

# HCPL-2730/0730/2731/0731

## Dual Channel Low Input Current, High Gain Optocouplers

### Data Sheet

#### Description

These dual channel optocouplers contain a separated pair of GaAsP light emitting diodes optically coupled to a pair of integrated high gain photo detectors. They provide extremely high current transfer ratio and excellent input-output common mode transient immunity. A separate pin for the photodiodes and first gain stages ( $V_{CC}$ ) permits lower output saturation voltage and higher speed operation than possible with conventional photodarlington type optocouplers. In addition,  $V_{CC}$  may be as low as 1.6V without adversely affecting the parametric performance.

These dual channel optocouplers are available in an 8-Pin DIP and in an industry standard SO-8 package. The following is a cross reference table listing the 8-Pin DIP part number and the electrically equivalent SOIC-8 part number.

| 8-Pin DIP | SO-8      |
|-----------|-----------|
| HCPL-2730 | HCPL-0730 |
| HCPL-2731 | HCPL-0731 |

The SO-8 does not require "through holes" in a PCB. This package occupies approximately one-third the footprint area of the standard dual-in-line package. The lead profile is designed to be compatible with standard surface mount processes.

#### Functional Diagram

| TRUTH TABLE |       |
|-------------|-------|
| LED         | $V_O$ |
| ON          | LOW   |
| OFF         | HIGH  |

A 0.1  $\mu$ F bypass capacitor connected between pins 5 and 8 is recommended.

#### Features

- High current transfer ratio – 1800% typical
- Low input current requirements – 0.5 mA
- Low output saturation voltage – 0.1 V
- High density packaging
- Performance guaranteed over temperature 0°C to 70°C
- LSTTL compatible
- High output current – 60 mA
- Safety approval:
  - UL recognized – 3750 V rms for 1 minute and 5000V rms\* for 1 minute
  - CSA approved
- Available in 8 pin DIP and SO-8 footprint
- MIL-PRF-38534 hermetic version available (HCPL-5730/5731)
- Surface mount gull wing option available for 8-pin DIP (Option 300)

#### Applications

- Digital logic ground isolation
- Telephone ring detector
- Level shifting
- EIA RS-232C line receiver
- Polarity sensing
- Low input current line receiver – long line or party line
- Microprocessor bus isolation
- Current loop receiver
- Line voltage status indicator – low input power dissipation

\*5000 V rms/1 minute withstand voltage rating is for Option 020 (HCPL-2730, HCLP-2731) products only.

**CAUTION:** It is advised that normal static precautions be taken in handling and assembly of this component to prevent damage and/or degradation which may be induced by ESD.

Guaranteed operation at low input currents and the high current transfer ratio (CTR) reduce the magnitude and effects of CTR degradation.

The outstanding high temperature performance of this split Darlington type output amplifier results from the inclusion of an integrated emitter-base bypass resistor which shunts photodiode and first stage leakage currents to ground.

The HCPL-2731/0731 have a 400% minimum CTR at an input current of only 0.5 mA making it ideal for use in low input current applications such as MOS, CMOS, and low power logic interfacing or RS232C data transmission systems. In addition, the high CTR and high output current capability make

this device extremely useful in applications where a high fanout is required. Compatibility with high voltage CMOS logic systems is guaranteed by the 18 V  $V_{CC}$  and  $V_O$  specifications and by testing output high leakage ( $I_{OH}$ ) at 18 V.

The HCPL-2730/0730 are specified at an input current of 1.6 mA and have a 7 V  $V_{CC}$  and  $V_O$  rating. The 300% minimum CTR allows TTL to TTL interfacing at this input current.

Important specifications such as CTR, leakage current, and output saturation voltage are guaranteed over the 0°C to 70°C temperature range to allow trouble-free system operation. Selection for lower input currents down to 250  $\mu$ A is available upon request.

## Selection Guide

To order, choose a part number from the part number column and combine with the desired option from the option column to form an order entry.

Example 1:

HCPL-2730-520E to order product of 300mil DIP Gull Wing Surface Mount package in Tape and Reel packaging with UL 5kVrms 1minute rating in RoHS compliant.

Example 2:

HCPL-2730 to order product of 300mil DIP package in tube packaging and non RoHS compliant.

Option datasheets are available. Contact your Avago sales representative or authorized distributor for information.

