

DIP TEST-CLIP

The IC Test-Clip for fast, safe access to DIP Leads

Invented in 1967 by A P Products, our Test-Clip has remained the industry standard for faster easier DIP IC Testing, quality control inspection, and field service. A P Test-Clips have become an indispensable tool to the electronic industry.

We're introducing today the industry largest selection of Test-Clips. With 144 models to fit every size DIP up to 64-pins and both nailed and connector-compatible "headless" leads available in every size, A P Products has just the right Test-Clip to meet your DIP testing requirements.

- **Easy attachment**

Narrow nose shape for working on high density PC-boards. Fits onto IC's with only 2,5 mm between leads and adjacent components.

- **Positive clamping**

The heavy duty industrial grade metal springs provide a firm positive grip to the DIP under test. The weight of the probes and test leads can't disturb connections, eliminating intermittents and false readings.

- **Save way to test**

The contact comb fits between DIP leads to eliminate any possibility of shorting out chips.

- **Reliable contacts**

Proven contact wiping action for optimum reliability. Flat "Duck-Bill" contacts won't roll off narrow DIP leads. "Knife-Edge" contacts are designed to cut through oxidation and dirt built up than can occur on older DIP IC leads.

- **Rugged construction**

Body material is tough, engineering grade glassfilled PVC. The contacts are made from hardened Nickel Silver. Hinge design with steel pivot pin for smooth, long lasting use.

Specifications:

Plastic:	PVC, glassfilled (30%), acc to UL 94 V-0
Contacts:	CuNi18Zn20, no plating
Temp. Range:	-55 °C to +165 °C
Rel. Humidity:	<80%
Max. Current:	2 A
Max. Voltage:	250 V
Test Voltage:	Contact - Contact = 1000 V Contact - Ground = 1500 V

DIP TEST-CLIP
