Foil Capacitors

Notice and Disclaimer: All product drawings, descriptions, specifications, statements, information and data (collectively, the "Information") in this datasheet or other publication are subject to change. The customer is responsible for checking, confirming and verifying the extent to which the Information contained in this datasheet or other publication is applicable to an order at the time the order is placed. All Information given herein is believed to be accurate and reliable, but it is presented without any guarantee, warranty, representation or responsibility of any kind, expressed or implied. Statements of suitability for certain applications are based on the knowledge that the Cornell Dubilier company providing such statements ("Cornell Dubilier") has of operating conditions that such Cornell Dubilier company regards as typical for such applications, by are not intended to constitute any guarantee, warranty or representation regarding any such matter – Cornell Dubilier specifically and expressly disclaims any quarantee, warranty or representation concert the suitability for a specific customer application, use, storage, transportation, or operating envi The Information is intended for use only by customers who have the requisite experience and, apply determine the correct products for their application. Any technical advice inferred from thigh otherwise provided by Cornell Dubilier with reference to the use of any Cornell Dubilier of gratis (unless otherwise specified by Cornell Dubilier), and Cornell Dubilier assumes no obligation or liability for the advice given or results obtained. Although Cornell Dubilier strives to apply the r and safety standards regarding the design and manufacturing of its products, in the of the art, isolated component failures may still occur. Accordingly, customer top cations which require a high degree of reliability or safety should employ suitable designs or other safety safety should employ suitable designs or other safety of protective circuitry or redundancies or other appropriate protective measures) in order to ensure that the failure of an electrical component does not result in a risk of personal injury or property damage. Although all product-related warnings, cautions and notes must be observed, we justomer should not assume that all safety measures are indicated in such warnings, cautions and notes extnat other safety measures may not be required.