Remarks: The notation '#XXX' is used for existing products, while (new) products launched since 15th July 2001 and RoHS compliant option will use '-XXxE'.

## Schematic

USE OF A 0.1  $\mu$ F BYPASS CAPACITOR CONNECTED BETWEEN PINS 5 AND 8 IS RECOMMENDED (SEE NOTE 8)

## Package Outline Drawings

### 8-Pin DIP Package (HCPL-2731/HCPL-2730)

DIMENSIONS IN MILLIMETERS AND (INCHES).  
\*MARKING CODE LETTER FOR OPTION NUMBERS  
"L" = OPTION 020  
OPTION NUMBERS 300 AND 500 NOT MARKED.

NOTE: FLOATING LEAD PROTRUSION IS 0.25 mm (10 mils) MAX.

## 8-Pin DIP Package with Gull Wing Surface Mount Option 300 (HCPL-2731/HCPL-2730)

## Small Outline S0-8 Package (HCPL-0731/HCPL-0730)

## Solder Reflow Thermal Profile

Note: Non-halide flux should be used.

## Regulatory Information

The HCPL-2731/2730 have been approved by the following organizations:

### UL

Recognized under UL 1577, Component Recognition Program, File E55361.

### CSA

Approved under CSA Component Acceptance Notice #5, File CA 88324.

### IEC/EN/DIN EN 60747-5-2

Approved under  
 IEC 60747-5-2:1997 + A1:2002  
 EN 60747-5-2:2001 + A1:2002  
 DIN EN 60747-5-2 (VDE 0884  
 Teil 2):2003-01  
 (Option 060 only)

## Recommended Pb-Free IR Profile

NOTES:  
 THE TIME FROM 25 °C to PEAK TEMPERATURE = 8 MINUTES MAX.  
 $T_{smax} = 200^{\circ}\text{C}$ ,  $T_{smin} = 150^{\circ}\text{C}$

Note: Non-halide flux should be used.

\*All Typical values at T<sub>A</sub> = 25°C unless otherwise noted.

\*\*The Input-Output Momentary Withstand Voltage is a dielectric voltage rating that should not be interpreted as an input-output continuous voltage rating. For the continuous voltage rating refer to the IEC/EN/DIN EN 60747-5-2 Insulation Characteristics Table (if applicable), your equipment level safety specification or Avago Application Note 1074 entitled "Optocoupler Input-Output Endurance Voltage."

### Notes:

- Pin 5 should be the most negative voltage at the detector side.
- Each channel.
- DC CURRENT TRANSFER RATIO (CTR) is defined as the ratio of output collector current, I<sub>O</sub>, to the forward LED input current, I<sub>F</sub>, times 100%.
- Device considered a two-terminal device: pins 1, 2, 3, and 4 shorted together, and pins 5, 6, 7, and 8 shorted together.
- Measured between pins 1 and 2 shorted together, and pins 3 and 4 shorted together.
- Common mode transient immunity in a Logic High level is the maximum tolerable (positive) dV<sub>CM</sub>/dt of the common mode pulse, V<sub>CM</sub>, to assure that the output will remain in a Logic High state (i.e., V<sub>O</sub> > 2.0 V). Common mode transient immunity in a Logic Low level is the maximum tolerable (negative) dV<sub>CM</sub>/dt of the common mode pulse, V<sub>CM</sub>, to assure that the output will remain in a Logic Low state (i.e., V<sub>O</sub> < 0.8 V).
- In applications where dV/dt may exceed 50,000 V/μs (such as static discharge) a series resistor, R<sub>CC</sub>, should be included to protect the detector IC from destructively high surge currents. The recommended value is R<sub>CC</sub> = 110  $\Omega$ .
- Use of a 0.1  $\mu$ F bypass capacitor connected between pins 5 and 8 adjacent to the device is recommended.
- In accordance with UL 1577, each optocoupler is proof tested by applying an insulation test voltage > 4500 V rms for 1 second (leakage detection current limit, I<sub>I-O</sub> < 5  $\mu$ A).
- In accordance with UL 1577, each optocoupler is proof tested by applying an insulation test voltage > 6000 V rms for 1 second (leakage detection current limit, I<sub>I-O</sub> < 5  $\mu$ A).
- Measured between the LED anode and cathode shorted together and pins 5 through 8 shorted together.
- Derate linearly above 65°C free-air temperature at a rate of 2.3 mW/°C for the SO-8 package.
