

# 851 Series

## Applications

Former connector for military applications.  
Now used in the fields of professional and general electronics.

## Standards

MIL-C 26482 G Series 1  
NFC 93422-He 301 B  
VG 95328  
BS 9522 F 0017  
GAM T1 list  
QPL approved (solder version)

## Description

- Bayonet coupling
- Environmental and hermetic versions
- Solder, crimp, straight spills and wire wrap versions
- Thermocouple contacts available
- Cadmium free plating (Zinc Cobalt) version

## Characteristics

### Mechanical

- Shell :
  - environmental version : aluminum alloy plating
    - olive green cadmium
    - black anodized
    - white cadmium
    - satin finish bright nickel
    - zinc cobalt (olive green)
  - hermetic version : steel
  - plating : - iridescent yellow cadmium, nickel
- Insulator :
  - front section : neoprene elastomer (85 shore)
  - rear section : neoprene elastomer (40 shore)
- Contact :
  - crimp : inserted and removed from rear of insulator retained by metallic clip ; solder and straight spills : non removable ; wire wrap : removable or not removable
  - material : copper alloy
  - plating : gold overall or gold plated active zone and tin/lead plated termination
  - min retention force of contacts in insulator

| contact size  | crimp   | solder straight spill ww |
|---------------|---------|--------------------------|
| 20 (Ø 1 mm)   | ≥ 68 N  | ≥ 68 N                   |
| 16 (Ø 1.6 mm) | ≥ 113 N | ≥ 113 N                  |

- Mechanical endurance :  
500 cycles (full mating-unmating)

### Electrical

- Dielectric withstanding voltage :
  - at standard pressure :  
mated and unmated connectors
    - 1 500 Vrms between size 20 contacts (service 1)
    - 2 300 Vrms between size 16 contacts (service 2)
    - 1 500 Vrms between mixed size 20 and 16 contacts (service 1)
  - at reduced pressure (10 mbar) :  
connectors mated and unmated
    - 200 Vrms between size 20 contacts (service 1)
    - 300 Vrms between size 16 contacts (service 2)
- Insulation resistance : ≥ 5 000 MΩ under 500 Vdc
- Current rating per contact :
  - size 20 : 7.5 A
  - size 16 : 13 A

- Contact resistance :
  - environmental version :
    - size 20 : 4 mΩ
    - size 16 : 3 mΩ
  - hermetic version :
    - size 20 : 30 mΩ
    - size 16 : 14 mΩ
- Shielding : 70 dB to 5 MHz  
40 dB to 100 MHz

### Climatic

- Working temperature : -55°C to +125°C
- Sealing :
  - crimp contact version, 1 bar differential pressure, leakage ≤ 8 cm³/hr
  - solder contact version, 2 bar differential pressure, leakage ≤ 16 cm³/hr
- Hermiticity : 1 bar differential pressure leakage ≤ 2,8 mm³/hr
- Chemical resistance :
  - to MIL-C 26482 G Series 1 and
  - NFC 93422-HE 301 B code A
- Resistance to salt spray : 48 hours at environmental temperature
- Damp heat : 21 days
- Vibration : to NFC 20-616

## Ordering information - Environmental connectors

## Square flange receptacle with straight adapter

|                |                |
|----------------|----------------|
| solder<br>00 A | HE 301 B 00A   |
| crimp<br>00 RA | HE 301 B 00 RA |

Technical drawing of a crimp terminal. The side view (left) shows dimensions: L (overall length), ØA (outer diameter of the barrel), B (barrel length), C (crimp length), ØG (inner diameter of the crimp), K (crimp depth), and D (total height). The front view (right) shows a square body with four mounting holes, labeled '4 Holes ØJ', and dimensions F (width) and E (height).

## Square flange receptacle with removable straight backshell for heatshrink sleeving

|                |  |
|----------------|--|
| solder<br>00 M |  |
| crimp<br>00 RM |  |

Technical drawing of a square flange receptacle with removable straight backshell for heatshrink sleeving. The drawing includes a side view and a front view. The side view shows dimensions L (total length), ØA (outer diameter of the backshell), ØG (inner diameter of the backshell), ØD (outer diameter of the receptacle), B (backshell thickness), C (receptacle length), and M (crimp length). The front view shows dimensions F (flange width), E (flange height), and 4 Holes ØJ (four mounting holes).

## Jam nut receptacle with removable straight backshell for screen termination and heatshrink sleeving

|                |            |
|----------------|------------|
| solder<br>07 G |            |
| crimp<br>07 RG | VG 95328 T |

Technical drawing of a jam nut receptacle with removable straight backshell for screen termination and heatshrink sleeving. The drawing includes a side view and a top view. Dimensions are labeled: L (length), ØA (outer diameter of backshell), B (backshell length), C (backshell thickness), M (backshell width), ØG (inner diameter of backshell), ØD (outer diameter of receptacle), ØF (inner diameter of receptacle), P (width of receptacle), and S (height of receptacle).

## Cable connecting receptacle with straight sealing gland and cable clamp backshell

solder  
01 JC

MS 3111 J

Technical drawing of a cable connecting receptacle with straight sealing gland and cable clamp backshell. The drawing includes a side view and a cross-section view. Dimensions are labeled as follows:

- L**: Overall length of the assembly.
- A**: Diameter of the main body.
- B**: Diameter of the front flange.
- C**: Diameter of the rear flange.
- D**: Diameter of the rear flange (øD).
- F**: Diameter of the rear flange (øF).
- G**: Diameter of the rear flange (øG).
- P**: Diameter of the rear flange (øP).
- e**: Thickness of the front flange.
