PROPELLER ACTIVITY BOARD

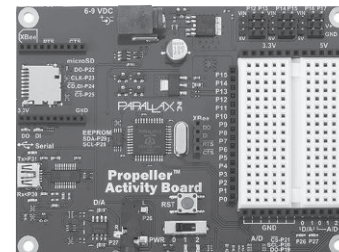

The built-in Propeller P8X32A programming system is pre-wired to the most popular peripherals, making experimenting fast and fun.

Features:

- XBee socket — control or receive data from your invention wirelessly
- microSD card holder — log sensor data or play sound files
- Mini audio/stereo jack — listen to WAV files, sound effects, or synthesized speech
- 3-pin headers — quickly connect servos, serial LCDs, etc.
- Breadboard — build and rebuild circuits without soldering (or desoldering!)
- A/D and D/A converters — read or set the voltages for battery monitoring or sensors
- Power via USB or power supply/battery pack — the choice is yours
